## **Diablo Canyon**

I am opposed to renewing the continued operating license of Diablo Canyon Nuclear Power Plant. We must instead fully commit to renewables, such as wind and solar power. It can be done with the needed will, and government support. In today's continued climate of violence and deteriorating relationships, both within and outside of our country, we do not need to add nuclear power plants as potential weapons for those who would want to destroy us (and with us, all life on this planet). Contrary to what politicians would have us believe, nuclear energy is not safe and is not environmentally friendly. Getting rid of our dependence on carbon energy requires a more intelligent alternative for the future.
