## **Decades of Safety, and Emissions free electricity**

Trust Science, trust engineers, monitor corporations with proper oversight, and keep these emission free plants operating. Deciding to abandon an asset that is fully functional and supplying a critical source of electricity is not very eco-friendly. Nuclear is the most powerful energy source on earth. It was harnessed and controlled 75 years ago. Stop the unfounded rhetoric from the 70's anti-nuclear movement and recognize the facts on safety compared to the gas, oil, coal and wind industries and consider the waste streams from solar and batteries when making decisions
