## **We really need nuclear power**

It is appalling that you would deny your citizens the benefit of Diablo Canyon nuclear power by allowing it to close before its normal design life. This is when its operation is the least expensive and we are at a time when clean energy is at a premium. Any risk of extending its useful life is miniscule in the face of the benefit its 2GW of clean energy can have for California residents. Many Californians are running dirty generators because the replacement power cannot get to them. You are actually regressing in the clean air category, yet you refuse to access the asset you have at hand. So, please keep Diablo Canyon open for the sake of our citizens, but especially for the sake of our children and their children. They simply cannot afford to throw away any more clean energy sources.
