Greetings,

I am writing to support the extended operation of Diablo Canyon Power Plant. Nuclear energy provides safe, effective, and resilient base load energy in a state where we are already stretched thin on our grid. It would be shameful to close the power plant while it still has decades of operating life left. I fully support the continued operation and truly hope for my kids and the future generations of our great state of California that we embrace nuclear as an advanced energy source that supports us into the future.

Sincerely,

Andrew Wysong
Nuclear Safety Manager
