## **Extending the life of Diablo Canyon makes sense for all Californian's**

Let's keep it simple. Unless there is some other clean source to replace the energy provided by Diablo Canyon, it would be very short sighted to shut it down early. The plan at the moment, would be to replace Diablo Canyon's production with coal fire energy from Wyoming. This will lead to dirtier and more expensive energy in CA, that being the case, this should NOT even be a discussion.
