Diablo Canyon Power Plant and Build more new generation Nuclear Power Plants

Hello,

Please take the advice of people like Governor Gavin Newsom, Bill Gates, Nathan Myhrvold, John Gilleland, and other brilliant people that want to help the world get off petroleum dependency. <https://www.terrapower.com/our-people/>

The future is NOW for nuclear power. It should be part of California's Power Portfolio. The Central Valley is perfect for next generation nuclear power plants like Terra Power's Molten Chloride Fast Reactor <https://www.terrapower.com/our-people/> or the Travelling Wave Reactor that uses spent nuclear fuel that is lying around this country in abundance. Time for California to let go of fear and embrace a safe and clean form of power. More people die each year in coal mining and oil drilling accidents than the ENTIRE HISTORY OF NUCLEAR POWER. It is true just look it up and research the multiple source on this matter. Think of all the high tech long term jobs this would provide the State too.

Thank you,

Dan Gamon
