To whom it may concern,

I live just 20 miles from the Ginna nuclear power station in western NY. Although I live in a different state, I believe Diablo Canyon's future is my business because, while local opponents of Diablo Canyon may have fears of nuclear power, or nuclear is not their "favorite" form of non-combusting energy, nuclear is and always will be the most robust and capable tool in the fight against global climate change - and that affects me. So please have confidence in the technology and the dedicated operators at Diablo Canyon. Allow them to continue making reliable carbon-free power all day, every day by keeping the Diablo Canyon facility open and running.

Sincerely,
Tony Higgins
Pittsford, NY 14534
