Hi!

I want to voice my strong support in keeping DCCP online in California. If we're serious about combatting climate change we need all the non-greenhouse-emitting power we can get, and nuclear is the largest source of non-emitting power in the country by far. We need Diablo Canyon (a plant with a great production & safety record) online as long as possible if we wish to help mitigate climate change.

Thank you,
Mark Parsons
