This note is to lend my support to extending the life of the Diablo Canyon nuclear power plant beyond the current 2025 planned closure. This highly reliable and clean energy source produces 10 percent of California's energy requirements. As fossil fuel plants are phased out in response to Climate Change, with considerable uncertainty in the requirements over time, the continued baseline contribution of Diablo Canyon would greatly increase system reliability.

Bruce D. Marcus, PhD  
Chief Scientist (Ret)  
TRW Space and Laser Programs Division
