SAVE DIABLO CANYON!!!

Greetings, I'm writing you here today to put my support behind the Diablo Canyon Nuclear power plant.

Closing down Diablo Canyon would be a huge mistake. We are in the middle of a climate crisis, and shutting down

Californias largest source of clean, carbon-free electricity is just unthinkable, and history would judge such a drcision harshley. If we look at places like Germany, where nuclear plants are getting phased out, that carbon free ebergry always gets replaced by fossil fuels. The majority of Californians support the continued operation of Diablo Canyon, and in the county where Diablo Canyon operates. That support is even higher at 75% Let me say it loud and clear, Diablo Canyon MUST continue providing clean electricity to californians.
