## **Please keep Diablo Canyon Running!**

Diablo Canyon Nuclear Plant is the largest source of clean, carbon-free electricity generation in California. If we lose nearly a quarter of our clean electricity, just as heat waves threaten much of the state and our power grid becomes increasingly fragile, many people could experience blackouts and power shortages. The state will also very likely be forced to fall back on building more natural gas generation, which would jeopardize our clean energy goals as outlined in SB100. Please extend Diablo Canyon's operating license as long as possible so we can keep on track for our clean energy goals, and shore up the power grid to meet demand.
