Diablo Canyon must remain in service

Nuclear power is the only solution for our ever increasing needs. Renewables have not been invested in enough to be where we need them to be by now. Also the absolute costs of Renewable energy methods are rarely mentioned. The number of Solar panels or Wind turbines needed to produce the energy we require is untenable. The safety of Renewables vs Nuclear is a myth. The dangers are different, but no less. Also, many of the dangers associated with Nuclear are perceptions based on outdated information. Modern technology is amazing.
