## **Diablo must close**

In 2016 there was an agreement that Diablo would close. Forces were set in motion and monies were dispensed. This was a good decision. Diablo sits on more than one earthquake fault with pools of spent fuel. Thousands of gallons of overheated water are discharged daily affecting the marine environment. California must actively work towards more wind and solar instead of pouring more money into an aging nuclear power plant which probably has deferred maintenance. Giving 1.4 billion dollars to a convicted felon like PG&E is a crime in and of itself. In addition, making the loan forgivable pours salt in the wound. Take the 1.4 billion and put rooftop solar on thousands of homes. There have been studies that show we don't need Diablo. Do the right thing and close Diablo.
