Please keep Diablo Canyon Open!

Hello and thanks for your attention to this---We all need the reactors at Diablo Canyon to keep running because we need the clean energy it makes, and we know renewables and storage can't actually replace the work it does for us all. To believe otherwise at this stage is to deny the actual facts of the matter, and to take the wrong side of history. If we take the long view, the growing energy and climate crises are the biggest social justice problems we have. We all need to have the courage to reckon with reality, and commit to maintaining and expanding nuclear power capacity around the world. We can't anymore follow the lead of the fantasists who deny the laws of physics when they insist renewables alone can replace fossil fuels and provide enough energy for a just transition. This is a national and global problem, and not just one for CA to handle alone.
