## **Diablo Canyon must not be decommissioned, for the sake of our future**

As an 18 year old university student in the United States, I urge everyone to see the power of nuclear, its potential to help advance humanity, and its importance in our current and future energy systems. Nuclear energy is a world changing technology with many advantages over other current energy sources. To decommission Diablo Canyon would be a huge loss for our country and not only my generation, but the next many.
