## **Nuclear is the most expensive and dangerous energy source**

Nuclear energy is the most expensive and dangerous form of energy. There is no safe solution for nuclear waste and it proposes dangerous potential outcomes. Nuclear disasters are serious and should be avoided at all costs. Also nuclear reactors are prohibitively expensive to build and no one wants them near their neighborhoods (NIMBY). Nuclear waste remains radioactive for 240,000 years. Most reactors are in or near neighborhoods of BIPOC communities. I think these are more than enough reasons to reconsider nuclear.
