

DOCKETED	
Docket Number:	21-ESR-01
Project Title:	Energy System Reliability
TN #:	245033
Document Title:	Gary L. Hoe Comments - Save the Diablo Canyon Nuclear Power Plant
Description:	N/A
Filer:	System
Organization:	Gary L. Hoe
Submitter Role:	Public
Submission Date:	8/15/2022 9:31:48 AM
Docketed Date:	8/15/2022

Comment Received From: Gary L. Hoe
Submitted On: 8/15/2022
Docket Number: 21-ESR-01

Save the Diablo Canyon Nuclear Power Plant

Additional submitted attachment is included below.

Please keep this power plant running, and allow older fossil plants to replace their fossil boilers with a small modular reactor and continue to run the generator and switchyard. Nuclear power is the only source of power that is available 24/7/365 in all weather and not subject to nightfall, or drought, or loss of wind. Those who worry about spent nuclear fuel are ignorant of the facts. The spent fuel is the same volume coming out of the reactor as it was going in, and safely ensconced in metal rods. It does not spread through the air or water or any other way. Their claim is it radioactive - true, but so are you, so am I, so are bananas - but spent fuel is *dangerous* for only about a year, and we know what to do with it. I am a licensed engineer with 30 years' experience in nuclear weapons, nuclear effects testing, nuclear reactor operations, and nuclear medical isotope fabrication. I know whereof I write. Please keep this NPP operating as long as possible. Gary L. Hoe, PE; retired CMRP, PMP, and some more certifications
