CLOSE Diablo Canyon as scheduled!

The California legislature voted to close Diablo Canyon by 2025. We don't want a Fukushima on the California coast, but Diablo Canyon is on and adjacent to multiple earthquake faults, it is old, , its cooling system is out of date and unlawful, and we must NOT accumulate even more toxic radioactive waste to leave to future generations. The cost of Newsom's and the nuclear industry's desire to extend the life of this aged-out plant would be outrageous and much more reenergysponsibly and safely used to subsidize rooftop solar for middle and low-income homeowners up and down the state.
