Close Diablo Canyon by 2025

I hope you do not interfere with plans to decommission the Diablo Canyon Nuclear Power Plant. The money to upgrade it for more more years of power generation be will better spent building electrical power storage from solar energy in the daytime for use in the evenings. Plans for a fossil-fuel-free California is moving along without dependence on nuclear power. Let's move away from the chance of an earthquake disaster from the Hosgri fault below Diablo Canyon and a bigger problem of what to do with the plant's nuclear waste.
