## **Do NOT reconsider shutting down the Diablo Canyon nuclear facility**

First, nuclear power plants are always an accident away from exposing creatures, including radiation-sensitive humans from dangerous radiation. Second, the problem of the disposal of nuclear waste has not been solved. Third, the risk from bombing, as we see in Ukraine and from terrorists. Fourth, the plants are not efficient. Fifth, you have already spent money on making the decision to shut down the plant, and it will cost billions to put online. Compared to sustainable, diverse sources of energy nuclear power fails miserably. It is a no brainer. You must shut down the Diablo Canyon Nuclear facility. Not to shut it down would be a disaster, literally and figuratively.
