Nuclear is Not a Sustainable Solution

There has been a lot of research that shows Diablo Canyon does is not a cost-effective option for what it would take to keep it running. Nuclear is also not a sustainable form of power and will not be a responsible longterm choice. While I commend the desire to reduce our reliance on carbon emitting power sources, we need to make truly renewable energy our goal. I urge you to close Diablo Canyon and keep it that, to use our state resources to invest in sustainable infrastructure, and to continue to be a leader on climate action.
