## **Close Diablo Canyon Nuclear Power Plant**

The Diablo Nuclear Power Plant must be shut down in 2025 as planned. It has always been and still is a very dangerous facility. Keeping the plant running after 2025 would be a risky move for CA and for the planet. Sea rise, earthquakes and incompetence are just a few of the many dangers we all face with that plant in operation. We do not need it to fulfill our energy needs as some are telling us.

I urge you to stay with the plan to close that very dangerous facility.

Sincerely,  
Meave O'Connor  
Berkeley, CA
