Have been told "error" submitting: Close Diablo Nuclear Power Plant ASAP  
I'm fairly old. Some of you are older, some young. Young and old, folks I know all over the country feel their future is doomed by this caving to the nuclear power industry. Right now in Europe, hot water used to cool nuclear plants is being released into already dried-up rivers and creating more intense heat and drying up water. There are ways to organize this planet that don't require destroying it. I come from an area where nuclear waste and uranium mining killed and critically sickened thousands of people.

Will you personally stand to stop this madness now?
