Docketed Date:	9/27/2016

September 26, 2016

To whom it may concern:

The National Lighting Contractors Association of America (NLCAA) has been a great resource for Helix Electric in the support of Title 24 laws and regulations on our projects.

Helix Electric has just started using the NLCAA's web based process to perform our Title 24 Acceptance Testing. This platform allows us to save time, labor and resources. Over the past years we have availed ourselves of the rigorous and comprehensive training programs that the NLCAA offers. These courses help both our electricians and our company representatives understand and complete at Title 24 inspection with confidence. We are especially impressed with the extensive "hands-on" and regulatory training provided during these courses.

We very much appreciate the expertise of the NLCAA support staff and the extensive resources that are provided upon their website. They have provided immeasurable assistance to our company over the years.

I recommend the NLCAA has a reliable source to perform and train personal in the testing and maintain of the California Title 24 code. NLCAA web based system is a vital part of Helix Electric's ability to successfully design, build and close out projects under the Title 24 guidelines.

A handwritten signature in black ink, appearing to read 'Jamie Leitch', is written over the end of the previous paragraph.

Jamie Leitch
