Close Diablo Canyon Permanently Now

Pease vote to permanently and immediately close Diablo Canyon Nuclear Power Plant. Money has already been sent toward its closure and this money would be completely wasted if there is now a decision to keep it operating. It sits in a terribly dangerous location, adjacent of active earthquake faults. As the climate crisis grows worse, it will be subject to increasing risk of extreme weather. It will need costly (and perhaps ineffective) repairs in order to continue operating it and staff will also need to be paid to operate it. This is a total waste of money. There is no safe, long term solution for the disposal of waste from nuclear reactors and keeping it open will just add to the total amount of dangerous nuclear waste generated by it. Money needs to be spent on moving to green, renewable energy as fast as possible, not squandered on a dangerous nuclear plant. Please vote to complete the closure of Diablo Canyon, put it out of its misery and eliminate the fear of a terrible accident that so many of us have lived with for decades.
