Shut down Diablo Canyon ASAP - no more delays!

I vehemently oppose the proposed extended operation of Diablo Canyon.

There is a settlement agreement endorsed by the California legislature in 2018 regarding retiring the Diablo Canyon Nuclear Power Plant in 2025 and we should adhere to that.

Aside from violation of the closure agreement, there are a many, many unresolved serious issues with extending the plant's life further: its seismic vulnerability, unlawful cooling system, storage of even MORE high-level radioactive waste, and notably, the prohibitive cost of this attempt to resurrect the plant.

I especially object to the proposed "forgivable" \$1.4 billion loan to keep this dangerous plant open.

We are on a track to replace this dangerous plant with renewable energy sources. Let's keep that and avoid contaminating our planet with more radioactive waste!
