Docket Number: 21-ESR-01*

Do not extend the life of Diablo Canyon nuclear generating facility

Do not extend the life of Diablo Canyon nuclear power generating facility. Keep the original agreement. Diablo Canyon is dangerous, and it is unfair to endanger the lives of people who live in the region. The environment will be harmed if there is a nuclear accident.

Nuclear energy is among the dirtiest fuels for generating electricity in existence. The dangers of a nuclear accident, the problems of nuclear waste storage, and the contamination resulting from uranium mining underscore the continuing problems with nuclear energy. The alternative is the expansion of distributed generation of electricity throughout California. Distributed generation needs support, not gutting. Please keep the original agreement and work towards bringing clean, renewable energy to Californians. Nuclear energy is not clean, is not renewable, and is not needed. Please accept these comments as I have just recently found out about the opportunity to write to the California Energy Commission.
