Diablo Canyon Closing

As a homeowner and resident of San Luis Obispo County I want to submit my extreme concern about the proposal to continue operation of Diablo Canyon nuclear reactor for the short or long term. I listened to the entire discussion recently and applaud the presentation of the issues.

However, nothing really addressed the ongoing concerns about continuing and increasing nuclear waste storage, damage to the coastal environment, and long-term safety. We know this is a concern and have known it since the beginning. It is wonderful that the project has safely operated for all these years. But now we must move on to less dangerous methods of energy production and more efficient use of that energy.

Please, consider the future of our children and generations to come. Close Diablo Canyon as planned and use the money that would be needed to invest in keeping it open to generate safer and more sustainable means providing livable wages for local workers and a better future for all.

Thank you.
