## **Concerns about Diablo Canyon**

While nuclear power might seem a better alternative to fossil fuels, it is not a clean and reliable energy source. Since work has gone into shutting down Diablo Canyon, it doesn't make sense to reinvest in bringing it back. Baseload power is inflexible and doesn't allow for responsive storage and shifting demand. With threats like hot weather and earthquake, nuclear power is risky and doesn't even give power in the way we need it. It is also EXPENSIVE. You should redirect funds to less risky and more efficient types of renewables.
