We were promised to decommission Diablo for years to many people and organizations who worked very hard and do not renege on this!

To spend a billion plus on extending what should not be extended is not in California or our climate crisis best interests.

We hear about rooftop solar which is the cheapest, cleanest, safest renewable energy and SOLAR WITH BATTERIES can not only give us the extra energy California needs but will keep multiplying itself thru the natural sun AND has no downsides in terms of risk of nuclear problem. Nuclear uses a lot of water and that is an important consideration for drought stricken California.

That Billion dollars would be well spent to increase rooftop solar for disadvantaged communities who will be the hardest hit in our climate crisis and it will make up for the toxins and chemicals they have had to live with in their disadvantaged communities and where fossil fuels contribute more harm to their communities. Nuclear energy is NOT the way of the future. For real clean energy go renewable... solar and wind..

The reason we were short energy last year is because CAISO SOLD our energy out of state NOT because we did not have enough. Don't let that fool you allow you to justify a really bad decision

And it's important to keep your promises!!
