Please keep Diablo Canyon up and running

Writing to encourage the CA government to keep Diablo Canyon running (and to expand nuclear power in the State). California needs safe, low-carbon, decently priced, baseload electricity. Diablo Canyon provides that, and nuclear power, especially newer reactor designs, could play a huge role in providing Californians with the electricity we need to power electric cars, desalination, and keep the economy humming, while offering the possibility of consistent long-term prices that could help CA lower electricity bills for the majority of the state and help industry.

Thanks.
