## INTRODUCTION AND OVERVIEW

HMH was contracted to complete a survey, assessment and arborist report for trees located within the limit of work illustrated on Exhibit A. The project site encompasses one parcel totaling approximately 5.5 acres. The development on the site is a two story office building and surface parking. The trees are in and around the parking lot and around the perimeter of the building. To the north, south and east are similar office and industrial uses and Bowers Avenue is west of the site. Our scope of services includes locating, measuring DBH, assessing, and photographing the condition of all trees within the limit of work. Disposition and health recommendations are based on current site conditions. Site development/design may affect the preservation suitability.

## METHODOLOGY

Our tree survey work is a deliberate and systematic methodology for cataloging trees on site:

1. Identify each tree species.
2. Note each tree's location on a site map.
3. Measure each trunk circumference at 4.5' above grade per ISA standards.
4. Evaluate the health and structure of each tree using the following numerical standard:
  - 5 - A healthy, vigorous tree, reasonably free of disease, with good structure and form typical of the species.*
  - 4 - A tree with slight decline in vigor, small amount of twig dieback, minor structural defects that could be corrected.*
  - 3 - A tree with moderate vigor, moderate twig and small branch dieback, thinning of crown, poor leaf color, moderate structural defects that may that might be mitigated with care.*
  - 2 - A tree in decline, epicormic growth, extensive dieback of medium to large branches, significant structural defects that cannot be abated.*
  - 1 - A tree in severe decline, dieback of scaffold branches and or trunk, mostly epicormic growth; extensive structural defects that cannot be abated.*
  - 0 - Tree is dead.*

## SUMMARY OF FINDINGS

HMH conducted a tree inventory of 61 trees located within the limit of work outlined in Exhibit A. 48 of the trees inventoried are classified as ordinance-sized trees under the City of San Jose Tree Removal permit. Three tree species make up nearly 65% of the trees located on the site.

An ordinance-size tree is:

Single Trunk - 38 inches or more in circumference at 4 ½ feet above ground; or

Multi-trunk - The combined measurements of each trunk circumference (at 4 ½ feet above ground) add up to 38 inches or more.

Table 1 - Tree Quantity Summary summarizes tree quantities by both species and size. Each species that was inventoried as part of this scope is included. This is a useful tool for analyzing the mixture of trees as part of the project. The size table is useful when calculating mitigation requirements in the case of tree removal as well as aiding in determining tree maturity.

Table 2 - Tree Evaluation Summary lists each tree number, botanical name, common name, DBH, circumference, ordinance trees, health rating, preservation suitability, general notes and observations and recommendations.

## GENERAL OBSERVATIONS AND RECOMMENDATIONS

**Species:** *Eucalyptus Sideroxylon* (Red Ironbark)

**Quantity:** 13

**Observations / Recommendations:**

A very common Eucalyptus species used in commercial landscapes. Has characteristic dark gray bark with a rough texture and red hue. The leaves are bluish gray and elongated almost resembling that of a willow. A very drought tolerant and adaptable tree that can get to a fairly large size in the landscape. With the limited parking lot planting space, they are in moderate condition and have exposed surface roots. They are resilient trees, but heavy excavation or compaction would continue to stress the trees. Their health and structure should be monitored, and steps should be taken to remove weak branches if they arise.

**Species:** *Fraxinus uhdei* (Evergreen Ash)

**Quantity:** 13

**Observations / Recommendations:**

Another common commercial tree, larger in overall size than the Raywood Ash and evergreen, although some may drop their leaves for a few weeks in colder weather. These are very mature specimens in moderate shape with a large spreading habit forming broad canopies. These are also on-site parking lot trees and have limited planting space and have heavy surface roots. This limited area, and the lack of sufficient air and water exchange, has stressed the trees and there is some defoliation and crown die back in many of the trees. They are resilient trees, but heavy excavation or compaction would continue to stress the trees. The ones in good health should maintain current maintenance practices.

**Species:** *Juglans californica* (Black Walnut)

**Quantity:** 2

**Observations / Recommendations:**

The two walnut trees appear to be old orchard trees that the parking lots worked around. They are single trunked trees, but the canopies have grown together to form the appearance of one tree. If one or the other is removed there will be an obvious asymmetry to the one remaining. These trees appeared to be in moderate health and if not disturbed would continue to live out their life span. There is a large turf area next to these trees. Removal of this could cause a quicker decline as a readily source of water and nutrients would be eliminated.

**Species:** *Lagerstroemia indica* (Crape Myrtle)

**Quantity:** 2

**Observations / Recommendations:**

There are two Crape Myrtle trees. A newer tree at the south entry which is in good shape and form for its age and a large multi-stem tree at the west entry that is the focal point of the main entry. This tree is also in good shape and has been maintained over the years to maintain that multi stem structure

**Species:** *Olea europaea* (Olive Tree)

**Quantity:** 5

**Observations / Recommendations:**

The olive trees are in good to moderate shape and have a form and habit typical for this tree. There is some exposed heart wood on a few of these trees but this is typical of an olive tree and they can generally will heal over these areas to prevent pest and decay from forming. These are

also planted in turf so any removal of this would limit water and nutrients and supplemental irrigation may be needed to maintain the vigor of these trees.

**Species:** *Pinus canariensis* (Canary Island Pine)

**Quantity:** 1

**Observations / Recommendations:**

The one Canary Island Pine is along the north property line and is in good to moderate shape. It has a broader canopy that covers a portion of the parking lot. They are resilient trees, but heavy excavation or compaction could add stress to the trees.

**Species:** *Pistacia chinensis* (Chinese Pistache)

**Quantity:** 2

**Observations / Recommendations:**

There are two new Chinese Pistache trees planted on the south property line. Not disturbed they should be a viable specimen for this area.

**Species:** *Platanus x hispanica* (Plane Tree)

**Quantity:** 6

**Observations / Recommendations:**

The Plane trees are planted along the east property line. These trees are in good shape and have good canopy and vigor. Tree 59 is a newer tree and has a slight lean to it. If there is an opportunity to re-stake this tree that would help correct this condition.

**Species:** *Pyrus kawakamii* (Evergreen Pear)

**Quantity:** 3

**Observations / Recommendations:**

A variety of Pear Tree that remains evergreen and has a substantially different form. This tree tends to get larger than *Pyrus calleryana* with a broader branching habit. The bark is also darker and deeply fissured. Trees #39 and #47 have structural defects and this species should be regularly pruned for structural and aesthetic purposes. Fire blight is a common issue for pear trees and more prevalent in *Pyrus kawakamii*, proper maintenance is recommended to control this issue.

**Species:** *Sequoia sempervirens* (Coast Redwood)

**Quantity:** 14

**Observations / Recommendations:**

A large and stately tree that is a staple in the California landscape. Recognized for its characteristic bark as well as its immense height. Although these trees are native to California, they cannot withstand prolonged periods of drought if grown in more inland climates. This is a tree that requires heavy amounts of water during the summer but can supplement lack of water in the soil if fog is present. There are numerous sequoias on sight with most showing signs of decline and stress due to lack of water. Tree #6 is in poor shape and should be removed. All the trees around the building have been pruned up or "loin tailed" which is structurally detrimental for trees as it concentrates the crown weight of the tree in one area. This practice should stop and if the trees conflict with the structure, they should be removed. Tree #55 on the west property line is a very large and fine specimen again probably benefiting from the turf area adjacent to it. Efforts should be made to preserve this tree.

## RECOMMENDATIONS FOR TREE PROTECTION DURING CONSTRUCTION

**Site preparation:** All existing trees shall be fenced off 10' beyond the outside the drip line (foliar spread) of the tree. Alternatively, where this is not feasible, fence to the drip line of the tree. Where fencing is not possible, the trunk shall be protected straw waddle and orange snow fencing. The fence should be a minimum of six feet high, made of pig wire with steel stakes or any material superior in quality, such as cyclone fencing. Tree protection zone sign shall be affixed to fencing at appropriate intervals as determined by the arborist on site. If the fence is within the drip line of the trees, the foliar fringe shall be raised to offset the chance of limb breakage from construction equipment encroaching within the drip line. All contractors, subcontractors and other personnel shall be warned that encroachment within the fenced area is forbidden without the consent of the certified arborist on the job. This includes, but is not limited to, storage of lumber and other materials, disposal of paints, solvents or other noxious materials, parked cars, grading equipment or other heavy equipment. Penalties, based on the cost of remedial repairs and the evaluation guide published by the international society of arboriculture, shall be assessed for damages to the trees. See tree preservation detail for additional information, including tree protection zone sign.

**Grading/excavating:** All grading plans that specify grading within the drip line of any tree, or within the distance from the trunk as outlined in the site preparation section above when said distance is outside the drip line, shall first be reviewed by a certified arborist. Provisions for aeration, drainage, pruning, tunneling beneath roots, root pruning or other necessary actions to protect the trees shall be outlined by an arborist. If trenching is necessary within the area as described above, said trenching shall be undertaken by hand labor and dug directly beneath the trunk of the tree. All roots 2 inches or larger shall be tunneled under and other roots shall be cut smoothly to the trunk side of the trench. The trunk side should be draped immediately with two layers of untreated burlap to a depth of 3 feet from the surface. The burlap shall be soaked nightly and left in place until the trench is back filled to the original level. An arborist shall examine the trench prior to back filling to ascertain the number and size of roots cut, so as to suggest the necessary remedial repairs.

**Remedial repairs:** An arborist shall have the responsibility of observing all ongoing activities that may affect the trees, and prescribing necessary remedial work to ensure the health and stability of the trees. This includes, but is not limited to, all arborist activities brought out in the previous sections. In addition, pruning, as outlined in the "pruning standards" of the western chapter of the International Society of Arboriculture, shall be prescribed as necessary. Fertilizing, aeration, irrigation, pest control and other activities shall be prescribed according to the tree needs, local site requirements, and state agricultural pest control laws. All specifications shall be in writing. For pest control operations, consult the local county agricultural commissioner's office for individuals licensed as pest control advisors or pest control operators.

**Final inspection:** Upon completion of the project, the arborist shall review all work undertaken that may impact the existing trees. Special attention shall be given to cuts and fills, compacting, drainage, pruning and future remedial work. An arborist should submit a final report in writing outlining the ongoing remedial care following the final inspection.

## MAINTENANCE RECOMMENDATIONS FOR TREES TO REMAIN

Regular maintenance, designed to promote plant health and vigor, ensures longevity of existing trees. Regular inspections and the necessary follow-up care of mulching, fertilizing, and pruning, can detect problems and correct them before they become damaging or fatal.

**Tree Inspection:** Regular inspections of mature trees at least once a year can prevent or reduce the severity of future disease, insect, and environmental problems. During tree inspection, four characteristics of tree vigor should be examined: new leaves or buds, leaf size, twig growth, and absence of crown dieback (gradual death of the upper part of the tree). A reduction in the extension of shoots (new growing parts), such as buds or new leaves, is a fairly reliable cue that the tree's health has recently changed. Growth of the shoots over the past three years may be compared to determine whether there is a reduction in the tree's typical growth pattern. Further signs of poor tree health are trunk decay, crown dieback, or both. These symptoms often indicate problems that began several years before. Loose bark or deformed growths, such as trunk conks (mushrooms), are common signs of stem decay. Any abnormalities found during these inspections, including insect activity and spotted, deformed, discolored, or dead leaves and twigs, should be noted and observed closely.

**Mulching:** Mulch, or decomposed organic material, placed over the root zone of a tree reduces environmental stress by providing a root environment that is cooler and contains more moisture than the surrounding soil. Mulch can also prevent mechanical damage by keeping machines such as lawn mowers and string trimmers away from the tree's base. Furthermore, mulch reduces competition from surrounding weeds and turf. To be most effective, mulch should be placed 2 to 4 inches deep and cover the entire root system, which may be as far as 2 or 3 times the diameter of the branch spread of the tree. If the area and activities happening around the tree do not permit the entire area to be mulched, it is recommended that as much of the area under the drip line of the tree is mulched as possible. When placing mulch, care should be taken not to cover the actual trunk of the tree. This mulch-free area, 1 to 2 inches wide at the base, is sufficient to avoid moist bark conditions and prevent trunk decay. An organic mulch layer 2 to 4 inches deep of loosely packed shredded leaves, pine straw, peat moss, or composted wood chips is adequate. Plastic should not be used as it interferes with the exchange of gases between soil and air, which inhibits root growth. Thicker mulch layers, 5 to 6 inches deep or greater, may also inhibit gas exchange.

**Fertilization:** Trees require certain nutrients (essential elements) to function and grow. Urban landscape trees may be growing in soils that do not contain sufficient available nutrients for satisfactory growth and development. In certain situations, it may be necessary to fertilize to improve plant vigor. Fertilizing a tree can improve growth; however, if fertilizer is not applied wisely, it may not benefit the tree at all and may even adversely affect the tree. Mature trees making satisfactory growth may not require fertilization. When considering supplemental fertilizer, it is important to consider nutrients deficiencies and how and when to amend the deficiencies. Soil conditions, especially pH and organic matter content, vary greatly, making the proper selection and use of fertilizer a somewhat complex process. To that end, it is recommended that the soil be tested for nutrient content. A soil testing laboratory can give advice on application rates, timing, and the best blend of fertilizer for each tree and other landscape plants on site. Mature trees have expansive root systems that extend from 2 to 3 times the size of the leaf canopy. A major portion of actively growing roots is located outside the tree's drip line. Understanding the actual size and extent of a tree's root system before applying fertilizer is paramount to determine quantity, type and rate at which to best apply fertilizer. Always follow manufacturer recommendations for use and application.

**Pruning:** Pruning is often desirable or necessary to remove dead, diseased, or insect-infested branches and to improve tree structure, enhance vigor, or maintain safety. Because each cut has the potential to change the growth of (or cause damage to) a tree, no branch should be removed without reason. Removing foliage from a tree has two distinct effects on growth: (1) it reduces photosynthesis and, (2) it may reduce overall growth. Pruning should always be performed sparingly. Caution must be taken not to over-prune as a tree may not be able to gather and process enough sunlight to survive. Pruning mature trees may require special equipment, training, and experience. Arborists are equipped to provide a variety of services to assist in performing the job safely and reducing risk of personal injury and property damage (See *also ANSI A300 Part 1 Pruning Standards*- <https://www.tcia.org>).

**Removal:** There are circumstances when removal is necessary. An arborist can help decide whether or not a tree should be removed. Professionally trained arborists have the skills and equipment to safely and efficiently remove trees. Removal is recommended when a tree: (1) is dead, dying, or considered irreparably hazardous; (2) is causing an obstruction or is crowding and causing harm to other trees and the situation is impossible to correct through pruning; (3) is to be replaced by a more suitable specimen, and; (4) should be removed to allow for construction. Pruning or removing trees, especially large trees, can be dangerous work. It should be performed only by those trained and equipped to work safely in trees.

## TERMS AND CONDITIONS

The following terms and conditions apply to all oral and written reports and correspondence pertaining to consultations, inspections and activities of HMM.

1. The scope of any report or other correspondence is limited to the trees and conditions specifically mentioned in those reports and correspondence. HMM assumes no liability for the failure of trees or parts of trees, either inspected or otherwise. HMM assumes no responsibility to report on the condition of any tree or landscape feature not specifically requested by the named client.
2. No tree described in this report was climbed, unless otherwise stated. HMM does not take responsibility for any defects, which could have only been discovered by climbing. A full root collar inspection, consisting of excavating the soil around the tree to uncover the root collar and major buttress roots was not performed unless otherwise stated. HMM does not take responsibility for any root defects, which could only have been discovered by such an inspection.
3. HMM shall not be required to provide further documentation, give testimony, be deposed, or attend court by reason of this appraisal or report unless subsequent contractual arrangements are made, including payment of additional fees for such services as described by HMM or in the schedule of fees or contract.
4. HMM guarantees no warranty, either expressed or implied, as to the suitability of the information contained in the reports for any reason. It is the responsibility of the client to determine applicability to his/her case.
5. Any report and the values, observations and recommendations expressed therein represent the professional opinion of HMM, and the fee for services is in no manner contingent upon the reporting of a specified value nor upon any particular finding to be reported.
6. Any photographs, diagrams, graphs, sketches or other graphic material included in any report, being intended solely as visual aids, are not necessarily to scale and should not be construed as engineering reports or surveys, unless otherwise noted in the report. Any reproductions of graphic material or the work produced by other persons, is intended solely for clarification and ease of reference. Inclusion of said information does not constitute a representation by HMM as to the sufficiency or accuracy of that information.
7. Trees can be managed, but they cannot be controlled. To live near trees is to accept some degree of risk. The only way to eliminate all risk associated with trees is to eliminate all trees.

## TABLE 1 - TREE QUANTITY SUMMARY

Tree Quantity by Species		
Species	Quantity	% of Site
Eucalyptus sideroxylon	13	21%
Fraxinus uhdei	13	21%
Juglans californica	2	3%
Lagerstroemia indica	2	3%
Olea europaea	5	8%
Pinus canariensis	1	2%
Pistacia chinensis	2	3%
Pyrus kawakamii	3	5%
Platanus x hispanica	6	10%
Sequoia sempervirens	14	23%
<b>Total Trees</b>	<b>61</b>	<b>100%</b>

## TABLE 2 - TREE EVALUATION SUMMARY

Prepared By: William Sowa ISA Certified Arborist WE-12270A

DBH MEASUREMENT HEIGHT: 54"

Date of Evaluation: 5/26/2021

### Suitability for Preservation is based on the following

Good - Trees with good health and structural stability that have the potential for longevity at the site.

Moderate - Trees in somewhat declining health and/or exhibits structural defects that cannot be abated with treatment. Trees will require more intense management and will have a shorter lifespan than those in the 'Good' category.

Poor - Trees in poor health or with significant structural defects that cannot be mitigated. Tree is expected to decline, regardless of treatment.

### Health Rating

5	A healthy, vigorous tree, reasonably free of disease, with good structure and form typical of the species.
4	A tree with slight decline in vigor, small amount of twig dieback, minor structural defects that could be corrected.
3	A tree with moderate vigor, moderate twig and small branch dieback, thinning of crown, poor leaf color, moderate structural defects that may that might be mitigated with care.
2	A tree in decline, epicormic growth, extensive dieback of medium to large branches, significant structural defects that cannot be abated.
1	A tree in severe decline, dieback of scaffold branches and or trunk, mostly epicormic growth; extensive structural defects that cannot be abated.
0	Tree is dead.

### Abbreviations and Definitions

CD	Codominant branches	Forked branches nearly the same size in diameter, arising from a common junction an lacking a normal branch union.
CDB	Dieback in Crown	Condition where branches in the tree crown die from the tips toward the center.
CR	Crowded	Tree is bounded closely by one or more of the following: structure, tree, Etc.
D	Decline	Tree shows obvious signs of decline, which may be indicative of the presence of multiple biotic and abiotic disorders.
DBH	Diameter at Breast Height	Measurement of tree diameter in inches. Measurement height varies by City and is noted above.
EG	Epicormic Growth	Watersprouting on trunk and main leaders. Typically indicative of tree stress.
EH	Exposed Heartwood	Exposure of the tree's heartwood is typically seen as an open wound that leaves a tree more susceptible to pathogens, disease or infection.
H	Hazardous	A tree that in it's current condition, presents a hazard.
HD	Headed	Poor pruning practice of cutting back branches. Often practiced under utility lines to limit tree height.
IB	Included Bark	Structural defect where bark is included between the branch attachment so the wood can't join. Such defect can have a higher probability of failure.
LC	Low crotch	Multiple central leaders originating below the DBH measurement site.
LN	Leaning Tree	Tree leaning, see notes for severity.
ML	Multiple Leaders	More than one upright primary stem
PT	Phototropism	Tree exhibits phototropic growth habits. Reduced trunk taper, misshapen trunk and canopy growth are examples of this growth habit.
S	Suckers	Shoot arising from the roots.
SD	Structural Defects	Naturally or secondary conditions including cavities, poor branch attachments, cracks, or decayed wood in any part of the tree that may contribute to structural failure.
SE	Severe	Indicates the severity of the following term.
SL	Slight	Indicates the mildness of the following term.
SR	Surface Roots	Roots visible at finished grade.
ST	Stress	Environmental factor inhibiting regular tree growth. Includes drought, salty soils, nitrogen and other nutrient deficiencies in the soil.
WU	Weak Union	Weak union or fork in tree branching structure.
	Ordinance Tree	Ordinance-Size Trees. An ordinance-size tree is: Single Trunk - 38 inches or more in circum-ference at 4 ½ feet above ground; or Multi-trunk - The combined measurements of each trunk circumference (at 4 ½ feet above ground) add up to 38 inches or more.

San Jose, California 95126

**RE: Historical Resource Assessment for the Walsh Bowers Data Center Project, City of Santa Clara, Santa Clara County, California**

Dear Akoni Danielsen,

At your request, PaleoWest, LLC (PaleoWest) completed a historical resource assessment (Project) in support of the Walsh Bowers Data Center Project (Undertaking) in the City of Santa Clara, Santa Clara County, California (Figure 1). The proposed Undertaking would demolish the current two-story building at 2805 Bowers Avenue for the redevelopment of a four-story 244,068 square foot (ft<sup>2</sup>) data center building, utility substation, generator equipment yard (the BBGF), surface parking, landscaping, and a utility pipeline connection (Assessor's Parcel No. [APN] 216-28-063) (Figures 1 and 2). This letter report presents the results of the fieldwork, as well as National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and City of Santa Clara historic resource evaluation. It also provides cultural resource management recommendations for the Undertaking.

## METHODS

PaleoWest completed a site visit on June 22, 2022 to evaluate the existing conditions, historic features, and architectural significance of the property. Additionally, PaleoWest completed archival research on the general history of the area using existing cultural resource reports, aerial photographs, historical topographic maps, the Santa Clara County Assessor's Office, and online repositories. The evaluation of the property was completed by PaleoWest Architectural Historian Andrew Bursan. Results of the record search and consultation with the Native American Heritage Commission (NAHC) are presented in the Walsh Bowers Data Center Records Search Memo (PaleoWest 2022).

## FIELD METHODS AND RESULTS

On June 22, 2022, PaleoWest Archaeologist and Historian Patrick Zingerella completed a reconnaissance survey of the Project area to assess the current condition of the Historic Period building at 2805 Bowers Avenue. The property, including buildings, structures, site features, and contextual views were documented with digital photographs. A description of the current building condition is provided below.

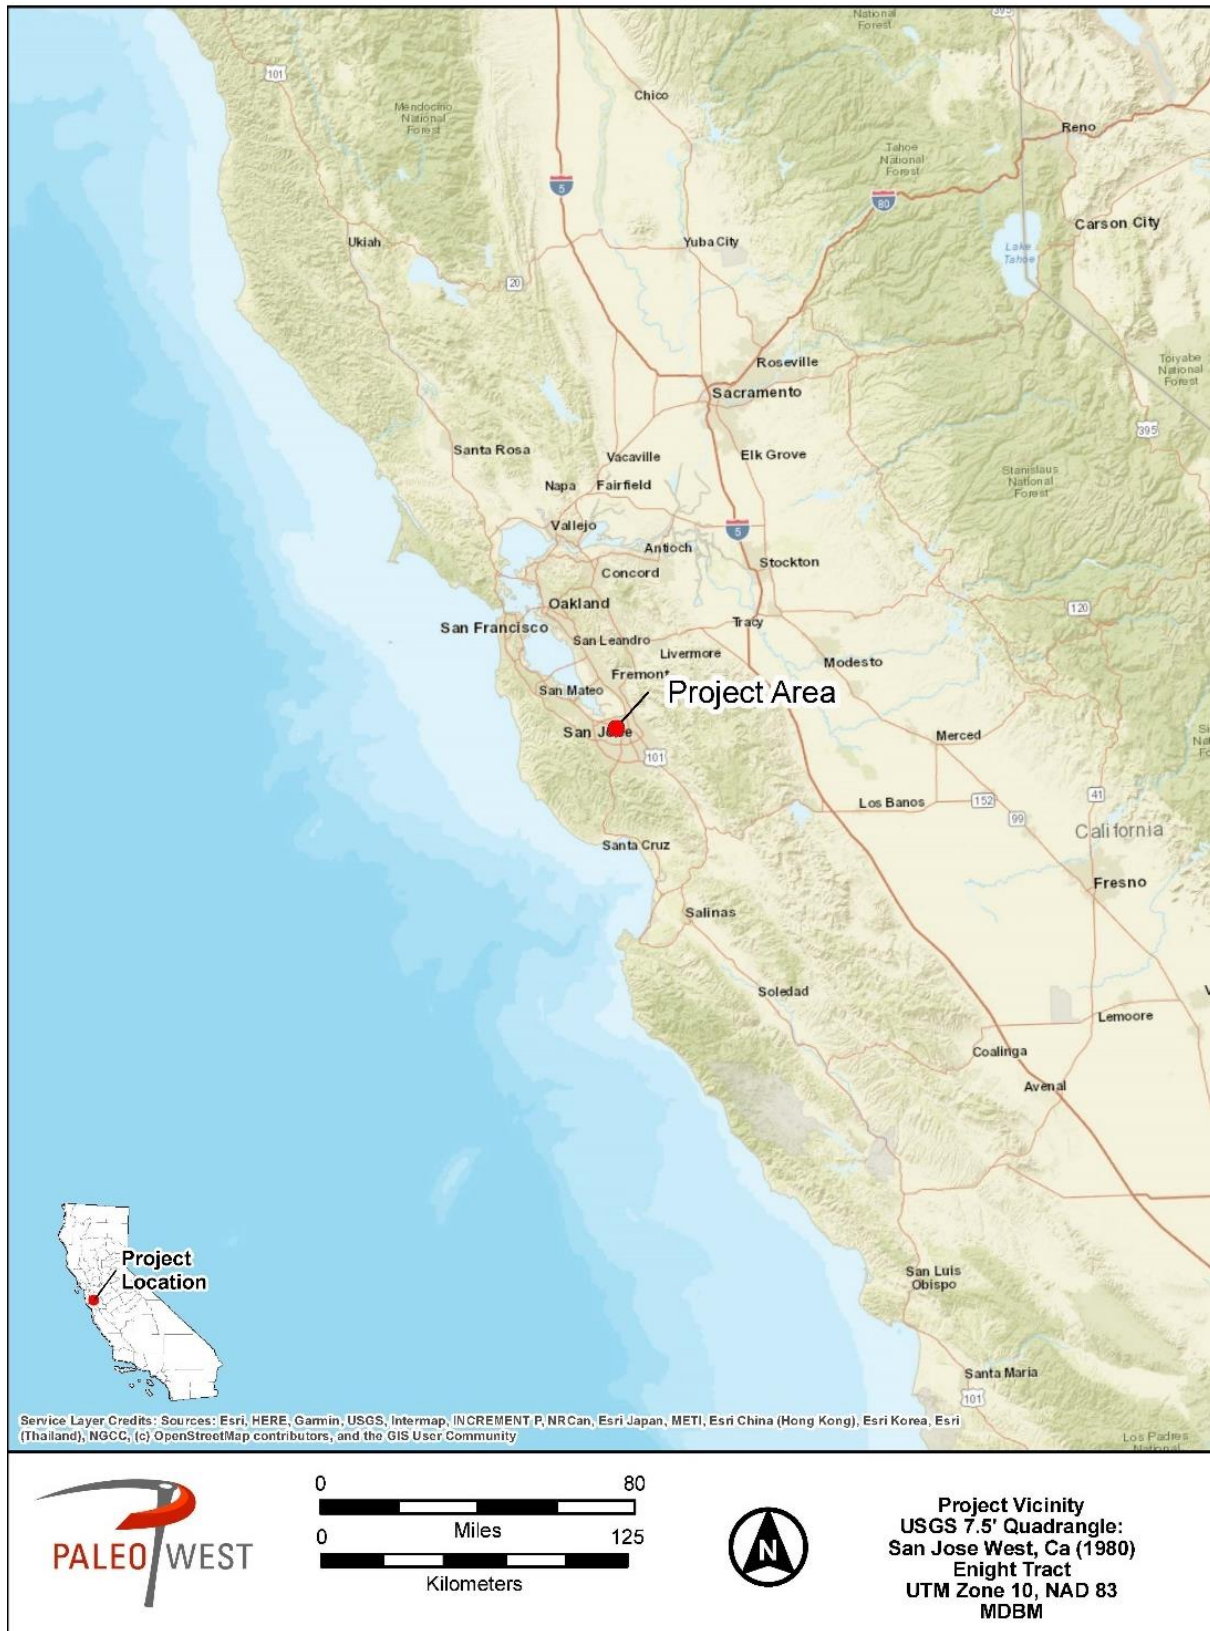

Figure 1. Project vicinity map.

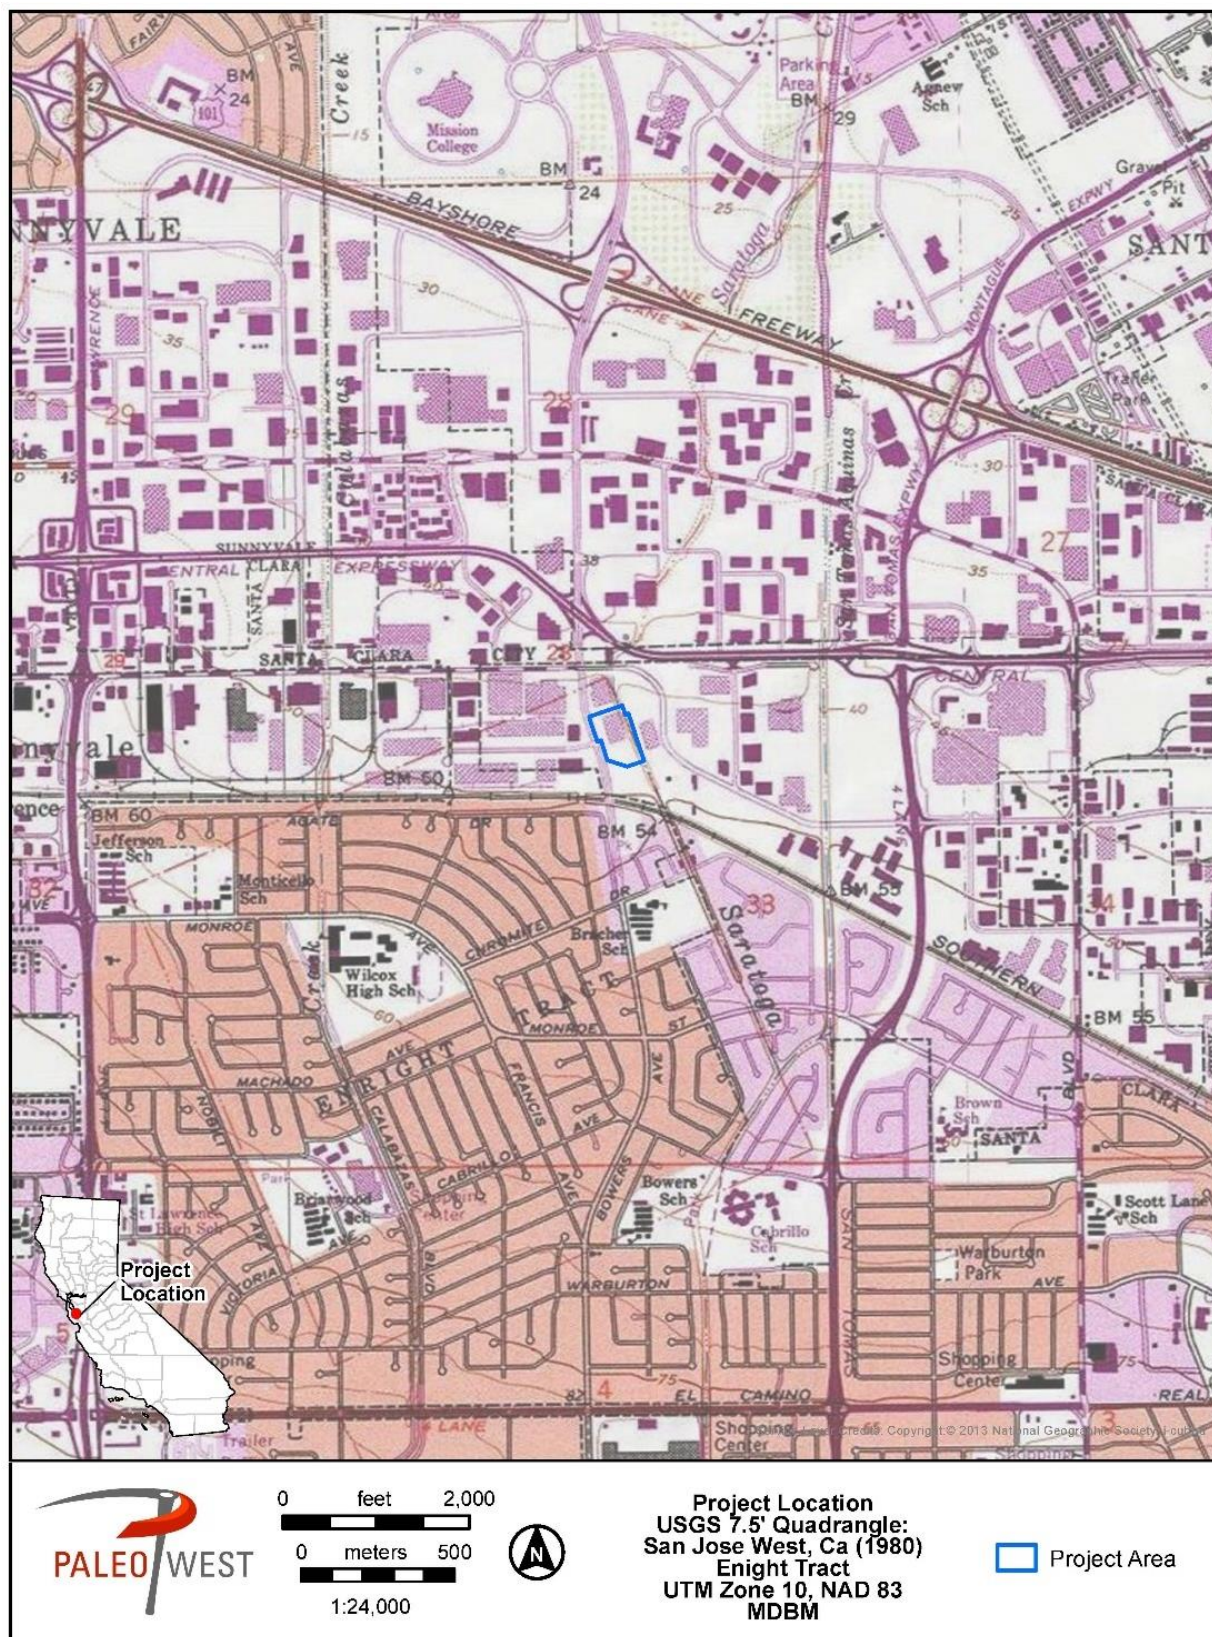

Figure 2. Project location map.

Figure 3. Project site map.

# HISTORIC CONTEXT

## SANTA CLARA VALLEY AND THE CITY OF SANTA CLARA

The Treaty of Guadalupe Hidalgo, which ended the Mexican War of 1846–1847, established California as a U.S. territory in 1848. California did not officially become a state until 1850. As a consequence of the American invasion, population expansion, and the confirmation of Mexican Period property titles in the mid-nineteenth century, the bulk of rancho and pueblo properties, as well as some ungranted land in California were partitioned. The Gold Rush (1848), followed by the building of the transcontinental railroad (1869) and local railroads, fueled growth. Later, in the 1880s, the advent of the refrigerated train car, which was used to carry agricultural products to distant markets, had a significant influence on the Santa Clara Valley. Fruit production became a prominent industry in the late American Period and into the Contemporary Period (ca. 1876–1940s). This dominance of fruit production/processing remained till after WWII. This rural land-use pattern has been increasingly supplanted in recent decades by residential dwellings, commercial hubs, and the expansion of research and development and manufacturing linked with the electronics sector, resulting to the broad region's nickname as "Silicon Valley" (Broek 1932; Hart 1987).

The Project area is in northern part of the City of Santa Clara, which was named after Mission Santa Clara (founded in 1777). William Campbell surveyed the town of Santa Clara in 1847, close to the east side of the Mission, and it was established in 1852. In the 1860s, the town's northwest limit—Lincoln Street at San Francisco Road/El Camino Real—was about two miles from the southeasternmost Project plot (Broek 1932; Hart 1987).

In 1846 and 1847, the first European settlers came. Almost all of the structures had been built for the Mission before to 1846; after 1846, buildings were created by Americans or under American influence, including an adobe tannery in 1849. William Campbell surveyed the secular town of Santa Clara in 1847. The town government was formed and the first legitimately elected authorities took office in 1852, when the town had a population of about 200 people. Incorporation did not occur until 1872. A hotel and 23 pre-fabricated dwellings brought from New England were among the early American Era structures. In addition to Roman Catholic services at the Mission, churches for the Presbyterian, Methodist, and Episcopal religions were erected. Santa Clara College was founded in 1855; California Wesleyan College, later known as the University of Pacific, was founded in 1851; and The Female Institute was founded in 1853. From the 1870s through World War II, the town was a fruit packing hub. The advent and expansion of the railroad, and subsequently the road system, aided the rise of heavy industry. Following World War II, infill developments and tract homes were created in tandem with population growth and geographical expansion. Thus, from 1940 to early 1980s, Santa Clara grew from 8,000 to 88,200 people (Basin Research Associates 2015).

Soon after World War II, Santa Clara County and the City of Santa Clara's business sector initiated an intensive drive to recruit new non-agricultural related companies. Early firms that constructed operations in the Santa Clara Valley included the Accent factory of Chicago's International Mineral and Chemical Corporation, the General Electric plant, and IBM people (Basin Research Associates 2015).

By the 1960s, the electronic and defense sectors became the backbone of Santa Clara's economy. After 1950, the population of the entire Santa Clara Valley increased dramatically due

to the expanding employment market. Residential developments replaced orchards at an astonishing rate between 1950 and 1969. Rural roads were enlarged to become highways, and expressways and boulevards were lined with restaurants and car dealerships. Cities and villages in Santa Clara County grew at an exponential rate along important transportation corridors. Major and minor strip mall retail complexes sprung up around the County to service outlying residential areas, drawing new residential and commercial development (Basin Research Associates 2015).

## SITE HISTORY

Historical maps of the Project area were examined to identify the potential Historic Period (45 years or older) cultural resources in the Project area. The Project area is at 2805 Bowers Avenue in the City of Santa Clara, Township 7 South, Range 1 East (Mount Diablo Base Meridian), as depicted on the San José West, CA U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle map (Figure 2). The Project area is within the historic El Portrero de Santa Clara land grant, which Governor Manuel Micheltorena awarded to James Alexander Forbes in 1844. Sanborn Fire Insurance Maps did not have coverage of this area during any time period (City of South Pasadena 1959, Permit No. 42186) (NETR 2022; UCSB 2022).

A review of historical aerial photographs dating from 1939–2018 was completed as part of the literature review. In 1939, the area in the vicinity of 2805 Bowers Avenue was characterized almost completely by agricultural properties and orchards with some residences on the properties (NETR 2022). Although the agricultural use of the subject property is unclear, orchard properties of varying types are seen just to the west of the parcel. By the 1950s, development of the area had begun to accelerate, and by 1956, single-family residential housing tracts appear a half mile south of the future 2805 Bowers Avenue site, near the east-west oriented Southern Pacific Railroad tracts. Vestiges of agricultural parcels and orchards remained near the Project site until the early 1970s, when the area north of the SP Railroad tracts experienced growth in office and light industrial development (NETR 2022; UCSB 2022).

The current building on the property at 2805 Bowers Avenue was developed in 1974 to house Versatec, a company that built high-speed printers and plotters using an electrostatic writing technique. Five men with experience working in the electrographic division at the Varian Company founded Versatec in 1969 at 10100 Bubb Road in Cupertino. When Versatec moved to the 2805 Bowers Avenue site in early 1975, the company had roughly 220 employees. The 100,000 ft<sup>2</sup> building could house up to 500 employees and construction of the building cost \$4 million (Peninsula Times Tribune 1975). Shortly after moving, the company was acquired by Xerox in late 1975. It appears the company operated at 2805 Bowers Avenue under Xerox until 1990, when the company was dissolved. From 1969–1975, president Renn Zaphiropoulos ran the company before agreeing to sell the company to Xerox (Peninsula Times Tribune 1975). He remained with Xerox as a vice president until his retirement in 1988. It is unclear who occupied the property during the 1990s, but it appears McAfee.com leased the building in the late 1990s and early 2000s. Since the early 2000s, the building has been filled with several small operations and businesses and not a single occupant like Versatec or McAfee.com (The Daily Spectrum 2009).

The building at 2805 Bowers Avenue was designed by R.A. Rotondo Civil and Structural Consulting Engineer based out of San Jose. Research uncovered little about R.A. Rotondo

structural engineer work and it appears the firm's operations may have been short lived and confined to local work in the 1970s. The firm's only other known work includes a small addition to an office structure at 340 Bonair Siding Road in Palo Alto in 1971. Building permit information did not list a contractor for the subject property (City of Santa Clara 1974, Permit No. 43375).

## BUILDING PERMITS AND IDENTIFIED ALTERATIONS

- 1974: Construction of a two-story, 100,000 ft<sup>2</sup> (two connected sections) office building for Versatec (Permit No. 43375)
- 2004: Added four exterior entry doors (Permit No. BLD2004-01286)

Figure 4. 1968 aerial image with the Project area indicated in red three years prior to construction of the subject building (UCSB 1968).

Figure 5. 1980 aerial image with the Project area indicated in red with the subject building its current configuration (UCSB 1980).

## RECORD SEARCH

PaleoWest conducted a record search at the Northwest Information Center (NWIC) on June 27, 2022. The records search included the subject property at 2805 Bowers Avenue and a 0.5-mile (mi) buffer. The records search revealed that no cultural resources were found on the property or within 0.5 mi of the property. Two previous reports were found in the Project area but neither documented the property.

## PROPERTY DESCRIPTION

The building at 2805 Bowers Avenue is a two-story, commercial office building on a rectangular plan with a minor 1970s era Spanish Colonial revival influence. A mansard roof with projecting beams along the parapet and extending clay tile roof elements tops the building. A recessed and centered primary entrance on the west elevation is supported by a large concrete column. Twin sets of concrete steps with centered signage and plantings leads to the two sets of plate glass entry doors. Metal framed window ribbons on the first and second stories flank the main entrance. As the window extend further to the north and south on the primary west elevation the window ribbons continue the first story while arch fixed pane windows sit above the ribbon on the second story (Figure 8). On secondary elevations, the window ribbon continues on the first for story while the arched window repeats on the second story. Window treatments throughout the building are interrupted by symmetrically placed concrete pilaster features that are shaped to project outward and provide sunshade to adjacent windows. Smooth textured stucco clads all exterior surfaces of the building. A long strip of glass lawn and shrubs surrounds the entirety of the building along with a circular parking lot. Strips of lawn and mature trees front the parking on all sides of the property. 2805 Bowers Avenue is in a neighborhood characterized by similar one- and two-story office buildings (Figure 7-8).

# REGULATORY FRAMEWORK

The regulatory background provided below provides an overview of state and local criteria used to assess historic significance.

## FEDERAL

### National Register of Historic Places

Although there is no federal nexus for this Project, the subject properties were evaluated in consideration of NRHP designation criteria. The NRHP is the U.S.'s official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service (NPS), under the U.S. Department of the Interior, the NRHP was authorized under the National Historic Preservation Act, as amended. Its listings encompass all National Historic Landmarks, as well as historic areas administered by the NPS.

NRHP guidelines for the evaluation of historic significance were developed to be flexible and to recognize the accomplishments of all who have made significant contributions to the nation's history and heritage. Its criteria are designed to guide state and local governments, federal agencies, and others in evaluating potential entries in the NRHP. For a property to be listed in or determined eligible for listing, it must be demonstrated to possess integrity and to meet at least one of the following criteria:

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

- A. That are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. That are associated with the lives of persons significant in our past; or
- C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. That have yielded, or may be likely to yield, information important in prehistory or history.

Integrity is defined in NRHP guidance, "How to Apply the National Register Criteria," as "the ability of a property to convey its significance. To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity" (Andrus and Shrimpton 2002). NRHP guidance further asserts that properties be completed at least 50 years ago to be considered for eligibility. Properties completed fewer than 50 years before evaluation must be proven to be "exceptionally important" (criteria consideration to be considered for listing).

# CALIFORNIA REGISTER OF HISTORICAL RESOURCES CRITERIA

The criteria used to establish the significance of a property for listing on the California Register of Historical Resources (CRHR) are as follows:

- A. It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States; or
- B. It is associated with the lives of persons important to local, California, or national history; or
- C. It embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values; or
- D. It has yielded, or is likely to yield, information important to prehistory or history of the local area, California, or the nation.

For a property to qualify under the CRHR's Criteria for Evaluation, it must also retain "historic integrity of those features necessary to convey its significance," (NPS 1997). To determine if a property retains the physical characteristics corresponding to its historic context, the NRHP has identified seven aspects of integrity, which the CRHR closely follows.

- Location: the place where the historic property was constructed or the place where the historic event occurred.
- Design: the combination of elements that create the form, plan, space, structure, and style of a property.
- Setting: the physical environment of a historic property.
- Materials: the physical elements that were combined or deposited during a particular period and in a particular pattern or configuration to form a historic property.
- Workmanship: the physical evidence of the crafts of a particular cultural or people during any given period in history or prehistory.
- Feeling: the property's expression of the aesthetic or historic sense of a particular period.
- Association: the direct link between an important historic event or person and a historic property.

Because integrity is based on a property's significance in a specific historic context, evaluations of integrity can only be completed after historic significance has been established.

## CITY OF SANTA CLARA LANDMARK CRITERIA

### 18.106.040 HRI property designation.

In accordance with the City of Santa Clara's Historic Preservation Ordinance designation criteria for a historic resource (Chapter 18.106.040 of the Municipal Code), a building, structure, object

or site is eligible for inclusion in the Historic Resource Inventory if it meets all of the following designation criteria:

**(a) Designation Criteria.** For purposes of this chapter, a building, structure, object or site is eligible for inclusion in the Historic Resource Inventory if it meets all of the following designation criteria:

1. Age. A building, structure, object, site or district that is fifty (50) years of age or older may qualify as an HRI property if it meets other designation criteria. If a property proposed for inclusion is less than fifty (50) years of age, sufficient time must have passed to obtain a scholarly perspective on the events or individuals associated with the property, and/or the property proposed for inclusion is a distinctive or important example of its type or style; and
2. Retains Historic Integrity. A building, structure, object, site or district must maintain integrity to be considered eligible for listing on the City's inventory as an HRI property. Integrity refers to a resource's ability to convey its significance by the retention of a property's visual and physical characteristics and its surroundings. If a property proposed for inclusion was moved to prevent demolition at its former location, it may still be considered eligible for listing as an HRI property if the new location is compatible with the original character of the property; and
3. The property proposed for inclusion falls within one or more of the following categories, as these terms are defined in Section 8.9.2 of Appendix 8.9 of the General Plan, Criteria for Local Significance:
  - A. Historical or cultural significance;
  - B. Architectural significance;
  - C. Geographic significance;
  - D. Archaeological significance.

**(b) Initiation of Designation.**

1. Designation of a property proposed for inclusion on the City of Santa Clara Historic Resource Inventory may be initiated by any of the following parties:
  - A. Owner(s) of the property proposed for inclusion or authorized representative of the owner(s); or
  - B. Historical and Landmarks Commission; or
  - C. City Council.
2. If designation is initiated by the owner(s), an application for designation shall be made to the Community Development Department through submittal of the prescribed application form accompanied by a nonrefundable filing fee as set forth in the schedule of fees established by resolution of the City Council. The Community Development Department shall establish what supporting documentation shall accompany the application, including, but not limited to, State of California DPR 523 series forms or other historic resource inventory forms as may be approved by the State.

3. At the time of submission of an application for designation, the owner(s) or authorized representative of the owner(s) must provide written consent for the designation process to the City.
4. The application shall indicate the parameters of the property proposed for inclusion, specifying any related structures or landscape that is to be included for consideration and an evaluation of the property's conformance with the applicable criteria.
5. If designation is initiated by the Historical and Landmarks Commission or the City Council, the Community Development Department shall notify the owner(s) of the property by certified mail within ninety (90) days of the initiation and request written consent from the owner. If the owner does not consent to the designation application, the designation procedure shall not proceed.
6. Applications for designation of a property proposed for inclusion on the Historic Resource Inventory shall be agendized for review by the Historical and Landmarks Commission within sixty (60) days from the date the application is deemed complete.

(c) **Approval of Permits when Designation is Pending.** Except as provided in SCCC 18.106.080 (Unsafe or dangerous conditions), no building permit, demolition permit or other permit that would result in a major alteration of the property shall be issued for any property when a Historic Resource Inventory designation application has been initiated with the Community Development Department as set forth in subsection (b) of this section (Initiation of Designation) until all hearings on the matter are concluded. Minor alterations and small projects may still be approved.

**(d) Historical and Landmarks Commission Public Hearing.**

1. The HLC shall conduct a public hearing on the application for designation in a timely manner.
2. Notice of the public hearing shall be provided pursuant to SCCC 18.112.060 (Notice of Public Hearing).
3. A staff report, including the supporting documentation as described in subsection (b) of this section (Initiation of Designation) concerning the property proposed for inclusion shall be provided to the HLC. The report shall address the significance and integrity of the property proposed for inclusion as it relates to the designation criteria, provide other relevant information, and include a recommendation concerning the application and the basis therefor.
4. The HLC shall consider any evidence or input offered at the hearing. The HLC shall recommend to the City Council approval, modification or denial of the designation proposal.

(e) **City Council Action.** Following the Historical and Landmarks Commission action, the City Council shall take action on the request by resolution or other means determining whether the subject property is eligible for inclusion on the Historic Resource Inventory.

(f) Notice of Designation. Following action by the City Council, a copy of the findings shall be sent by first class mail to the owner(s) of the newly designated HRI property, and a notice of the designation, along with a legal description of the property, shall be recorded in the records of the County Recorder. Failure to record with the County Recorder shall not invalidate a designation or any of the requirements of this chapter.

(g) Designation Repeal or Amendment.

1. Designation may be repealed or amended in the same manner and procedure as was followed in subsection (b) of this section (Initiation of Designation) et seq. This action shall result from new information, the discovery of earlier misinformation or change of original circumstances, conditions or factors that justified the designation.
2. If a repeal is approved by the Council, a notice shall be sent to the same persons and manner set forth in subsection (f) of this section (Notice of Designation). (Ord. 1972 § 1, 11-21-17).

## SIGNIFICANCE EVALUATION

### CURRENT HISTORIC STATUS

PaleoWest recommends the building not eligible for listing in the NRHP, CRHR, or as a City of Santa Clara Cultural Resource.

### NRHP AND CRHR EVALUATION

*Criterion A/1: Associated with events that have made a significant contribution to the broad patterns of our history.*

The building at 2805 Bowers Avenue was originally developed in 1974 for Versatec, a growing electronic printer company of roughly 220 employees. The building is associated with 1970s era electronics and technology growth in the Santa Clara Valley and appears to have operated at the site until 1990. Although Versatec had a 15 year stay in the building, the company was one of many similar business technology related companies in the Silicon Valley during the 1970s and 1980s. The company was technically a subsidiary of Xerox by 1975 and there is no evidence the Versatec represented a significant Silicon Valley company either as an independent company or as a part of Xerox. McAfee.com appears to have operated in the building in the late 1990s and early 2000s but this appears to have been one of several branch offices for the company. Since then, the building has been occupied by smaller business operations. Research also did not suggest the property is associated with more specific events or patterns of events that have historical significance in Santa Clara. For these reasons, 2805 Bowers Avenue does not appear significant under NRHP Criterion A and CRHR Criterion 1.

*Criterion B/2: Associated with the lives of persons significant in our past.*

To be eligible under NRHP Criterion B and CRHR Criterion 2, 2805 Bowers Avenue would need to be directly associated with a person considered historically significant at the local, state, or

national level. Archival research failed to indicate any such direct association between individuals that are known to be historic figures at the national, state, or local level and 2805 Bowers Avenue. While president Renn Zaphiropoulos ran the company Versatec from 1969 until it was acquired by Xerox in 1975 and was a respected businessman in the Silicon Valley, his association with the subject building was short. No additional individuals associated with the property were uncovered throughout the course of the research. As a result, archival research failed to indicate any associations with persons significant to our past. For these reasons, 2805 Bowers Avenue is recommended not eligible under NRHP Criterion B and CRHR Criterion 2.

Criterion C/3: *Embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.*

The building at 2805 Bowers Avenue was a two-story office building constructed in 1974 with a very slight nod to 1970s era Spanish Colonial Revival style. Although the building exhibits good integrity, it is a modest example of the style with a simple rectangular plan. The subject property does not possess sufficient distinctive characteristics to be considered a significant and representative example of the Spanish Colonial Revival style. The modest building lacks several character-defining features of the style, such as arched wood entrance doors, tower features, tile work, wrought iron balconies, low relief work, elaborate door surrounds, an irregular plan, and multiple-roof planes. Better examples of Spanish Colonial style commercial buildings from the 1950s with more intact character-defining features can be found throughout downtown and greater Santa Clara County. With the absence of character-defining features, the property does not convey significance as an example of the Mid-Century Modern Style in a commercial building. For these reasons, 2805 Bowers Avenue does not appear to meet NRHP Criterion C and CRHR Criteria 3.

Criterion D/4: *Yielded, or may be likely to yield, information important in prehistory or history.*

The property is not significant under Criterion D of the NRHP or Criterion 4 of the CRHR as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies.

## Integrity Discussion

National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation states that the integrity of a property is based upon the historical significance and character-defining features of that property, and that “only after significance is fully established can you proceed to the issue of integrity” (NPS 1997, p. 45).

To be eligible for listing in the National Register or California Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the length of the historic associations usually

measures the period of significance. As the building at 2805 Bowers Avenue is not significant under any criteria, it does not have a period of significance and the integrity of the structure does not require examination.

## CITY OF SANTA CLARA SIGNIFICANCE EVALUATION:

### Criterion for Historical or Cultural Significance

1. The site, building or property has character, interest, integrity and reflects the heritage and cultural development of the city, region, state, or nation.  
**2805 Bowers Avenue, constructed in 1974 as an office building, reflects the 1970s era electronics and technology growth in the Santa Clara Valley's Silicon Valley. However, the property does not reflect the development of the City of Santa Clara as a whole.**
2. The property is associated with a historical event.  
**Research has not indicated the property is associated with a particular historical event.**
3. The property is associated with an important individual or group who contributed in a significant way to the political, social and/or cultural life of the community.  
**No persons or groups of significance are associated with the property.**
4. The property is associated with a significant industrial, institutional, commercial, agricultural, or transportation activity.  
**The property is only loosely associated with the commercial development in Santa Clara; it does not relate to the commercial development of the city as a whole.**
5. A building's direct association with broad patterns of local area history, including development and settlement patterns, early or important transportation routes or social, political, or economic trends and activities. Included is the recognition of urban street pattern and infrastructure.  
**This property is not associated with development patterns of the City of Santa Clara in an individually significant way.**
6. A notable historical relationship between a site, building, or property's site and its immediate environment, including original native trees, topographical features, outbuildings or agricultural setting.  
**This property lacks a historical relationship with its immediate environment.**

The property at 2805 Bowers Avenue does not appear eligible for local listing under historical or cultural significance.

### Criterion for Architectural Significance

To be architecturally significant, a property must meet at least one of the following criteria:

1. The property characterizes an architectural style associated with a particular era and/or ethnic group.  
**The design of the office building on this parcel was influenced by the Spanish**

Colonial Revival architectural styles; however, the building is not an exemplary representative of this style.

2. The property is identified with a particular architect, master builder or craftsman.  
**No design professionals are associated with the property.**
3. The property is architecturally unique or innovative.  
**The structure on the subject parcel does not appear to be architecturally unique or innovative.**
4. The property has a strong or unique relationship to other areas potentially eligible for preservation because of architectural significance.  
**The property does not appear to have any relationship to other potentially eligible areas.**
5. The property has a visual symbolic meaning or appeal for the community.  
**The property does not appear to have any visual symbolic meaning or appeal for the community.**
6. A building's unique or uncommon building materials, or its historically early or innovative method of construction or assembly.  
**The building appears to have been of common construction and materials and are not unique or innovative in construction or assembly for their time.**
7. A building's notable or special attributes of an aesthetic or functional nature. These may include massing, proportion, materials, details, fenestration, ornamentation, artwork or functional layout.  
**The property is ordinary with no notable or special attributes.**

The property at 2805 Bowers Avenue does not appear eligible for listing for architectural significance.

## Criterion for Geographic Significance

To be geographically significant, a property must meet at least one of the following criteria:

1. A neighborhood, group or unique area directly associated with broad patterns of local area history.  
**Even though the property is associated with the 1970s era commercial growth in Santa Clara, it is not associated with broad patterns of the local area history in an individually significant way.**
2. A building's continuity and compatibility with adjacent buildings and/or visual contribution to a group of similar buildings.  
**The building at the subject parcel are compatible with the surrounding commercial buildings and landscape; most buildings are similar in scale and material. However, the connection is minimal, and this does not create a significant visual link with the adjacent buildings.**
3. An intact, historical landscape or landscape features associated with an existing building.  
**There are no intact historical landscape features associated with 2805 Bowers Avenue.**

4. A notable use of landscaping design in conjunction with an existing building.  
**2805 Bowers Avenue does not have a notable use of landscape design.**

2805 Bowers Avenue does not appear eligible for listing for geographic significance.

## CONCLUSION

The building at 2805 Bowers Avenue does not meet the NRHP or CRHR significance criteria, or the City of Santa Clara qualification criteria for designation as a Cultural Resource. No additional investigation of this property is recommended during project planning.

It has been a pleasure working with you on this Project. If you have any questions, please do not hesitate to contact the Project Manager at [abursan@paleowest.com](mailto:abursan@paleowest.com).

Sincerely,  
**PALEOWEST**

# Custom Soil Resource Report for **Santa Clara Area, California, Western Part**

# Preface

---

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist ([http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2\\_053951](http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951)).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

# How Soil Surveys Are Made

---

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

## Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

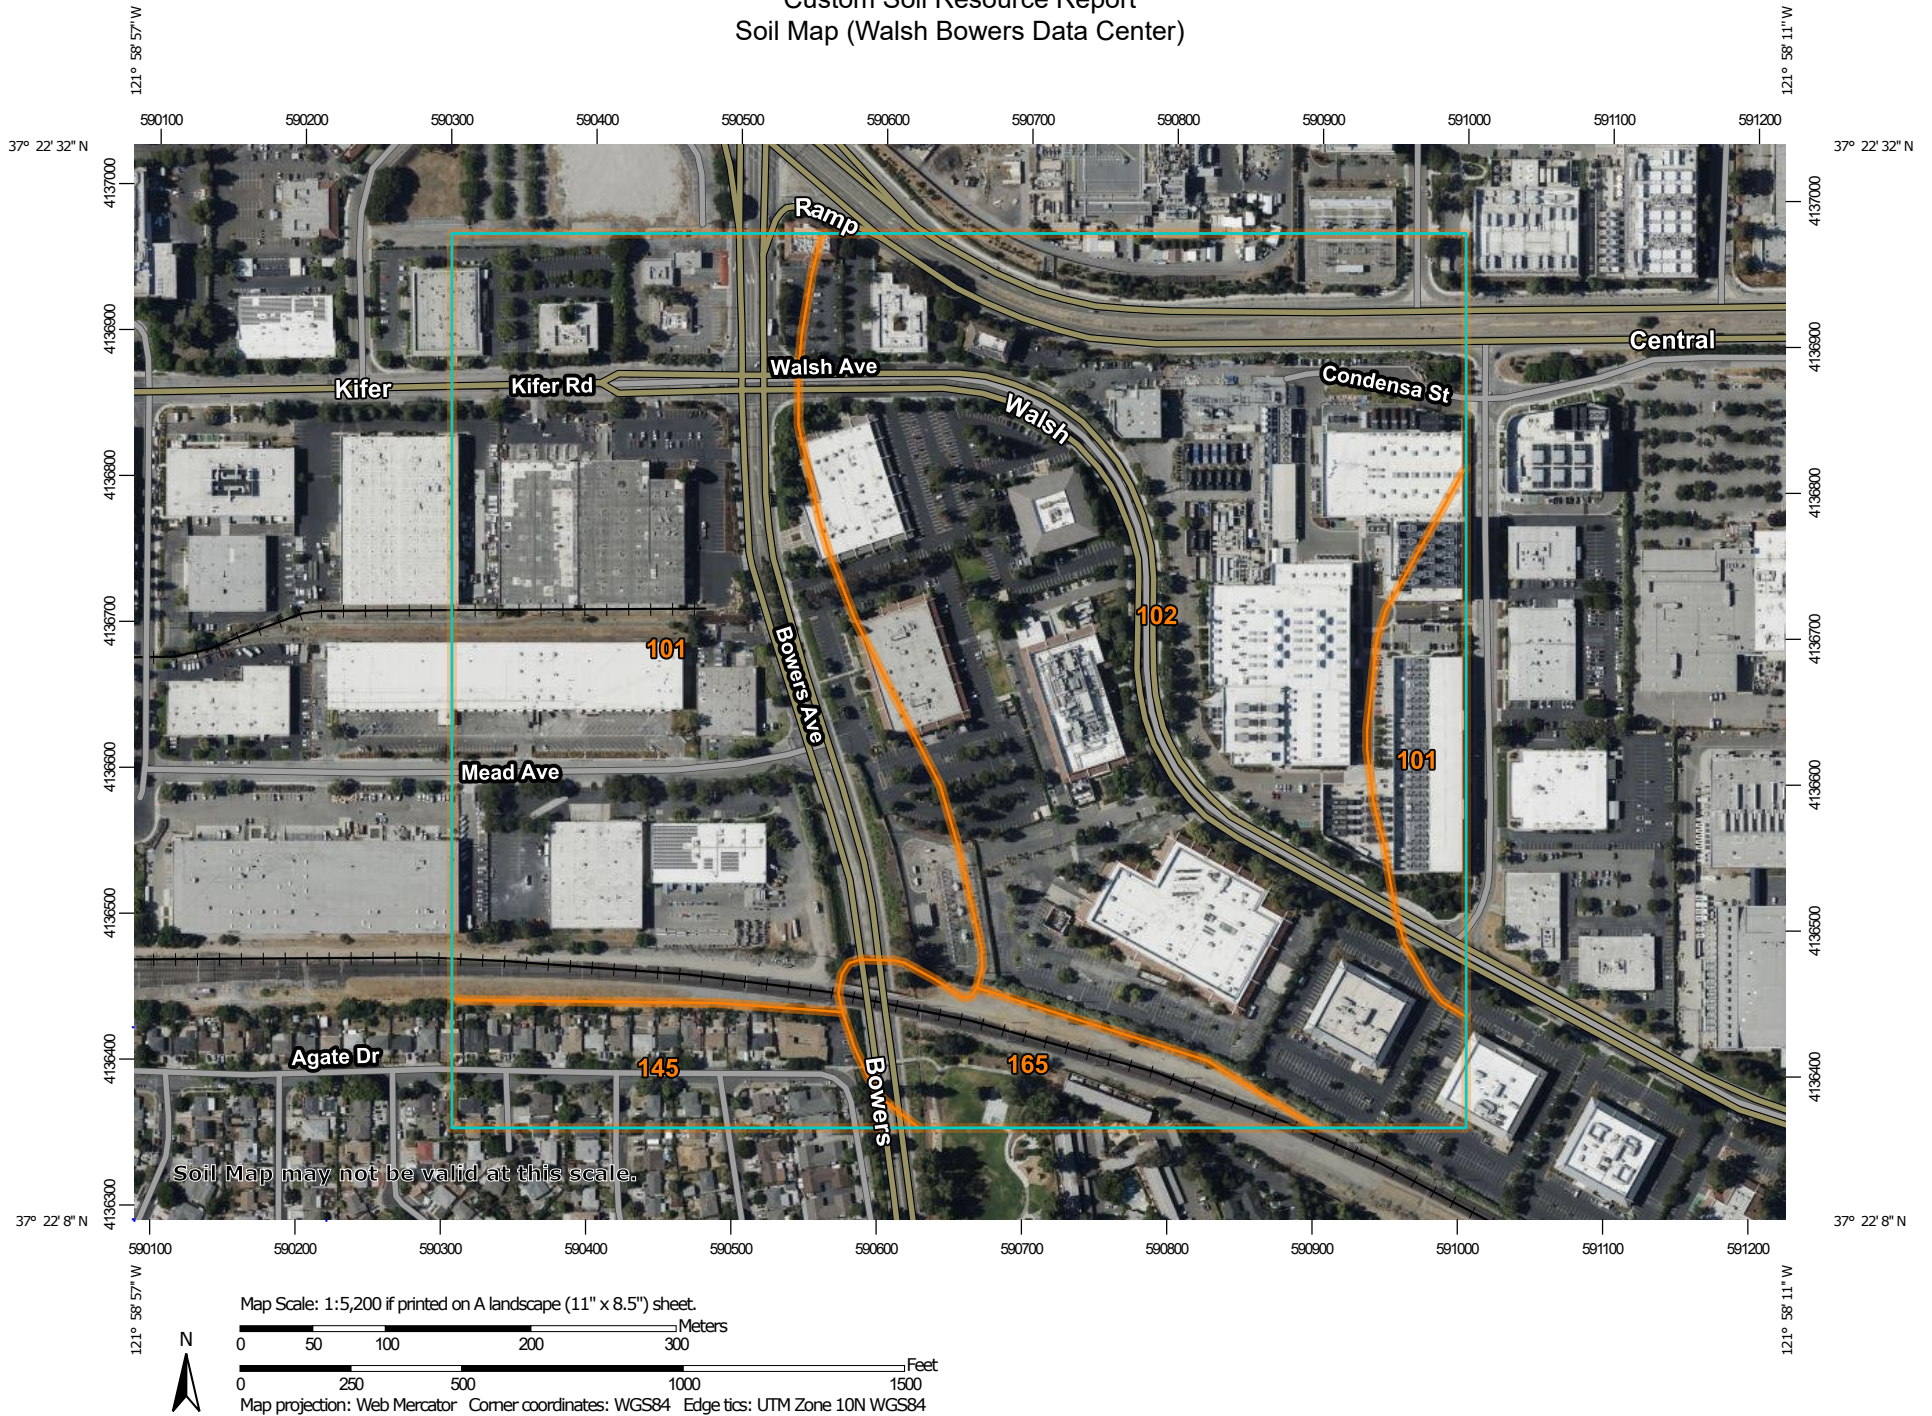

# Soil Map

---

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
Web Soil Survey URL:  
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Santa Clara Area, California, Western Part  
Survey Area Data: Version 10, Sep 9, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 11, 2021—Jun 16, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Descriptions (Walsh Bowers Data Center)

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not

mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

## Santa Clara Area, California, Western Part

### 101—Urban land, 0 to 2 percent slopes, basins

#### Map Unit Setting

*National map unit symbol:* 2I7vl

*Elevation:* 0 to 80 feet

# Soil Information for All Uses

---

## Soil Reports

The Soil Reports section includes various formatted tabular and narrative reports (tables) containing data for each selected soil map unit and each component of each unit. No aggregation of data has occurred as is done in reports in the Soil Properties and Qualities and Suitabilities and Limitations sections.

The reports contain soil interpretive information as well as basic soil properties and qualities. A description of each report (table) is included.

## Soil Physical Properties

This folder contains a collection of tabular reports that present soil physical properties. The reports (tables) include all selected map units and components for each map unit. Soil physical properties are measured or inferred from direct observations in the field or laboratory. Examples of soil physical properties include percent clay, organic matter, saturated hydraulic conductivity, available water capacity, and bulk density.

## Physical Soil Properties (Walsh Bowers Data Center)

This table shows estimates of some physical characteristics and features that affect soil behavior. These estimates are given for the layers of each soil in the survey area. The estimates are based on field observations and on test data for these and similar soils.

*Depth* to the upper and lower boundaries of each layer is indicated.

Particle size is the effective diameter of a soil particle as measured by sedimentation, sieving, or micrometric methods. Particle sizes are expressed as classes with specific effective diameter class limits. The broad classes are sand, silt, and clay, ranging from the larger to the smaller.

*Sand* as a soil separate consists of mineral soil particles that are 0.05 millimeter to 2 millimeters in diameter. In this table, the estimated sand content of each soil layer is given as a percentage, by weight, of the soil material that is less than 2 millimeters in diameter.

*Silt* as a soil separate consists of mineral soil particles that are 0.002 to 0.05 millimeter in diameter. In this table, the estimated silt content of each soil layer is

given as a percentage, by weight, of the soil material that is less than 2 millimeters in diameter.

*Clay* as a soil separate consists of mineral soil particles that are less than 0.002 millimeter in diameter. In this table, the estimated clay content of each soil layer is given as a percentage, by weight, of the soil material that is less than 2 millimeters in diameter.

The content of sand, silt, and clay affects the physical behavior of a soil. Particle size is important for engineering and agronomic interpretations, for determination of soil hydrologic qualities, and for soil classification.

The amount and kind of clay affect the fertility and physical condition of the soil and the ability of the soil to adsorb cations and to retain moisture. They influence shrink-swell potential, saturated hydraulic conductivity (*K<sub>sat</sub>*), plasticity, the ease of soil dispersion, and other soil properties. The amount and kind of clay in a soil also affect tillage and earthmoving operations.

*Moist bulk density* is the weight of soil (ovendry) per unit volume. Volume is measured when the soil is at field moisture capacity, that is, the moisture content at 1/3- or 1/10-bar (33kPa or 10kPa) moisture tension. Weight is determined after the soil is dried at 105 degrees C. In the table, the estimated moist bulk density of each soil horizon is expressed in grams per cubic centimeter of soil material that is less than 2 millimeters in diameter. Bulk density data are used to compute linear extensibility, shrink-swell potential, available water capacity, total pore space, and other soil properties. The moist bulk density of a soil indicates the pore space available for water and roots. Depending on soil texture, a bulk density of more than 1.4 can restrict water storage and root penetration. Moist bulk density is influenced by texture, kind of clay, content of organic matter, and soil structure.

*Saturated hydraulic conductivity (*K<sub>sat</sub>*)* refers to the ease with which pores in a saturated soil transmit water. The estimates in the table are expressed in terms of micrometers per second. They are based on soil characteristics observed in the field, particularly structure, porosity, and texture. Saturated hydraulic conductivity (*K<sub>sat</sub>*) is considered in the design of soil drainage systems and septic tank absorption fields.

*Available water capacity* refers to the quantity of water that the soil is capable of storing for use by plants. The capacity for water storage is given in inches of water per inch of soil for each soil layer. The capacity varies, depending on soil properties that affect retention of water. The most important properties are the content of organic matter, soil texture, bulk density, and soil structure. Available water capacity is an important factor in the choice of plants or crops to be grown and in the design and management of irrigation systems. Available water capacity is not an estimate of the quantity of water actually available to plants at any given time.

*Linear extensibility* refers to the change in length of an unconfined clod as moisture content is decreased from a moist to a dry state. It is an expression of the volume change between the water content of the clod at 1/3- or 1/10-bar tension (33kPa or 10kPa tension) and oven dryness. The volume change is reported in the table as percent change for the whole soil. The amount and type of clay minerals in the soil influence volume change.

Linear extensibility is used to determine the shrink-swell potential of soils. The shrink-swell potential is low if the soil has a linear extensibility of less than 3 percent; moderate if 3 to 6 percent; high if 6 to 9 percent; and very high if more than 9 percent. If the linear extensibility is more than 3, shrinking and swelling can cause

## Custom Soil Resource Report

damage to buildings, roads, and other structures and to plant roots. Special design commonly is needed.

*Organic matter* is the plant and animal residue in the soil at various stages of decomposition. In this table, the estimated content of organic matter is expressed as a percentage, by weight, of the soil material that is less than 2 millimeters in diameter. The content of organic matter in a soil can be maintained by returning crop residue to the soil.

Organic matter has a positive effect on available water capacity, water infiltration, soil organism activity, and tilth. It is a source of nitrogen and other nutrients for crops and soil organisms.

*Erosion factors* are shown in the table as the K factor ( $K_w$  and  $K_f$ ) and the T factor. Erosion factor K indicates the susceptibility of a soil to sheet and rill erosion by water. Factor K is one of six factors used in the Universal Soil Loss Equation (USLE) and the Revised Universal Soil Loss Equation (RUSLE) to predict the average annual rate of soil loss by sheet and rill erosion in tons per acre per year. The estimates are based primarily on percentage of silt, sand, and organic matter and on soil structure and  $K_{sat}$ . Values of K range from 0.02 to 0.69. Other factors being equal, the higher the value, the more susceptible the soil is to sheet and rill erosion by water.

*Erosion factor  $K_w$*  indicates the erodibility of the whole soil. The estimates are modified by the presence of rock fragments.

*Erosion factor  $K_f$*  indicates the erodibility of the fine-earth fraction, or the material less than 2 millimeters in size.

*Erosion factor T* is an estimate of the maximum average annual rate of soil erosion by wind and/or water that can occur without affecting crop productivity over a sustained period. The rate is in tons per acre per year.

*Wind erodibility groups* are made up of soils that have similar properties affecting their susceptibility to wind erosion in cultivated areas. The soils assigned to group 1 are the most susceptible to wind erosion, and those assigned to group 8 are the least susceptible. The groups are described in the "National Soil Survey Handbook."

*Wind erodibility index* is a numerical value indicating the susceptibility of soil to wind erosion, or the tons per acre per year that can be expected to be lost to wind erosion. There is a close correlation between wind erosion and the texture of the surface layer, the size and durability of surface clods, rock fragments, organic matter, and a calcareous reaction. Soil moisture and frozen soil layers also influence wind erosion.

**Subject: Phase I Environmental Site Assessment**  
2805 Bowers Avenue  
Santa Clara, California 95051  
AEI Project No. 433101

Dear Rahul Chandiok:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or [TGolino@aeiconsultants.com](mailto:TGolino@aeiconsultants.com).

Sincerely,  
DRAFT  
Tory Golino  
Vice President  
AEI Consultants

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by GI RE Acquisitions LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2805 Bowers Avenue, Santa Clara, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	2805 Bowers Avenue, Santa Clara, Santa Clara County, California 95051
Property ID (APN or Block/Lot)	216-28-063
Location	East of Bowers Avenue
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	5.12/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1974-1975/Agency records
Building Square Footage (SF)/Source	101,907/Owner or Property Manager
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Five
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	See table below
Current On-site Operations/Use	IT testing and administrative activities
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	HWTS (5), RCRA-SQG, CPS-SLIC, HAZNET (4), CERS, FINDS, ECHO, FTTS, HIST FTTS

### Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
Suites 130 and 230	Colfax International	Offices & IT testing	Yes
Suite 220	Vacant	N/A	Yes
Suites 105 and 205	KeyPoint Credit Union	Offices	Yes

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	n/a
1939-1968	Agricultural land (row crops) and dirt roads with a stream partially on the eastern boundary of the property	Aerial photographs

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1974	Vacant land with a stream partially on the eastern boundary of the property	Aerial photograph
1974-1975	Construction of the current commercial building for industrial use	Agency records
1975-Present	Existing subject property building occupied by: <ul style="list-style-type: none"> <li>• 1975-1992: Versatec/Xerox Engineering Systems (XES)</li> <li>• 1993-1994: Vacant</li> <li>• 1995-2002: National Semiconductors, Network Associates, (formerly Macafi Associates), and ATI Research</li> <li>• 2003: Vacant</li> <li>• 2004-Present: Keypoint Credit Union, Vantage Data Centers, OpenTV-Nagra, Yes Video, Colfax International, ATI Technologies</li> </ul>	Aerial photographs, agency records, previous reports, city directories, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
<b>North</b>	MiraDry, Apple (2845-2855 Bowers Avenue/2790 Walsh Avenue)	RCRA NONGEN / NLR (x3), CERS HAZ WASTE, CERS
<b>Northeast</b>	EAG Laboratories (2710 Walsh Avenue)	RCRA NONGEN / NLR
<b>East</b>	Office Building (2630 Walsh Avenue)	CERS HAZ WASTE, CERS, RCRA-SQG, RCRA-LQG, FINDS, CUPA Listings
<b>South</b>	City of Santa Clara Uranium Substation (APN 216-28-062)	None identified
<b>West</b>	Bowers Avenue followed by:  Interior Door Replacement Company (2800-2810 Bowers Avenue, aka 2800 Mead)  HD Supply Warehouse (2800 Kifer Road, 2880 Bowers Avenue)	CERS HAZ WASTE, CERS, RCRA-SQG, FINDS, ECHO, CUPA Listings, HWTS, HAZNET, RCRA-VSQG (2800 Kifer Road, 2880 Bowers Avenue)  HWTS, RCRA-SQG, FINDS, ECHO, HAZNET (2800-2810 Bowers Avenue)

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

## FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- Based on a review of agency records and city directories, Versatec, a company later associated with Xerox Engineering Systems (XES), occupied the subject property from at least 1975 to 1992. According to a 1993 *Work Plan for Sump Closure Activities* on file with the Santa Clara Fire Department (SCFD), the XES building, referred to as Building 1, was constructed in 1975. The building was part of a former complex of five buildings. The facility was used for the manufacturing of electronic printers and plotters. The facility had been inactive since December 1992, and the building remained vacant. Associated with the building's former printed circuit board lab was a waste treatment area located outside the facility on the southern side of the building. An epoxy seal-coated concrete vault (also referred to as a sump) used for pH neutralization of process liquids was installed at the subject property in 1975. The inside dimensions of the vault were 10 feet by 8 feet by 11 feet deep; the vault walls consisted of 6 inches of concrete. According to a 1985 letter from Versatec to the SCFD, the waste treatment facility was "visually monitored on a daily basis by Versatec employees". Additionally, the piping of the system was noted as single and double walled PVC, and the tank leak detection method was marked as unknown in a 1993 Underground Storage Tank Permit Application filed by XES. The 'tank' was noted to be permanently closed on-site in the 1993 Underground Storage Tank Permit Application. It appears that the references to 'tank' and UST were pertaining to 1,200-gallon container located within the actual 6,000-gallon capacity vault. This is alluded to in a 1985 letter sent to SCFD by Versatec: "Versatec presently has on our premises located at 2805 Bowers a below grade storage container. This is a 1,200 gallon waste treatment storage facility which is encased in an epoxy coated concrete vault...."

The 1993 Work Plan stated that closure sampling of similarly constructed plating lines inside the building indicated non-detectable concentrations of VOCs and low concentrations of the metals copper, lead and nickel. Following further treatment, the process liquids were ultimately discharged under permit to the sanitary sewer. Concurrent with closure of the facility's sump, closure of aboveground hazardous waste areas were to be performed for the facility's hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area. These activities were submitted under a separate closure permit to the SCFD.

The 1993 Work Plan proposed flushing of the underground piping connected to the vault, and placing cement plugs at each end of the pipe runs. The waste treatment vault had an open top with a fitted wood frame cover. At the time, the vault had approximately 2 feet of standing water (presumed to be rain water). A sample of the water was to be collected and analyzed for VOCs and the metals copper, lead and nickel. If sludge or sediment were to be present at the bottom of the vault following removal of the liquids, one sample was to be collected and analyzed for VOCs and the metals copper, lead and nickel. Following removal of the contents, the vault was to be steam cleaned and inspected visually for integrity and any signs of leakage. A maximum of two locations at opposite ends of the vault were to be selected for the collection of underlying soil, which were to be analyzed for VOCs and the metals copper, lead and nickel. The Work Plan noted that during the environmental assessment performed by

McLaren/Hart, groundwater at the site was encountered approximately 13 to 18 feet bgs. If groundwater accumulated in the cored areas, a minimum of one water sample was to be collected for analysis.

According to DTSC HWTS and EDR Radius Map HWTS records, Versatec/XES generated 31.2 tons of hazardous wastes in 1993, likely associated with their facility closure. Notable wastes generated from 1983 to 1993 included 10.3 tons of halogenated solvents, 0.475 tons of other empty containers  $\geq 30$  gallons (listing indicative of possible former ASTs/USTs), metal sludge, organic liquids with metals, oil/water separation sludge, liquids with halogenated compounds  $\geq 1,000$  mg/L, metal dust, tank bottom waste, other still bottom waste, liquids with chromium, liquids with nickel and unspecified sludge waste. A permit for removal of the 6,000 gallon electroplating waste liquids vault was filed by XES in April 1993, and the permit was finalized/granted by the SCFD on June 25, 1993. Additionally, a permit for complete business closure was filed by XES in June 1992, and the permit was finalized/granted by the SCFD on June 25, 1993.

No additional information or sampling data regarding the sump removal or the closure of the remaining facility areas of concern (hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area) was provided by the SCFD. However, it should be noted that due to the time frame of this assessment and the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, the SCFD is temporarily closed to the public for in-person public record reviews and therefore microfiche records on file for the subject property were not available for review. AEI recommends a review of files at this agency when they become available (further discussion in Section 1.5).

While no HMMPs for the subject property were found during AEI's review of SCFD files for the subject property, review of SCFD files for the northern adjoining property at 2710 Walsh Avenue (also part of the Versatec campus) included HMMPs for other Versatec building locations. Those documents included a 1990 Chemical Inventory page for the subject property with a note stating "see 'blue' binders on bottom shelf in facilities department." Therefore based on this note, it appears that the hazardous materials used onsite would have been present in large quantities.

Based on the length of time Versatec/XES occupied the subject property, the documented use of halogenated solvents, and the former site features of concern (hazardous waste sump, hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area), these former operations and associated features may have resulted in a release to the subsurface which represents a REC. Additionally, based on this information, the potential for a related vapor-phase migration concern cannot be ruled out.

- The subject property was identified in the RWQCB GeoTracker database as a closed SLIC release case. Information in the database suggests that both soil and groundwater were impacted by a release at the subject property. Potential contaminants of concern

included 1,1,1-TCA, Freon, Vinyl Chloride, Dichloroethane (DCA) and Dichloroethene (DCE). GeoTracker states that the case was granted closure on December 3, 2015. AEI searched the GeoTracker website for additional information about this release case. As no documents were available for review on the GeoTracker website, AEI contacted that San Francisco Bay RWQCB for additional information. According to an agency representative, no additional information is on-file for this site. AEI also attempted to access Valley Water's (VW) Historical Fuel Leaks & Solvents database to determine if files may exist, however the website is non-operational. AEI submitted a Public Records Request and was provided with a letter from the RWQCB by Lonnie Spin of VW. The letter was dated March 4, 1993 and was addressed to XES Incorporated in regards to the release case, Former XES Site, at 2805 Bowers Avenue. The letter stated: "We have reviewed McLaren/Hart's August 14, 1991, and DECON's January 25, 1993, reports concerning the above site's buildings at 2805 Bowers, 2885 Bowers, 2590 Walsh and 2710 Walsh Avenues. Based on our review of these reports, it does not appear that an on-site pollution source exists associated with these buildings. However, due to the presence of volatile organic chemicals in the groundwater under the site, it is appropriate to continue to monitor the site's three monitoring wells." The RWQCB requested that the wells be sampled semi-annually, and samples be analyzed using EPA Method 8010 (including identification of Freon 113). The specific location of the three monitoring wells was not stated in the letter. VW confirmed that no additional files exist.

As discussed in Section 6.3, a previous Phase I ESA report conducted for the northern and northeastern adjoining properties (Partner, 2017) states that 1995 lease records (reviewed in a 2014 ESA, Blackstone, copies of lease records not appended) associated with the subject property indicated that soil and groundwater at this property were impacted by the former Xerox operations. According to the lease agreement, Xerox performed soil and groundwater remediation at the subject property and was in the process of performing the final stages of groundwater sampling as required by the SFRWQCB. Case closure for the release was reportedly pending at that time [presumably in 1995]. The lease agreement reportedly included indemnification for the lessee of the subject property from liability associated with the soil and groundwater contamination. No additional information on the sampling, remediation, or closure were reportedly available for review in the regulatory records in the previous report.

It should be noted that the 2014 Blackstone ESA apparently reviewed a 2011 ESA by Golder and Associates (GAI). As summarized by Partner in 2017, the 2011 report "...included a review of a San Francisco Regional Water Quality Control Board (SFRWQCB) letter, dated July 17, 1997, from the SFRWQCB regarding the southwest adjoining property at 2805 Bowers Avenue. This letter reportedly indicated that volatile organic compounds (VOCs) were detected in groundwater at the adjoining property [2805 Bowers Avenue], but the contamination did not appear to originate from the adjoining property. No information on concentrations of VOCs in groundwater was reportedly identified in the letter." Blackstone also requested information for the southwest adjoining property [2805 Bowers Avenue] for their 2014 report. The SFRWQCB contacted Blackstone on March 21, 2014, and indicated there were no files pertaining to the SLIC case as many closed RWQCB files pre-dating 2000 were not

transferred to the GeoTracker website for upload and storage, and closed files were frequently discarded. Therefore, Blackstone noted it was likely the SLIC case received case closure prior to 1999, but the closure letter has not been maintained in the records. AEI has encountered this issue before, when a site closed in the 1990s has records that are eventually uploaded to GeoTracker, and the date of GeoTracker document upload is incorrectly cited as the closure date (although the case may have likely been closed many years prior). Based on the apparent 1990s date of case closure, it is presumed that consideration of the potential for vapor migration/intrusion would have not been evaluated.

AEI was provided a copy of E2C's 2003 Phase I ESA conducted for the subject property (Section 6.3). The original occupant of the building was Versatec, which changed its name to Xerox Engineering Systems (XES) in the early 1990s. This occupancy continued through 1992. Since that time tenants included National Semiconductor [according to AEI research this business was a semiconductor manufacturer that occupied the subject property building from 1995 to the early 2000s. DTSC HWTS records indicate that the tenant submitted a waste manifest in 1995, but no information was provided on the manifest.], Network Associates, (formerly Macafi Associates), and ATI Research (all apparent office use according to the consultant). A search of the June 2000 RCRA GNRTR list identified Versatec. No additional information was noted. SCFD records apparently indicated that former tenants generated hazardous wastes. Multiple sampling reports/prior reports were cited in 2003 report, however those were not appended. The consultant states that 1993 closure documents (Smith) presented soil/grab groundwater investigations at the subject property. It was stated that the samples were non-detect for VOCs, metals and Semi-VOCs. Groundwater was sampled annually by Smith from 1991 to 1995 and solvent-contaminated groundwater was detected. The concentrations were stated to be relatively consistent which suggested that may have not been from an on-site source. E2C stated that "additionally, the chemicals detected were not those which were utilized in the former business activities performed at the subject Site." XES was granted facility closure by SCFD in 1993, however the groundwater contamination case was not granted closure until 1997, by the RWQCB. The July 3, 1997 RWQCB NFA Letter for the onsite release case was appended. It states that recent information was provided to the RWQCB by a Xerox representative to support their contention that no further investigation was needed. RWQCB reviewed the information and rescinded their previous requirement for additional required investigation on the site in 1997. No further remedial action was required. It appears the case was in 'inactive' status for some time, until the RWQCB updated their records to mark the case as closed. Two monitoring wells at the site were then subsequently destroyed. AEI confirmed with VW that MW-2 was located on the subject property, MW-3 was located on the eastern adjoining site at 2630 Walsh Avenue and the location of MW-1 is unknown.

Based on the reported subsurface contamination by VOCs including 1,1,1-TCA at the subject property for which no documentation is available, paired with the likelihood for a related vapor-phase migration condition, which was not previously evaluated for, is representative of a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- The subject property was identified in RWQCB GeoTracker database as a closed SLIC release case. Information in the database suggests that both soil and groundwater were impacted by a release at the subject property. Potential contaminants of concern included 1,1,1-TCA, Freon, vinyl chloride, dichloroethane (DCA) and dichloroethene (DCE). GeoTracker states that the case was granted closure on December 3, 2015. AEI searched the GeoTracker website for additional information about this release case. As no documents were available for review on the GeoTracker website, AEI contacted that San Francisco Bay RWQCB for additional information. According to an agency representative, no additional information is on-file for this site. AEI also attempted to access Valley Water's (VW) Historical Fuel Leaks & Solvents database to determine if files may exist. AEI submitted a Public Records Request and was provided with a letter from the RWQCB by Lonnie Spin of VW. The letter was dated March 4, 1993 and was addressed to XES Incorporated in regards to the release case, Former XES Site, at 2805 Bowers Avenue. The letter stated: "We have reviewed McLaren/Hart's August 14, 1991, and DECON's January 25, 1993, reports concerning the above site's buildings at 2805 Bowers, 2885 Bowers, 2590 Walsh and 2710 Walsh Avenues. Based on our review of these reports, it does not appear that an on-site pollution source exists associated with these buildings. However, due to the presence of volatile organic chemicals in the groundwater under the site, it is appropriate to continue to monitor the site's three monitoring wells." The RWQCB requested that the wells be sampled semi-annually, and samples be analyzed using EPA Method 8010 (including identification of Freon 113). The specific location of the three monitoring wells was not stated in the letter, however according to the VW Well Mapper, MW-2 was located on the subject property, MW-3 was located on the eastern adjoining parcel at 2630 Walsh Avenue and the location of MW-1 was not recorded. VW confirmed that no additional files exist. AEI was provided a copy of E2C's 2003 Phase I ESA conducted for the subject property (Section 6.3). The July 3, 1997 RWQCB NFA Letter for the onsite release case was appended. It states that recent information was provided to the RWQCB by a Xerox representative to support their contention that no further investigation was needed. RWQCB reviewed the information and rescinded their previous requirement for additional required investigation on the site in 1997. No further remedial action was required. It appears the case was in 'inactive' status for some time, until the RWQCB updated their records to mark the case as closed. The 2003 report stated that two monitoring wells at the subject property were

then subsequently destroyed. Based on this information, the closed SLIC case represents a HREC. Refer to the REC bullet for further discussion of the potential for a related vapor-phase migration concern.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.
- Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- Due to the age of the subject property building, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- While the discussion of wetlands is not included within the scope of this report, review of the client-provided *Newmark Knight Frank's Property Detail Report* for the subject property indicates onsite Riverine wetlands. AEI accessed the online US Fish & Wildlife Service's National Wetlands Inventory (NWI) Wetlands Mapper, which indicates the eastern side of the subject property is designated as a Riverine Wetland; a NWI map of the subject property

is provided in the appendices of this report. It appears that this area representing a historical stream has since been filled or channelized under the paved parking area/adjoining sites. Therefore this area is not expected to represent a significant environmental concern. However, if future redevelopment in this area is planned, AEI recommends contacting the local planning and/or building departments to determine whether a wetlands delineation report is required and/or if mitigation is required in order to develop in this area.

## **CONCLUSIONS**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 2805 Bowers Avenue, Santa Clara, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

## **1.0 INTRODUCTION**

---

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2805 Bowers Avenue, Santa Clara, Santa Clara County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

### **1.1 SCOPE OF WORK**

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

### **1.2 ADDITIONAL SERVICES**

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

### **1.3 SIGNIFICANT ASSUMPTIONS**

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## 1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

### **1.5 LIMITING CONDITIONS/DEVIATIONS**

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- Due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance.
- On January 14, 2021, the Santa Clara Fire Department, Santa Clara Building Department, and the Santa Clara Planning Department were contacted for information on the subject property. Due to the time frame of this assessment and the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, the agencies are temporarily closed to the public for in-person public record reviews. Hardcopy and microfiche records on file for the subject property were therefore not available to AEI for review. The SCFD is attempting to have the microfiche records digitized for AEI. A cost estimate and turnaround time for the duplication service is pending. Additionally, SCFD indicated that they would have to first preview the copied microfiche files and redact any site plans and any other information they deem to be sensitive. AEI recommends a review of hard copy plans/fire department microfiche files at these agencies when they become available.
- AEI was not granted access to multiple shipping containers that were located in the parking lot. According to Mr. Larry Scofield, the containers are used for general storage. Based on the nature of use, this limitation is not expected to significantly alter the findings of this assessment.

## 1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

### 1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

<b>Data Failure</b>	The earliest historical resource obtained during this assessment was a 1939 aerial photograph indicating that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
<b>Information/Sources Consulted</b>	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous reports, interviews

### 1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

## 1.7 RELIANCE

All reports, both verbal and written, are for the benefit of GI RE Acquisitions LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by GI RE Acquisitions LLC on January 12, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	2805 Bowers Avenue, Santa Clara, Santa Clara County, California 95051
Property ID (APN or Block/Lot)	216-28-063
Location	East of Bowers Avenue
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	5.12/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1974-1975/Agency records
Building Square Footage (SF)/Source	101,907/Owner or Property Manager
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Five
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	See table below
Current On-site Operations/Use	IT testing and administrative activities
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	HWTS (5), RCRA-SQG, CPS-SLIC, HAZNET (4), CERS, FINDS, ECHO, FTTS, HIST FTTS

#### Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
Suites 130 and 230	Colfax International	Offices & IT testing	Yes
Suite 220	Vacant	N/A	Yes
Suites 105 and 205	KeyPoint Credit Union	Offices	Yes

### 2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	Santa Clara Valley Water District
Sewage Disposal/Treatment	City of Santa Clara

Utility source/system information listed in the table above is provided by Mr. Larry Scofield, Key Site Manager, unless otherwise noted above.

## 2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in an industrial and commercial area of Santa Clara, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
<b>North</b>	MiraDry, Apple (2845-2855 Bowers Avenue/2790 Walsh Avenue)	RCRA NONGEN / NLR (x3), CERS HAZ WASTE, CERS
<b>Northeast</b>	EAG Laboratories (2710 Walsh Avenue)	RCRA NONGEN / NLR
<b>East</b>	Office Building (2630 Walsh Avenue)	CERS HAZ WASTE, CERS, RCRA-SQG, RCRA-LQG, FINDS, CUPA Listings
<b>South</b>	City of Santa Clara Uranium Substation (APN 216-28-062)	None identified
<b>West</b>	Bowers Avenue followed by:  Interior Door Replacement Company (2800-2810 Bowers Avenue, aka 2800 Mead)  HD Supply Warehouse (2800 Kifer Road, 2880 Bowers Avenue)	CERS HAZ WASTE, CERS, RCRA-SQG, FINDS, ECHO, CUPA Listings, HWTS, HAZNET, RCRA-VSQG (2800 Kifer Road, 2880 Bowers Avenue)  HWTS, RCRA-SQG, FINDS, ECHO, HAZNET (2800-2810 Bowers Avenue)

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

## 2.4 PHYSICAL SETTING

<b>Geologic Unit: Description/Source</b>	Qac: Silty clay and organic clay  Qya: Alluvial sand, fine grained silt, and clay  Age late Holocene/USGS and United States Department of the Interior
<b>Soil Series: Description/Source</b>	Urban Land: this designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey
<b>Groundwater Flow Direction/Source</b>	North/Groundwater monitoring data for nearby sites, via GeoTracker
<b>Depth to Groundwater/ Source</b>	13-18 feet bgs/onsite sampling conducted by McLaren/Hart, date unknown (as cited in SCFD documentation from 1993)  As shallow at 7 ft bgs for nearby site to the east at 2880 Northwestern Parkway, per GeoTracker (340 feet east)
<b>Surface waters on the subject property or adjoining sites</b>	None
<b>Additional notes</b>	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

### 3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	n/a
1939-1968	Agricultural land (row crops) and dirt roads with a stream partially on the eastern boundary of the property	Aerial photographs
1974	Vacant land with a stream partially on the eastern boundary of the property	Aerial photograph
1974-1975	Construction of the current commercial building for industrial use	Agency records
1975-Present	Existing subject property building occupied by: <ul style="list-style-type: none"><li>• 1975-1992: Versatec/Xerox Engineering Systems (XES)</li><li>• 1993-1994: Vacant</li><li>• 1995-2002: National Semiconductors, Network Associates, (formerly Macafi Associates), and ATI Research</li><li>• 2003: Vacant</li><li>• 2004-Present: Keypoint Credit Union, Vantage Data Centers, OpenTV-Nagra, Yes Video, Colfax International, ATI Technologies</li></ul>	Aerial photographs, agency records, previous reports, city directories, site observation

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.

Since the subject property building was constructed between 1974 and 1975, the subject property has been occupied by various various industrial and commercial occupants. Please refer to Section 6.3 and the Findings for discussion.

If available, copies of historical sources are provided in [Appendix D](#).

### 3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939 1948 1950 1956 1963 1968	Agricultural land (row crops) and dirt roads with a stream partially on the eastern boundary of the property	NORTH: Agricultural land (row crops) NORTHEAST: A small residence, portion of a stream and agricultural land (orchards) EAST: Portion of a stream and agricultural land (orchards) SOUTH: Agricultural land (row crops) WEST: Agricultural land (row crops)
1974	Vacant land with a stream partially on the eastern boundary of the property	NORTH: Vacant land and a stream NORTHEAST: Vacant land and a stream EAST: Vacant land and a stream SOUTH: Vacant land WEST: Road followed by commercial buildings
1982 1993 1998 2006 2009 2012 2016	Developed with the existing structure	NORTH: The existing commercial structure NORTHEAST: The existing commercial structure EAST: The existing commercial structure SOUTH: The existing substation WEST: Road followed by the existing commercial structures

Based on a review of aerial photographs, the subject property appears to have been in agricultural use from at least 1939 to 1968, please refer to Section 3.0 for additional information.

### 3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

### 3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1980. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1980	Headquarters, Purchas sag Manufacturing, VersatecINC
1985	VersatecINC Corporate Headquarters
1986	Research Development & Engineering, VersatecINC
1999	Network Associates Incorporated
2004	Michael Lightstone

Year(s)	Address - Occupant Listed
2009	American Elec Assn Cr Un, ATI Technologies, Keypoint Credit Union, Keypoint CU
2014	Keypoint Credit Union

*If listed above, XXXX indicates that the address is valid but there is no occupancy information available.*

Refer to Sections 4.2 and 4.6 and the Findings for a discussion of previous on-site tenant of concern, Versatec.

### **3.4 HISTORICAL TOPOGRAPHIC MAPS**

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

### **3.5 CHAIN OF TITLE**

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

## 4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### 4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	January 14, 2021	Website	Ms. Anna Cortez	No hazardous substances records on file. It should be noted that in many cases, files are purged after five years.

### 4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara Fire Department (SCFD) - CUPA	January 14, 2021	Website, telephone	Ms. Simrat Dhadli and Ms. Tamra Francis	Hardcopy emailed records discussed below. Microfiche records are pending; refer to Section 1.5.

#### Records Summary

Date	Occupant	Document Type	Document Notes/Violations
No date	Versatec	Underground Tank Communication Log	No comments noted
February 1982	Versatec	Permit	Permit finalized, no details provided
January 2, 1985	Versatec	Letter to the SCFD	The letter states: "Versatec presently has on our premises located at 2805 Bowers a below grade storage container. This is a <u>1,200 gallon waste treatment storage facility which is encased in an epoxy coated concrete vault.</u> This waste treatment facility is visually monitored on a daily basis by Versatec employees. As for any future plans we may have for any below ground piping or liquid storage, we presently see nothing coming up that will include anything of this nature."
February 1985	Versatec	Permit	Permit finalized, no details provided
May 1985	Versatec	Permit	Permit finalized, details state "=2 chemical sto"

Date	Occupant	Document Type	Document Notes/Violations
November 1986	Versatec	Permit	Permit finalized, details state "Chem treatment, additional to existing chem"
January 1987	Versatec	Permit	Permit finalized, no details provided
August 1987	Versatec	Permit	Permit finalized, details state "development lab/laping area" and "relocated 7 and add 2 heads"
January 1992	Xerox Engineering System	Permit	Permit finalized, details state "Two systems/system not installed; installed in San Jose/permit cancelled per Valenti"
June 1992	XES Inc	Permit	Permit finalized, details state "Originally a partial closure/ changed to complete"
June 12, 1992	XES Inc.	Permit	Permit was finalized/granted on June 25, 1993 for Complete Business Closure "to include Final Closure Report"
March 4, 1993	Former XES Site	Letter from the RWQCB	The letter was addressed to XES Incorporated in regards to the release case, Former XES Site, at 2805 Bowers Avenue. The letter stated: "We have reviewed McLaren/Hart's August 14, 1991, and DECON's January 25, 1993, reports concerning the above site's buildings at 2805 Bowers, 2885 Bowers, 2590 Walsh and 2710 Walsh Avenues. Based on our review of these reports, it does not appear that an on-site pollution source exists associated with these buildings. However, due to the presence of volatile organic chemicals in the groundwater under the site, it is appropriate to continue to monitor the site's three monitoring wells." The RWQCB requested that the wells be sampled semi-annually, and samples be analyzed using EPA Method 8010 (including identification of Freon 113). The specific locations of the three monitoring wells were not stated in the letter.
March 17, 1993	Xerox Engineering Systems (XES)	Underground Storage Tank Permit Application - Form A & B	Facility is listed as having one tank: one <u>6,000 gallon, single-walled concrete neutralization sump</u> with epoxy lining that was installed in 1975. The piping was noted as

Date	Occupant	Document Type	Document Notes/Violations
			single and double walled PVC. The tank leak detection method was marked as unknown. <u>The tank was noted to contain approximately 1,200 gallons of remaining substance.</u> The tank was noted to be permanently closed on-site.
April 1993	Xerox Engineering Systems	Permit	Permit finalized, details state "removing one 6,000 gallon tank containing electroplating waste liquid"
April 14, 1993	Xerox Engineering Systems (XES)	Work Plan for Sump Closure Activities	<p>The XES building, referred to as Building 1, was constructed in 1975. The building was part of a former complex of five buildings. The facility was used for the manufacturing of electronic printers and plotters. The facility has been inactive since December 1992, and the building remains vacant.</p> <p>Associated with the building's former printed circuit board lab was a waste treatment area located outside the facility on the southern side of the building. Integral to the waste treatment process was an epoxy seal-coated concrete vault (also referred to as a sump) used for pH neutralization of process liquids. The inside dimensions of the vault were 10 feet by 8 feet by 11 feet deep; the vault walls consisted of 6 inch concrete. Closure sampling of similarly constructed plating lines inside the building indicated non-detectable concentrations of VOCs and low concentrations of the metals copper, lead and nickel. Following further treatment, the process liquids were ultimately discharged under permit to the sanitary sewer.</p> <p>Concurrent with closure of the facility's sump, closure of aboveground hazardous waste areas were to be performed for the facility's hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste</p>

Date	Occupant	Document Type	Document Notes/Violations
			<p>treatment area, and diesel fuel storage area. These activities were submitted under a separate closure permit to the SCFD.</p> <p>The Work Plan proposed flushing of the underground piping connected to the vault, and placing cement plugs at each end of the pipe runs. The waste treatment vault had an open top with a fitted wood frame cover. At the time, the vault had approximately 2 feet of standing water (presumed to be rain water). A sample of the water was to be collected and analyzed for VOCs and the metals copper, lead and nickel. If sludge or sediment were to be present at the bottom of the vault following removal of the liquids, one sample was to be collected and analyzed for VOCs and the metals copper, lead and nickel. Following removal of the contents, the vault was to be steam cleaned and inspected visually for integrity and any signs of leakage. A maximum of two locations at opposite ends of the vault were to be selected for the collection of underlying soil, which were to be analyzed for VOCs and the metals copper, lead and nickel. The Work Plan noted that during the environmental assessment performed by McLaren/Hart, groundwater at the site was encountered approximately 13 to 18 feet bgs. If groundwater accumulated in the cored areas, a minimum of one water sample was to be collected for analysis.</p>
April 15, 1993	Xerox Engineering Systems (XES)	Permit	Permit for removal of one 6,000 gallon electroplating waste liquids tank/vault. Permit was finalized/granted on June 25, 1993.
April 21, 1993	Xerox Engineering Systems (XES) West Coast Operations	Closure Plan for Hazardous Materials Storage Tanks	Tanks to be removed included a 6,000 gallon electroplating waste liquids tank. Notes on the bottom

Date	Occupant	Document Type	Document Notes/Violations
			of the form state "concrete vault has to be removed and properly disposed".
December 1995	National Semiconductor	Permit	Permit finalized, no details provided
March 1996	National Semiconductor	Permit	Permit finalized, no details provided
April 1996	National Semiconductor	Permit	Permit finalized, details state "break room and food service area alteration" and "rf room"  AEI Note: possible reference to radio frequency
May 1996	National Semiconductor	Permit	Permit finalized, details state "1st floor work not performed, permit cancelled"
May 1999	ATI	Permit	Permit finalized, details state "first floor lobby"
July 1999	ATI	Permit	Permit finalized, details state "2nd fl"
August 1999	Network Associates	Permit	Permit finalized, details state "1st fl"
November 1999	ATI	Permit	Permit finalized, details state "install tent in the parking lot"
2004-2020	Keypoint Credit Union, Yes Video, Colfax International	Permit	Permits finalized for various tenant/building improvements

Based on a review of agency records and city directories, Versatec, a company later associated with Xerox Engineering Systems (XES), occupied the subject property from at least 1975 to 1992. According to a 1993 *Work Plan for Sump Closure Activities* on file with the Santa Clara Fire Department (SCFD), the XES building, referred to as Building 1, was constructed in 1975. The building was part of a former complex of five buildings. The facility was used for the manufacturing of electronic printers and plotters. The facility had been inactive since December 1992, and the building remained vacant. Associated with the building's former printed circuit board lab was a waste treatment area located outside the facility on the southern side of the building. An epoxy seal-coated concrete vault (also referred to as a sump) used for pH neutralization of process liquids was installed at the subject property in 1975. The inside dimensions of the vault were 10 feet by 8 feet by 11 feet deep; the vault walls consisted of 6 inches of concrete. According to a 1985 letter from Versatec to the SCFD, the waste treatment facility was "visually monitored on a daily basis by Versatec employees". Additionally, the piping of the system was noted as single and double walled PVC, and the tank leak detection method was marked as unknown in a 1993 Underground Storage Tank Permit Application filed by XES. The 'tank' was noted to be permanently closed on-site in the 1993 Underground Storage Tank Permit Application. It appears that the references to 'tank' and UST were pertaining to 1,200-gallon container located within the actual 6,000-gallon capacity vault. This is alluded to in a 1985 letter sent to SCFD by Versatec: "Versatec presently has on our premises located at 2805 Bowers a below grade storage container. This is a 1,200 gallon waste treatment storage facility which is encased in an epoxy coated concrete vault...."

The 1993 Work Plan stated that closure sampling of similarly constructed plating lines inside the building indicated non-detectable concentrations of VOCs and low concentrations of the metals copper, lead and nickel. Following further treatment, the process liquids were ultimately discharged under permit to the sanitary sewer. Concurrent with closure of the facility's sump, closure of aboveground hazardous waste areas were to be performed for the facility's hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area. These activities were submitted under a separate closure permit to the SCFD.

The 1993 Work Plan proposed flushing of the underground piping connected to the vault, and placing cement plugs at each end of the pipe runs. The waste treatment vault had an open top with a fitted wood frame cover. At the time, the vault had approximately 2 feet of standing water (presumed to be rain water). A sample of the water was to be collected and analyzed for VOCs and the metals copper, lead and nickel. If sludge or sediment were to be present at the bottom of the vault following removal of the liquids, one sample was to be collected and analyzed for VOCs and the metals copper, lead and nickel. Following removal of the contents, the vault was to be steam cleaned and inspected visually for integrity and any signs of leakage. A maximum of two locations at opposite ends of the vault were to be selected for the collection of underlying soil, which were to be analyzed for VOCs and the metals copper, lead and nickel. The Work Plan noted that during the environmental assessment performed by McLaren/Hart, groundwater at the site was encountered approximately 13 to 18 feet bgs. If groundwater accumulated in the cored areas, a minimum of one water sample was to be collected for analysis.

According to DTSC HWTS and EDR Radius Map HWTS records, Versatec/XES generated 31.2 tons of hazardous wastes in 1993, likely associated with their facility closure. Notable wastes generated from 1983 to 1993 included 10.3 tons of halogenated solvents, 0.475 tons of other empty containers  $\geq 30$  gallons (listing indicative of possible former ASTs/USTs), metal sludge, organic liquids with metals, oil/water separation sludge, liquids with halogenated compounds  $\geq 1,000$  mg/L, metal dust, tank bottom waste, other still bottom waste, liquids with chromium, liquids with nickel and unspecified sludge waste. A permit for removal of the 6,000 gallon electroplating waste liquids vault was filed by XES in April 1993, and the permit was finalized/granted by the SCFD on June 25, 1993. Additionally, a permit for complete business closure was filed by XES in June 1992, and the permit was finalized/granted by the SCFD on June 25, 1993.

No additional information or sampling data regarding the sump removal or the closure of the remaining facility areas of concern (hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area) was provided by the SCFD. However, it should be noted that due to the time frame of this assessment and the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, the SCFD is temporarily closed to the public for in-person public record reviews and therefore microfiche records on file for the subject property were not available for review. AEI recommends a review of files at this agency when they become available (further discussion in Section 1.5).

While no HMMPs for the subject property were found during AEI's review of SCFD files for the subject property, review of SCFD files for the northern adjoining property at 2710 Walsh Avenue (also part of the Versatec campus) included HMMPs for other Versatec building locations. Those documents included a 1990 Chemical Inventory page for the subject property with a note stating

"see 'blue' binders on bottom shelf in facilities department." Therefore based on this note, it appears that the hazardous materials used onsite would have been present in large quantities.

Based on the length of time Versatec/XES occupied the subject property, the documented use of halogenated solvents, and the former site features of concern (hazardous waste sump, hazardous waste storage area, hazardous waste handling area, steam-cleaning area, waste treatment area, and diesel fuel storage area), these former operations and associated features may have resulted in a release to the subsurface which represents a REC. Additionally, based on this information, the potential for a related vapor-phase migration concern cannot be ruled out.

#### 4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara Building Department (SCBD)	January 14, 2021	Website	N/A	Records discussed below

##### *Records Summary*

Year(s)	Owner/Applicant	Description of Permit and Building Use
1974	Not listed	Erect 2 story industrial shell
1977	Not listed	Install elect.
1978	Not listed	Install exhaust hood (expired)
1978	Not listed	Construct 1-HR duct shaft. Occ. Class: B-2
1980	Not listed	Install air handling unit and boiler/compressor/absorption system.
1980	Not listed	Install condensate drain
1982	Not listed	Construct 12' fence. Occ. Class: M-2.
1982	Not listed	Install floor drains and fixtures (expired)
1982	Not listed	Add processed air.
1982	Not listed	Add gas line.
1982	Not listed	Add to elect. service equipment.
1987	Not listed	Water treatment. Permit expired 5/6/1988, renewed by #BLD1988-78500.
1988	Not listed	Renew BP #BLD1987-73312 - water treatment. (expired)
1989	Not listed	Renew #BLD1988-78500 - water treatment.
1993	Not listed	Panel clean-up.
1993	Not listed	#CRN1993-3009 - issue permit to R/R slab on grade. #CRN1993-3211 - final by special inspection. = MF
1995	Not listed	Demo interior non-bearing walls.
1996	Not listed	T.I. renovation. Occ. Class: B-2. = MF
1996	Not listed	Add elect. to BP #BLD1996-107920.
1996	Not listed	Replace plumbing fixtures (restrooms). Add to BP #BLD1996-107920.
1996	Not listed	Cap off fixtures in wall cavity. Add to BP #BLD1995- 107584.
1996	Not listed	HVAC for T.I. renovation. Add to BP #BLD1996-107920.

Year(s)	Owner/Applicant	Description of Permit and Building Use
1996	Not listed	Add break room with food service area (existing sq. ft). Occ. Class: B.
1996	Not listed	Add elect.
1996	Not listed	Alter interior for sales offices. Occ. Class: B.
1996	Not listed	Add elect. to BP #BLD1996-108886.
1997	Not listed	ADD COMPUTER FLOOR;ALTERATION. Occ. Class: B, F-2, S-1.
1997	Not listed	TO BP 113556;ADD ELECTRICAL
1997	Not listed	RELOCATE UPS;ALT INT
1999	Not listed	LOBBY RENOVATION;ALTER INTERIOR. Occ. Class: B.
1999	Not listed	1ST + 2ND FLOORS;T.I. - Occ. Class: B.
1999	Not listed	TO BP;ADD ELEC
1999	Not listed	LOBBY RENOVATION;ADD MECH
1999	Not listed	1ST + 2ND FLOORS;ADD ELEC
1999	Not listed	ADD MECH. Add to BP #BLD1999-122612.
1999	Not listed	ALTER INT. Occ. Class: B.----no yellow found
1999	Not listed	(3) VAV BOXES;ADD MECH
2000	Not listed	RE NEW EXPIRED PERMIT BLD2000-11898 NEW MONUMENT SIGN
2002	Not listed	(1) UPS SYSTEM 40 KVA / (1) PANEL
2003	Not listed	SEISMIC UPGRADE
2003	Not listed	Demo non-structural prior to seismic upgrade on bld2003-06637
2003	Not listed	ADD ELEC TO BLD2003-06637
2004	Not listed	Remodel interior, both stories, add 4 exterior entry doors.
2004	Not listed	ADD ELEC TO SIGN - SIGN READS: KEYPOINT CREDIT UNION
2007	Not listed	PLN2007-06277: Add electric for tent event being held June 2nd - 3rd
2008	Not listed	INTERIOR ALTERATIONS TO (E) OFFICE SPACE / CREATING NEW ATM / NEW FLAG POLE // MF=7
2008	Not listed	Add electrical distribution and 3 light fixtures for special parking lot event to be held May 17 - 18th
2011	Not listed	Restripe parking lot and upgrade ADA parking stalls. // MF = 3
2013	Not listed	INTERIOR ALTERATION - second floor Office walls, (N) HVAC, restroom upgrades, lighting at second flr east lobby, NEW CO to CREATE SUITES - 230, 220, 130 & 105 (SUITE 105 CONSISTS OF PARTIAL 1ST AND PARTIAL 2ND FLR-ONE TENANT ) .//MF=21
2014	Not listed	Interior improvement 2 suites inc #230 and #130 both as part of same business. //MF=38
2014	Not listed	ELECTRICAL - Install 5 (N) parking lot light poles .//MF=5
2018	Not listed	Commerical T.I. Suites 130 and 230: Non-structural wall demo, lighting modifications, break rm 2nd flr, 1st flr restrm core, new HVAC equipment and dock ramp grading upgrades "Colfax International"

Year(s)	Owner/Applicant	Description of Permit and Building Use
2020	Not listed	Interior TI. Non structural wall and suspended ceiling demo per plans. Construction of under grid and walls to underside of building structure. Relocate doors, frames, hardware. Relocation of lighting as required. Relocate supply and return air as required. New power and communication locations as required. Associated MEP. All work in suites 100, 200, and 220.

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the SCBD.

#### 4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara Planning Department (SCPD)	January 14, 2021	Website	Simrat Dhadli	No evidence indicating the existence of AULs on file for the subject property. Hardcopy files were not available for review; Refer to Section 1.5.

#### 4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	January 14, 2021	Website	N/A	Information obtained is discussed below

#### Records Summary

<b>APN</b>	216-28-063
<b>Acreage</b>	5.12 acres
<b>Construction Date</b>	Not provided
<b>Building Square Footage</b>	Not provided
<b>Current Owner</b>	Not provided by Assessor. However, according to EDR Lightbox, the owner is KeyPoint Credit Union.
<b>Additional Information</b>	Not provided

#### 4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	January 8, 2021	Website	N/A	Records discussed below

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
RWQCB Oakland	December 2020	Email	Melinda Wong	No files exist for the subject property closed release case
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	January 8, 2021	Website	N/A	Records discussed below
CA DTSC EnviroStor	January 8, 2021	Website	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	January 8, 2021	Website	Ms. Rochelle Henderson	No records on file
Valley Water (VW) Well Tracker Database	January 8, 2021	Website	N/A	Records discussed below
VW Historical Fuel Leaks and Solvents Database	December 29, 2020 & January 13, 2021	Website and email	N/A	Records discussed below

### *SWRCB GeoTracker Database Summary*

The subject property was identified in the RWQCB GeoTracker database as a closed SLIC release case. Information in the database suggests that both soil and groundwater were impacted by a release at the subject property. Potential contaminants of concern included 1,1,1-TCA, Freon, Vinyl Chloride, Dichloroethane (DCA) and Dichloroethene (DCE). GeoTracker states that the case was granted closure on December 3, 2015. AEI searched the GeoTracker website for additional information about this release case. As no documents were available for review on the GeoTracker website, AEI contacted that San Francisco Bay RWQCB for additional information. According to an agency representative, no additional information is on-file for this site. AEI also attempted to access Valley Water's (VW) Historical Fuel Leaks & Solvents database to determine if files may exist, however the website is non-operational. AEI submitted a Public Records Request and was provided with a letter from the RWQCB by Lonnie Spin of VW. The letter was dated March 4, 1993 and was addressed to XES Incorporated in regards to the release case, Former XES Site, at 2805 Bowers Avenue. The letter stated: "We have reviewed McLaren/Hart's August 14, 1991, and DECON's January 25, 1993, reports concerning the above site's buildings at 2805 Bowers, 2885 Bowers, 2590 Walsh and 2710 Walsh Avenues. Based on our review of these reports, it does not appear that an on-site pollution source exists associated with these buildings. However, due to the presence of volatile organic chemicals in the groundwater under the site, it is appropriate to continue to monitor the site's three monitoring wells." The RWQCB requested that the wells be sampled semi-annually, and samples be analyzed using EPA Method 8010 (including identification of Freon 113). The specific location of the three monitoring wells was not stated in the letter. VW confirmed that no additional files exist.

As discussed in Section 6.3, a previous Phase I ESA report conducted for the northern and northeastern adjoining properties (Partner, 2017) states that 1995 lease records (reviewed in a 2014 ESA, Blackstone, copies of lease records not appended) associated with the subject property indicated that soil and groundwater at this property were impacted by the former Xerox operations. According to the lease agreement, Xerox performed soil and groundwater remediation at the subject property and was in the process of performing the final stages

of groundwater sampling as required by the SFRWQCB. Case closure for the release was reportedly pending at that time [presumably in 1995]. The lease agreement reportedly included indemnification for the lessee of the subject property from liability associated with the soil and groundwater contamination. No additional information on the sampling, remediation, or closure were reportedly available for review in the regulatory records in the previous report.

It should be noted that the 2014 Blackstone ESA apparently reviewed a 2011 ESA by Golder and Associates (GAI). As summarized by Partner in 2017, the 2011 report "...included a review of a San Francisco Regional Water Quality Control Board (SFRWQCB) letter, dated July 17, 1997, from the SFRWQCB regarding the southwest adjoining property at 2805 Bowers Avenue. This letter reportedly indicated that volatile organic compounds (VOCs) were detected in groundwater at the adjoining property [2805 Bowers Avenue], but the contamination did not appear to originate from the adjoining property. No information on concentrations of VOCs in groundwater was reportedly identified in the letter." Blackstone also requested information for the southwest adjoining property [2805 Bowers Avenue] for their 2014 report. The SFRWQCB contacted Blackstone on March 21, 2014, and indicated there were no files pertaining to the SLIC case as many closed RWQCB files pre-dating 2000 were not transferred to the GeoTracker website for upload and storage, and closed files were frequently discarded. Therefore, Blackstone noted it was likely the SLIC case received case closure prior to 1999, but the closure letter has not been maintained in the records. AEI has encountered this issue before, when a site closed in the 1990s has records that are eventually uploaded to GeoTracker, and the date of GeoTracker document upload is incorrectly cited as the closure date (although the case may have likely been closed many years prior). Based on the apparent 1990s date of case closure, it is presumed that consideration of the potential for vapor migration/intrusion would have not been evaluated.

AEI was provided a copy of E2C's 2003 Phase I ESA conducted for the subject property (Section 6.3). The original occupant of the building was Versatec, which changed its name to Xerox Engineering Systems (XES) in the early 1990s. This occupancy continued through 1992. Since that time tenants included National Semiconductor [according to AEI research this business was a semiconductor manufacturer that occupied the subject property building from 1995 to the early 2000s. DTSC HWTS records indicate that the tenant submitted a waste manifest in 1995, but no information was provided on the manifest.], Network Associates, (formerly Macafi Associates), and ATI Research (all apparent office use according to the consultant). A search of the June 2000 RCRA GNRTR list identified Versatec. No additional information was noted. SCFD records apparently indicated that former tenants generated hazardous wastes. Multiple sampling reports/prior reports were cited in 2003 report, however those were not appended. The consultant states that 1993 closure documents (Smith) presented soil/grab groundwater investigations at the subject property. It was stated that the samples were non-detect for VOCs, metals and Semi-VOCs. Groundwater was sampled annually by Smith from 1991 to 1995 and solvent-contaminated groundwater was detected. The concentrations were stated to be relatively consistent which suggested that may have not been from an on-site source. E2C stated that "additionally, the chemicals detected were not those which were utilized in the former business activities performed at the subject Site." XES was granted facility closure by SCFD in 1993, however the groundwater contamination case was not granted closure until 1997, by the RWQCB. The July 3, 1997 RWQCB NFA Letter for the onsite release case was appended. It states that recent information was provided to the RWQCB by a Xerox representative to support their contention that no further investigation was needed. RWQCB reviewed the information and rescinded their previous requirement for additional required investigation on the site in 1997. No

further remedial action was required. It appears the case was in 'inactive' status for some time, until the RWQCB updated their records to mark the case as closed. Two monitoring wells at the site were then subsequently destroyed. AEI confirmed with VW that MW-2 was located on the subject property, MW-3 was located on the eastern adjoining site at 2630 Walsh Avenue and the location of MW-1 is unknown.

Based on the reported subsurface contamination by VOCs including 1,1,1-TCA at the subject property for which no documentation is available, paired with the likelihood for a related vapor-phase migration condition, which was not previously evaluated for, is representative of a REC.

*California DTSC HWTS Database Summary (includes EDR Radius Map HWTS entries)*

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
WTA-Bowers	1996	PCBs and materials with	6
KeyPoint Credit Union	2004	Other inorganic solid waste, lead	0.17
Vantage Data Centers, LLC	2017	Off-spec, aged, or surplus inorganics, other inorganic solid waste, waste oil and mixed oil, unspecified oil-containing waste, PCBs and materials with, latex waste, blank/unknown, corrosives, lead	1.12
Versatec Inc/Xerox	1983-1993	Blank/unknown, aqueous solution with organic residues <10%, unspecified aqueous solution, asbestos-containing waste, other inorganic solid waste, oxygenated solvents, hydrocarbon solvents, unspecified solvent mixture, waste oil and mixed oil, <b>metal sludge, organic liquids with metals</b> , other organic solids, <b>other empty containers &gt;=30 gallons (0.475 tons)</b> , laboratory waste chemicals, <b>halogenated solvents (10.3 tons)</b> , ignitables, corrosives, liquids with pH <=2 with metals, <b>oil/ water separation sludge, liquids with halogenated compounds &gt;= 1,000 mg/L, metal dust, tank bottom waste, other still bottom waste, liquids with chromium, liquids with nickel, unspecified sludge waste</b>	31.23
National Semiconductor Corp	1995	No records found	N/A

Versatec/Xerox is listed as generating large quantities of hazardous wastes in 1993, likely associated with their facility closure. Notable wastes generated included halogenated solvents and other empty containers >= 30 gallons (listing indicative of possible former ASTs/USTs). National Semiconductor was listed in 1995, however no detailed manifest records were present. Refer to the Findings for a discussion of these former tenants.

Other current and former occupants of the subject property were listed in the DTSC HWTS database. No release of any of these materials was reported to the regulatory agencies. No evidence of a hazardous material release or of interior potential subsurface conduits was observed during the property inspection. Based on the relatively short duration of time that these wastes were reported to be generated in the HWTS database which were disposed of off-site

under waste manifest control and regulatory oversight, as well as the lack of observed interior potential subsurface conduits, the former use of these materials by the remaining tenants is not expected to constitute a significant environmental concern.

Please refer to the appendices for copies of records obtained from the DTSC HWTS.

#### *VW Records Summary*

AEI attempted to access the VW Historical Fuel Leaks & Solvents database, however the website does not appear to be functioning.

AEI therefore submitted a Public Records Request and was provided with a letter from the RWQCB dated March 4, 1993 by Lonnie Spin of VW. The letter was addressed to XES Incorporated in regards to the release case, Former XES Site, at 2805 Bowers Avenue. The letter stated: "We have reviewed McLaren/Hart's August 14, 1991, and DECON's January 25, 1993, reports concerning the above site's buildings at 2805 Bowers, 2885 Bowers, 2590 Walsh and 2710 Walsh Avenues. Based on our review of these reports, it does not appear that an on-site pollution source exists associated with these buildings. However, due to the presence of volatile organic chemicals in the groundwater under the site, it is appropriate to continue to monitor the site's three monitoring wells." The RWQCB requested that the wells be sampled semi-annually, and samples be analyzed using EPA Method 8010 (including identification of Freon 113). The specific locations of the three monitoring wells were not stated in the letter.

VW confirmed that no additional files exist.

The VW Well Information Database depicts one destroyed monitoring well, MW-2, located on the southern portion of the subject property. According to the 2003 Phase I ESA report prepared by E2C, two monitoring wells were installed on-site as part of the groundwater investigation that took part on the subject property from 1991 through 1997. The monitoring wells were destroyed under permit from the SCVWD in 1997 after case closure was granted to the groundwater investigation. The exact location of MW-1 is unknown. MW-3 was located on the east adjoining site at 2630 Walsh Avenue, per the VW database.

Refer to the information above for further discussion.

#### **4.7 OIL AND GAS WELLS**

<b>Agency</b>	<b>Date Referenced</b>	<b>Resource</b>	<b>Oil or gas wells located within 500 feet of the subject property</b>
California Geologic Energy Management Division (CalGEM)	January 14, 2021	CalGEM Map	No

#### **4.8 OIL AND GAS PIPELINES**

<b>Agency</b>	<b>Date Referenced</b>	<b>Resource</b>	<b>Pipelines located within 500 feet of the subject property</b>
National Pipeline Mapping System (NPMS)	January 14, 2021	NPMS Public Map Viewer	No

#### **4.9 STATE ENVIRONMENTAL SUPERLIENS**

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

#### **4.10 STATE PROPERTY TRANSFER LAWS**

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

### 5.1 RECORDS SUMMARY

<b>Facility Name</b>	KEYPOINT CREDIT UNION, VERSATEC INC, VANTAGE DATA CENTERS, LLC, VERSATEC INCORPORATED, NATIONAL SEMICONDUCTOR CORP, WTA-BOWERS, VERSATEC
<b>Address</b>	2805 Bowers Avenue
<b>Distance &amp; Direction</b>	Subject Property
<b>Hydrologic Position</b>	N/A
<b>Databases Listed</b>	HWTS (5), RCRA-SQG, CPS-SLIC, HAZNET (4), CERS, FINDS, ECHO, FTTS, HIST FTTS
<b>Comments</b>	<p>KeyPoint Credit Union, WTA-Bowers, National Semiconductor Corp, and Vantage Data Centers, LLC were identified in the regulatory database for the generation of hazardous wastes. Please refer to Section 4.6 and the Findings for discussion of hazardous wastes generated on-site.</p> <p>Versatec/XES was identified in the regulatory database as a small and large quantity generator of hazardous wastes in 1980, 1992, 1996. Over 250 hazwaste manifest entries were present. The subject property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Please refer to Section 4.6 and the Findings for discussion of hazardous wastes generated on-site.</p> <p>Versatec/XES was also identified in the regulatory database as a closed SLIC case. Please refer to Section 4.6 for discussion of the SLIC case.</p> <p>Versatec was also identified in the FIFRA/ TSCA Tracking System database: FIFRA (Federal Insecticide, Fungicide, &amp; Rodenticide Act)/TSCA (Toxic Substances Control Act). This database tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). An inspection date of April 18, 1990 was on file for the subject property, with no violations noted. Based on the lack of violations and nature of this listing, it is not expected to represent a significant environmental concern.</p>

<b>Facility Name</b>	HD Supply Repair and Remodel LLC, Contractor's Warehouse, Apple Computers
<b>Address</b>	2800 Kifer Road, 2880 Bowers Avenue

<b>Distance &amp; Direction</b>	Adjoining to the west across road
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	CERS HAZ WASTE, CERS, RCRA-SQG, FINDS, ECHO, CUPA Listings, HWTS, HAZNET, RCRA-VSQG
<b>Comments</b>	The adjoining site to the west was listed in the regulatory database as a hazardous waste generator, and listed as a small quantity generator of hazardous wastes in 2006 and as a conditionally exempt small quantity generator in 2020 with no violations found. Hazardous wastes generated on-site included ignitable wastes, corrosive waste, mercury, benzene, and methyl ethyl ketone. Violations were filed for the facility in 2017 for paperwork. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the lack of a documented release, and gradient, the review of additional regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

<b>Facility Name</b>	K R Anderson
<b>Address</b>	2800 Bowers Avenue
<b>Distance &amp; Direction</b>	Adjoining to the west across road
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	HWTS, RCRA-SQG, FINDS, ECHO, HAZNET
<b>Comments</b>	The adjoining site to the west was listed in the regulatory database as a hazardous waste generator, and listed as a small quantity generator of hazardous wastes in 1998 with no violations found. Hazardous wastes generated on-site included ignitable wastes, corrosive waste, waste oil and mixed oil, unspecified aqueous solution, and reactive waste. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the lack of a documented release, and gradient, the review of additional regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

<b>Facility Name</b>	Apple, Inc. (Bowers 1), Miramar Labs, Inc.
<b>Address</b>	2845 Bowers Avenue, 2790 Walsh Avenue
<b>Distance &amp; Direction</b>	Adjoining to the north
<b>Hydrologic Position</b>	Down-gradient
<b>Databases Listed</b>	RCRA NONGEN / NLR (x3), CERS HAZ WASTE, CERS
<b>Comments</b>	Miramar Labs (aka MiraDry) at 2790 Walsh Avenue was identified in the regulatory database as a hazardous waste generator and a chemical storage facility overseen by the Santa Clara Fire Department. The business was also identified in the regulatory database as a non-generator of hazardous waste in 2014. No violations were noted in connection with the facility.

	<p>Apple Inc. at 2845 Bowers Avenue was also identified in the regulatory database as a non-generator of hazardous waste in 2018 and 2019. No violations were noted in connection with the facility.</p> <p>AEI submitted a FOIA to the SCFD for these addresses, however no records were on file.</p> <p>Based on the lack of a documented release related to these tenancies, and gradient, the listings are not expected to represent a significant environmental concern.</p>
--	---

<b>Facility Name</b>	Eurofins EAG Engineering Science, LLC
<b>Address</b>	2710 Walsh Avenue
<b>Distance &amp; Direction</b>	Adjoining to the northeast
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	RCRA NONGEN / NLR
<b>Comments</b>	<p>The adjoining site to the northeast was listed in the regulatory database as a non-generator of hazardous waste in 2019. No violations were noted in connection with the facility.</p> <p>AEI submitted a FOIA to the SCFD for this address, however no records were on file.</p> <p>Based on the lack of a documented release related to this tenancy, and gradient, the listing is not expected to represent a significant environmental concern.</p>

<b>Facility Name</b>	Apple, Apple - 2630 Walsh Avenue, Apple Inc
<b>Address</b>	2630 Walsh Avenue
<b>Distance &amp; Direction</b>	Adjoining to the east
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	CERS HAZ WASTE, CERS, RCRA-SQG, RCRA-LQG, FINDS, CUPA Listings
<b>Comments</b>	<p>This adjoining site to the east was listed in the regulatory database as a hazardous waste generator. Wastes generated on-site included: alkaline solution without metals, other inorganic solid waste, other organic solids, laboratory waste chemicals, liquids with pH less than 2, ignitable waste, corrosive waste. reactive waste, chromium, silver, spent halogenated and non-halogenated solvents, wastewater treatment sludge from electroplating operations, spent cyanide plating bath solutions, plating bath residues, and spent stripping and cleaning bath solutions. The facility was considered a large quantity generator until 2017. No violations were found in connection with any of these substances. This property is also listed as a FINDS site in association with the above listings.</p> <p>Based on the lack of a documented release, and gradient, the review of regulatory agency files for this site was not deemed necessary, and these listings are not expected to represent a significant environmental concern.</p>

<b>Facility Name</b>	Intel SC1, Bowers Campus, Intel Corporation, intel SC2, Intel Corp SC1/2, Permise Helath at Intel, Intel
<b>Address</b>	3065 Bowers Avenue
<b>Distance &amp; Direction</b>	Approximately 400 feet north
<b>Hydrologic Position</b>	Down-gradient
<b>Databases Listed</b>	AST (x3), Envirostor, HIST UST, NPDES (x2), CIWQS (x2), CPS-SLIC, CERS HAZ WASTE (x3), CERS TANKS (x3), HAZNET, CERS (x3), CUPA Listings, RCRA-LQG, WDS, RCRA-NonGen/NLR, HWTS
<b>Comments</b>	<p>Based on information obtained from the GeoTracker website, in 1985 a diesel UST was removed from this site and water samples collected from the base of the excavation contained elevated level of petroleum hydrocarbons. Intel believed that the sample did not represent actual groundwater quality, and was due to a thin sheen at the base of the excavation. No work appears to have been done at this site since. The case remains open and inactive as of June 14, 2016. However, based on the nature of the release, the relative distance from the subject property, and the inferred direction of groundwater flow, this release case is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

<b>Facility Name</b>	Applied Materials, APPLIED-3050 BOWERS AVENUE
<b>Address</b>	3050 Bowers Avenue
<b>Distance &amp; Direction</b>	Approximately 0.17 mile
<b>Hydrologic Position</b>	Down-gradient
<b>Databases Listed</b>	NPL, SEMS, RCRA-LQG, US Eng Controls, US Inst Control, HIST UST, ROD, PRP, FINDS, ECHO, NY Manifest, Envirostor, CPS-SLIC, HIST Cal Sites, Cortese, ENF, HAZNET, HIST Cortese, CIWQS, CERS, HWTS
<b>Comments</b>	<p>Based on information obtained from the GeoTracker website, this nine-acre site was used by Applied Materials for manufacturing vapor deposition equipment used in the semiconductor industry. VOCs were first detected in groundwater in November 1983 in the vicinity of three USTs on the western side of the site. In July 1987, the site was added to the NPL by the US EPA.</p> <p>Based on the most recent groundwater monitoring report (2005 Annual Report) dated March 14, 2006, groundwater at this site has been measured to flow to the northeast (away from the subject property). The nearest monitoring wells to the subject property were not sampled in this monitoring event. Thus, the nearest well to the subject property which was sampled was AM1-7, located 0.29 mile north of the subject property. This well contained low levels of VOCs in the sampling event. However, it is located in the area of the identified VOC release. Based on the relative distance of the identified release and the site from the subject property and the inferred direction of groundwater flow, this release is not expected to represent a significant environmental concern.</p>

	This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time
--	--

<b>Facility Name</b>	MicroChem Inc, Microstorage/Intel, memtech Technology, Intel Corporation, Microsemi PPG
<b>Address</b>	2986-3000 Oakmead Village Court
<b>Distance &amp; Direction</b>	Approximately 0.2 mile northwest
<b>Hydrologic Position</b>	Down-gradient
<b>Databases Listed</b>	NPL, SEMS, US Eng Controls, US Inst Control, HIST Cal Sites, ROD, PRP, Consent, NY Manifest, CA CUPA Listings (x2), EMI (x3), CERS (x3), CPS SLIC (x2), Envirostor (x2), DEED, Cortese, NPDES, ENF, CIWQS, RCRA-NonGen/NLR, RCRA-SQG (x2), HIST UST, FINDS, ECHO, BOND EXP PLAN, CERS HAZ WASTE, HIST Cortese
<b>Comments</b>	<p>Based on information obtained from the GeoTracker and Envirostor websites, Intel Corporation operates a microprocessor testing facility at this site. Previously, chemicals used on-site were stored in drums and within an UST. Soil and shallow groundwater at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon- 113, dichloroethane (DCA), and dichloroethylene (DCE). Micro Storage occupied the site from 1985 to 1986 and used the facility for research and development and pilot manufacturing. Micro Storage also occupied a property adjoining to and upgradient from the site that contributed to the contamination.</p> <p>Based on the 5th 5-Year Review for the site obtained from the US EPA's website, dated September 2017, the evaluation of groundwater monitoring results since 2012 indicates that the contaminant concentrations in the shallow aquifer plume are decreasing and that there has been no contaminant migration into the underlying B-zone of the shallow aquifer. However, cleanup standards at the Site have not been met in all wells. An investigation of a potential up-gradient source with possible impacts to the Site was completed in 2015. No specific upgradient source was identified and it was determined that a potential, unknown source had no overall effect on contaminant concentrations at the Site. Institutional controls for the Site are currently effective. Two deed restrictions are in-place, which are intended to prevent the use of the groundwater beneath the Site.</p> <p>Groundwater monitoring result from 2017 indicate that the nearest edge of the VIC plume to the subject property is approximately 0.21 mile northwest of the subject property. Based on the relative distance form the subject property and the documented flow of groundwater at this site, this release is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed.</p>

	Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.
--	---

<b>Facility Name</b>	SYNERTEK, INC. (BUILDING 1)
<b>Address</b>	3050 Coronado Boulevard
<b>Distance &amp; Direction</b>	Approximately 0.23 mile northeast
<b>Hydrologic Position</b>	Down-gradient
<b>Databases Listed</b>	NPL, SEMS, RCRA-SQG, US Eng Controls, US Inst Control, ROD, PRP, FINDS, ECHO, Envirostor, CPS-SLIC, Hist Cal Sites, CERS HAZ WASTE, DEED, CA Cortese, NPDES, CIWQS, CERS, ENF, HIST Cortese
<b>Comments</b>	<p>Based on information obtained from the GeoTracker website and the US EPA's Superfund website, this site is approximately 1.5 acres in size. In 1982, groundwater contamination was identified at the site consisting of trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA), 1,1-dichloroethene (1,1-DCE), 1,1-dichloroethane (1,1-DCA), 1,2- DCA, vinyl chloride, and Freon 113. It was later determined that the contamination originated from an on-site solvent tank and three neutralization tanks.</p> <p>A groundwater extraction and treatment system began operation in 1987, and was shut down in 2001 with RWQCB concurrence after extraction rates declined such that continued operation of the system provided little benefit. Semi-annual groundwater monitoring continues at the site.</p> <p>Based on the Fifth 5-Year Review of the site dated September 27, 2017, the nearest groundwater monitoring well to the subject property is MW-01A, located approximately 0.15 mile northeast of the subject property. In sampling performed in October 2016, this well was below the laboratory reporting limit for TCE in groundwater, the primary contaminant of concern. Based on the data from this well, the relative distance from the subject property, and the inferred direction of groundwater flow, the release from this site is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

## 5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in the Findings.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	KeyPoint Credit Union represented by Mr. Larry Scofield	January 13, 2021	Email	2003	Owner is represented by acting Key Site Manager; see Interview Summary table below
Key Site Manager	Mr. Larry Scofield	January 13, 2021	Email	2003	Interviewed; see Interview Summary table below

#### *Interview Summary*

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	Answer not provided	Answer not provided
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	N/A
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No
Additional information provided:	N/A	N/A

### 6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information of KeyPoint Credit Union, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

### 6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

## 6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Thomas Hanson, with GI RE Acquisitions LLC (potential purchasing entity). The following table represents information contained therein.

Question	Response/ Comment
<b>1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)</b>  Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Unknown
<b>2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).</b>  Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Unknown
<b>3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</b>  Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Unknown
<b>4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</b>	"Unknown if property is contaminated"

Question	Response/ Comment
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	
<b>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</b>  Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	No
<b>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</b>  Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

### 6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI during this assessment by the User. A summary of this information follows:

Phase I Environmental Site Assessment Conclusionary Letter, 2805 Bowers Avenue, Santa Clara, CA, prepared by E2C (August 20, 2003)

The report letter was prepared for the subject property.

The document was addressed to AEA Credit Union and served as a 'findings to date' letter for an in-progress Phase I ESA report.

The site was used for agricultural purposes pre-1954, until the building was constructed in 1975. The original occupant of the building was Versatec, which changed its name to Xerox Engineering Systems (XES) in the early 1990s. This occupancy continued through 1992. The building was vacant from 1992 to 1996. Since that time tenants included National Semiconductors, Network Associates, (formerly Macafi Associates), and ATI Research (all apparent office use according to the consultant). The building was vacant at the time of the 2003 site visit.

The following documentation was reviewed:

- Phase I ESA, Phase II (1993, McLaren/Hart)
- Groundwater Sampling Results (1995, Smith Environmental Technologies)

- Closure Documents Report (1995, Smith Environmental Technologies)
- Groundwater Data and Report (1994, Smith Environmental Technologies)
- Phase I ESA (1995, E2C)

The consultant states that 1993 closure documents (Smith) presented soil/grab groundwater investigations at the site. It was stated that the samples were ND for VOCs, metals and Semi-VOCs. Groundwater was sampled annually by Smith from 1991 to 1995 and solvent-contaminated groundwater was detected. The concentrations were stated to be relatively consistent which suggested that may have not been from an onsite source. "Additionally, the chemicals detected were not those which were utilized in the former business activities performed at the subject Site." XES was granted facility closure by SCFD in 1995, however the groundwater contamination case was not granted closure until 1997, by the RWQCB.

It was stated that two monitoring wells were installed on the site in 1991 as part of a groundwater investigation at the request of the RWQCB. The two wells were apparently destroyed after the 1997 NFA was issued. The consultant was able to field verify that one the wells had been destroyed and therefore contacted the SCVWD to verify destruction. The SCVWD was apparently having problems with their computer system at the time and could not process the request. The consultant stated they would re-contact the SCVWD.

The July 3, 1997 RWQCB NFA Letter for the onsite release case was appended. It states that recent information was provided to the RWQCB by a Xerox representative to support their contention that no further investigation was needed. RWQCB reviewed the information and rescinded their previous requirement for additional required investigation on the site in 1997. No further remedial action was required.

The consultant's conclusions/recommendations consisted of the following:

- Pre-demo survey with respect to potential ACMs
- No further items of potential environmental concern were found. No further action was recommended at that time.

*Phase I Environmental Site Assessment , 2805 Bowers Avenue, Santa Clara, CA, prepared by E2C (September 9, 2003)*

The report was prepared for the subject property. The document was addressed to AEA Credit Union.

The report provided contained the text, Radius Map and 1997 NFA letter only.

The same conclusions as noted in the preliminary findings letter remained. SCVWD was able to confirm that the two former onsite monitoring wells were destroyed.

The prior reports mentioned in the above summary letter were not appended.

The references section of the report mentions a 2002 ESA by Lowney (not discussed or appended).

Groundwater was estimated to be present at depths from 5-15 ft bgs and flow to the north.

The earliest resource was an aerial photograph from, 1954 which depicted orchard use.

The 1985 city directory noted "Versatec Corporate Headquarters" as the tenant. Versatec was also listed in 1980.

A search of the June 2000 RCRA GNRTR list identified Versatec (at this site). No additional information was noted.

The appended EDR Radius Map lists the following 2805 Bowers tenants: WTA Bowers (HAZNET), Versatec (FINDS, HAZNET, RCRIS-LQG). WTA Bowers generated 6 tons of PCBs (date not cited). Versatec was a LQG and generated the following wastes (no dates): waste/mixed oil, unspecified solvent mixture, lab waste chemicals (10 additional HAZNET waste listings were present, via a URL in the report, however those were not visible in the scanned report copy).

The consultant contacted the RWQCB for information regarding the release case from 1991 to 1997. The RWQCB said the case was inactive, but was able to provide the 1997 NFA letter. The consultant stated that it appeared that the RWQCB had neglected to update their records to show the case was actually closed.

The consultant stated that SJFD records showed historical onsite hazardous materials uses and that all former tenants were granted facility closure by the SJFD. Additional details were not provided.

*Phase I Environmental Site Assessment Report, Walsh Bowers Office, 2710-2790 Walsh Avenue and 2845-2855 Bowers Avenue, Santa Clara, California 95051, prepared by Partner (February 2, 2017)*

The report was prepared for the northern and northeastern adjoining properties (referred to as the 'subject property' in the subsequent paragraphs).

The report included a review of an earlier ESA by Blackstone Consulting from 2014 (prepared for DivcoWest Real Estate, performed on the sites and the property located 2630 Walsh), an ESA by AllWest Environmental from 2016 (prepared for Equus Capital Partners, Ltd.), and review of records on file with the Santa Clara Fire Department for 2710 Walsh Avenue which indicated that this building was formerly occupied by Versatec Inc. A chemical inventory from 1987 listed various hazardous substances on-site, including up to 55-gallons of 1,1,1-trichloroethane (1,1,1-TCA). City directories reviewed in the previous report identified Versatec as occupying 2710 Walsh Avenue from at least 1980 to 1991. Based on the lack of an identified documented release, the use of 1,1,1-TCA along with other hazardous substances was noted but not considered to be a REC by Partner based on the lack of reported releases.

It should be noted that the 2014 Blackstone report apparently reviewed a 2011 ESA by GAI (performed on the sites and properties located 2400, 2424, 2630 Walsh). Apparently GAI had conducted an ESA at the site in 2006 as well, with no RECs. The 2011 report "...included a review of a San Francisco Regional Water Quality Control Board (SFRWQCB) letter, dated July 17, 1997, from the SFRWQCB regarding the southwest adjoining property at 2805 Bowers Avenue. This letter reportedly indicated that volatile organic compounds (VOCs) were detected in groundwater at the adjoining property, but the contamination did not appear to originate from the adjoining

property. No information on concentrations of VOCs in groundwater was reportedly identified in the letter. GAI reportedly stated that VOC-impacted groundwater potentially was located beneath the subject property, but did not identify this condition as a REC, as defined in ASTM E 1527-05.

Based on the available information, Blackstone concluded, "Considering there is no evidence that groundwater investigations have been conducted on the subject property, no evidence of contamination linked to the subject property, a 1995 lease document referenced a pending case closure for the upgradient 2805 Bowers Avenue property, and 1997 correspondence from the SFRWQCB to the former subject property owner indicated VOCs detected in groundwater at the 2805 Bowers Avenue property did not appear to originate from this upgradient and adjoining property, it is unlikely the soil or groundwater impacts at the 2805 Bowers Avenue facility have migrated onto the subject property, and the southwest adjoining property is not considered a REC." Blackstone requested files from the RWQCB and was informed no files exist. "Blackstone also requested file information for the southwest adjoining property at 2805 Bower Avenue. The SFRWQCB contacted Blackstone on March 21, 2014, and indicated there were no files pertaining to the southwest adjoining property at 2805 Bowers Avenue. However, according to the SFRWQCB, many closed RWQCB files pre-dating 2000 were not transferred to the Geotracker website for upload and storage, and closed files were frequently discarded. Therefore, it is likely the 2805 Bowers Avenue site received case closure prior to 1999, but has not been maintained in the records." Blackstone's report did not have any RECs.

The 2016 AllWest report reviewed the 2014 Blackstone and 2011 GAI reports. The AllWest report did not have any RECs. However, per Partner, it was stated that "According to the GAI report, a letter prepared on July 15, 1997 by the SFRWQCB indicated that VOCs were detected in groundwater beneath the adjoining property to the south of the subject property at 2805 Bowers Avenue, but the contamination did not appear to originate on the adjoining property. No information regarding VOC concentrations in groundwater was reportedly provided in the letter, and GAI identified the absence of this information as a data gap. However, according to online research conducted by AllWest, "the property at 2805 Bowers Ave. has a case closed status as of December 3, 2015." AllWest concluded that, although there is no other information provided on GeoTracker's website regarding this site, including site closure documents, "its recent closure status indicates the site is unlikely to be of significant environmental concern to the subject property." However, AllWest could not discount the potential presence of low levels of residual VOCs in subject property groundwater from the off-site, up-gradient source...[however] based on the findings of a Tier 1 vapor screening, AllWest concluded that the potential for a vapor encroachment concern (VEC) from current or former on-site and surrounding land use is low." Additionally, it was stated that "according to the AllWest report, GAI completed an asbestos survey in 2006 at the subject property. The exterior paint layer on stucco, roof flashing and roof mastic at 2790 Walsh/2845-55 Bowers Avenue, and the roof of 2710 Walsh Avenue were reportedly found to contain regulated amounts of asbestos. The roofs underwent an upgrade in 2012, but it was unknown if all asbestos-containing materials (ACMs) were removed."

The report also discussed the closed release case adjoining to the south at 2805 Bowers Avenue. This release was identified as Versatec Inc. (also former subject property occupant) and potential contaminants of concern were identified as 1,1,1-TCA, Freon, vinyl chloride, dichloroethane (DCA) and dichloroethene (DCE). According to previous reports reviewed by the consultant, but not appended to the report, lease records associated with the 2805 Bowers Avenue property, dated 1995, indicated that soil and groundwater at this property were impacted by the operations of a former tenant, Xerox. According to the lease agreement,

Xerox performed soil and groundwater remediation at this property and was in the process of performing the final stages of groundwater sampling as required by the SFRWQCB. Case closure for the release was reportedly pending at that time. The lease agreement reportedly included indemnification for the lessee of the adjoining property from liability associated with the soil and groundwater contamination. No additional information on the sampling, remediation, or closure were reportedly available for review in the regulatory records. Based on regulatory closure and apparent lack of impact to the subject property, the adjoining property was not considered to be a REC by Partner. Neither Blackstone nor AllWest identified this as a REC.

Partner noted that "Riverine wetlands are depicted through the central portion of the subject property on the United States Fish and Wildlife Service (USFS) wetlands inventory map. However, the depicted wetlands appear to represent a historical stream which was identified on the subject property prior to the current development and no evidence of wetlands was observed during the site reconnaissance. A comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property."

No RECs, CRECs, or HRECs were identified as part of this previous assessment. The following Environmental Concerns were noted: onsite historical use of chlorinated solvents, potential for ACMs, and southern adjoining release case. No further investigation was recommended for the subject property by Partner.

However, Partner stated that "Due to the lack of documentation available regarding site characterization and remedial actions at the property adjacent to the south, Partner cannot rule out the potential for a vapor encroachment condition (VEC) at the subject property. Based on the findings of the Tier 1 screen, vapor intrusion may be an issue of concern in connection with the existing structures on the subject property. As such, additional assessment may be warranted."

Copies of text portions of the AllWest and Blackstone reports were appended to Partner's report. However copies of the cited GAI reports were not included.

#### Miscellaneous plans, permits, CofOs

Recent plans, CofOs and permits were provided. No environmental concerns were noted.

Copies of the reports are included in the appendices.

Note: As the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

## **6.4 ENVIRONMENTAL LIEN SEARCH**

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

## 7.0 SITE RECONNAISSANCE

<b>Site Reconnaissance Date</b>	January 19, 2021
<b>AEI Site Assessor(s)</b>	Megan Salcido
<b>Property Escort(s)/ Relationship(s) to Property</b>	Mr. Larry Scofield, Key Site Manager
<b>Units/Areas Observed</b>	See Tenant Information table in Section 2.1.  Representative exterior areas
<b>Area(s) not accessed and reason(s)</b>	Refer to Section 1.5 for discussion of limiting condition(s).
<b>Other Physical Constraints</b>	Refer to Section 1.5 for discussion of limiting condition(s).

### *Reconnaissance Findings Summary*

<b>Feature</b>	<b>Observed on Subject Property (see Section 7.1)</b>	<b>Observed on Adjoining Property (see Section 7.2)</b>
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		✓
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		✓
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✓	✓
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✓	✓
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other	✓	

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### 7.1.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

#### *Transformers*

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/No)
Pad-Mounted	1	Silicon Valley Power	1970s	No	No
Subsurface	1	Silicon Valley Power	1970s	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the pad-mounted transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

Due to the sub-grade nature of the subsurface transformer, AEI was unable to observe the condition of the equipment.

#### *Elevators*

The subject property is equipped with two hydraulic elevators. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevators is located on the first floor of the building. No evidence of stains or leaks was observed at the base of the equipment during the site reconnaissance. The elevators are reportedly maintained by thyssenkrupp. Based on the good condition and regular maintenance of the elevators, they are not expected to represent a significant environmental concern.

### **7.1.2 DRAINS, SUMPS, AND CLARIFIERS**

Various storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

### **7.1.3 OTHER**

Cleaning supplies are stored in designated janitorial closets inside the subject property building. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

Approximately 40-gallons of building maintenance products, such as paints, paint related products, propane, and fuel, were observed in a flammable cabinet stored in an exterior fenced enclosure on the south side of the building and within the building maintenance shop in the KeyPoint Credit Union unit. Six paint cans were also stored next to the flammable cabinet on the concrete pavement. The containers were properly labeled and stored. AEI also observed two 5-gallon propane containers used by Colfax International for the operation of their forklift. No signs of spills or leaks were observed in conjunction with any of the containers. No significant staining or evidence of release of any of the materials was observed during the site reconnaissance. Based on the relatively small quantities observed and the lack of evidence of the mismanagement of these materials, the use of these materials on site is not expected to represent a significant environmental concern.

## **7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS**

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### **7.2.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE**

Multiple adjoining sites were observed to be occupied by industrial businesses. Based on the nature of use, hazardous substances are likely utilized/stored on the site. These sites were identified in the regulatory database and are further discussed in Section 5.1.

### **7.2.2 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTs/USTs)**

An AST (liquid nitrogen) was observed at the northeastern adjoining property. This site was identified in the regulatory database and is further discussed in Section 5.1.

### **7.2.3 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

Several pad-mounted and subsurface transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the pad-mounted transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

#### **7.2.4 DRAINS, SUMPS, AND CLARIFIERS**

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

## 8.0 NON-ASTM SERVICES

---

### 8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

<b>Material Type</b>	<b>Location</b>
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

## 8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has  $\geq 1 \text{ mg/cm}^2$  (5,000  $\mu\text{g/g}$  or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from  $0.5 \text{ mg/cm}^2$  to  $2.0 \text{ mg/cm}^2$ . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **8.3 RADON**

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 63 tests were conducted for radon levels in the subject property zip code (95051) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

### **8.4 MOLD**

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

## **8.5 WETLANDS**

While the discussion of wetlands is not included within the scope of this report, review of the client-provided *Newmark Knight Frank's Property Detail Report* for the subject property indicates onsite Riverine wetlands.

AEI accessed the online US Fish & Wildlife Service's National Wetlands Inventory (NWI) Wetlands Mapper, which indicates the eastern side of the subject property is designated as a Riverine Wetland; a NWI map of the subject property is provided in the appendices of this report. It appears that this area representing a historical stream has since been filled or channelized under the paved parking area/adjoining sites. Therefore this area is not expected to represent a significant environmental concern. However, if future redevelopment in this area is planned, AEI recommends contacting the local planning and/or building departments to determine whether a wetlands delineation report is required and/or if mitigation is required in order to develop in this area.

## **9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS**

---

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

CA RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/28/2020 has revealed that there are 3 NPL sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### ***Federal Delisted NPL site list***

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there are 4 SEMS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>INTEL MAGNETICS</b> Site ID: 0901661 EPA Id: CAD092212497	<b>3000 OAKMEAD VILLAGE</b>	<b>NW 1/4 - 1/2 (0.264 mi.)</b>	<b>0</b>	<b>28</b>

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/28/2020 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: CAT000612184

### State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 51 CA ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 5 CA LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 18 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

CA HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the CA HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 5 CA HIST LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the CA HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 4 CA HIST Cal-Sites sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 9 CA CUPA Listings sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 13 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

**Environmental Interest/Information System:**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Summary Details:**

Conditions at proposal October 15, 1984): Intel Magnetix produces and tests magnetic products and bubble memories at a plant in Santa Clara, Santa Clara County, California. The facility occupies approximately 1 acre and is surrounded by industrial and business areas. Monitoring wells on the site are contaminated with 1,1,1-trichloroethane, trichlorofluoromethane, 1,1-dichloroethylene, and trichloroethylene, according to analyses conducted by a consultant to Intel. Contamination is believed to have resulted from leaking tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Intel is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of contamination of ground water and soils. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status June 10, 1986): The company has installed a system to pump and treat contaminated ground water. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing response actions at the site.

Background Info: Intel Corporation operates a microprocessor testing facility at this one-acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and in an underground storage tank.  
Soil and shallow groundwater at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA), and dichloroethylene (DCE). Approximately 300,000 people residing within a three-mile radius of this site depend on local groundwater for their drinking water. This groundwater is derived from a deep aquifer.  
While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and twenty of the twenty-seven City of Santa Clara municipal wells are

**1000366359**

located within a three-mile radius of the site. The closest municipal well to the site is City of Santa Clara Well #21. This well is located approximately 2800 feet from the nearest contaminated monitoring well.

**Summary Details:**

Conditions at proposal October 15, 1984): Applied Materials produces equipment for manufacturing wafers for the electronics industry at a plant in Santa Clara, Santa Clara County, California. The facility occupies about 2.5 acres and is surrounded by business and industrial areas. Monitoring wells on the site are contaminated with Freon 113, tetrachloroethylene, 1,1,1-trichloroethane, 1,1-dichloroethylene, and trichloroethylene, according to analyses conducted by a consultant to Applied Materials. Contamination is believed to have resulted from leaking tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Applied Materials is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of contamination of ground water and soils. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. The plant received Interim Status under the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. Status January 1986): The company has installed and is operating a system to pump and treat contaminated ground water. CRWQCB, in conjunction with EPA and the California Department of Health Services, is overseeing response actions at the site. Site investigations and cleanup continue to be regulated by the

board s Waste Discharge Requirements. This site remains in proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Hard Ranking System, which EPA uses to evaluate sites for the NPL, is above the cutoff point of 28.50, and EPA received no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL.

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: IGNITABLE WASTE

Waste Code: D002  
Waste Description: CORROSIVE WASTE

Waste Code: D003  
Waste Description: REACTIVE WASTE

Waste Code: D004  
Waste Description: ARSENIC

Waste Code: D006  
Waste Description: CADMIUM

Waste Code: D007  
Waste Description: CHROMIUM

Waste Code: D008  
Waste Description: LEAD

Waste Code: D009  
Waste Description: MERCURY

Waste Code: D011  
Waste Description: SILVER

Waste Code: D015  
Waste Description: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

Waste Code: D035  
Waste Description: METHYL ETHYL KETONE

Waste Code: F002  
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F003

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F005

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

P030

Waste Description:

CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code:

P096

Waste Description:

HYDROGEN PHOSPHIDE (OR) PHOSPHINE

Waste Code:

U003

Waste Description:

ACETONITRILE (I,T)

Waste Code:

U092

Waste Description:

DIMETHYLAMINE (I) (OR) METHANAMINE, N-METHYL- (I)

Waste Code:

U112

Waste Description:

ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code:

U134

Waste Description:

HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code:

U151

Waste Description:

MERCURY

Waste Code:

U154

Waste Description:

METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code:

U213

Waste Description:

FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

TSCA SUBMITTER

SUPERFUND NPL

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal June 24, 1988): Synertek, Inc. SI) manufactured electronics in five buildings on a 3.5-acre site at 3050 Coronado Boulevard in Santa Clara, Santa Clara County, California, from March 1978 to February 1985. SI, a subsidiary of Honeywell, Inc., operated a neutralization system consisting of three buried tanks during 1974-82. Building 1 is adjacent to the tank system, which was removed in April 1985. A buried tank for storing trichloroethylene TCE) and trichloroethane TCA) was installed in 1976 and removed in February 1985. According to California Regional Water Quality Control Board CRWQCB) files, the neutralization tank and solvent storage tank appear to have leaked. In 1985, Honeywell found TCE, TCA, and other chlorinated solvents in ground water on and off the site. Both the shallow and deep aquifers are contaminated. An estimated 300,000 people obtain drinking water from public wells within 3 miles of the site. Honeywell is constructing a single-well extraction system to pump contaminated ground water to the surface, route it through two air-stripping towers to remove contaminants, and discharge the treated water to the storm sewer. The discharge will be regulated under a permit issued by CRWQCB under the National Pollutant Discharge Elimination System. The pumping system is scheduled to be in operation shortly. Status October 4, 1989): Under CRWQCB orders, Honeywell is conducting a remedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action. The work is meeting the schedule outlined in the orders. Honeywell plans to remove a large concrete neutralization tank in the near future.

**Environmental Interest/Information System:**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

**SUPERFUND NPL**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER  
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail;. (b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., standby tank with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank).

CERS Description: Chemical Storage Facilities

Violations:  
Site ID: 405349  
Site Name: Vantage Data Centers V1-2820 Northwestern Parkway  
Violation Date: 05-26-2020  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
Violation Description: Failure to include in the SPCC Plan an adequate facility diagram, or no facility diagram included. The facility diagram is not required on a Tier I qualified facility SPCC Plan.  
Violation Notes: Facility Tank diagrams show no connections/fuel piping. Provide fuel tanks connected with generator tanks as well as show stacked tanks as two connected tanks. Total number of tanks did not match tanks on site, maybe because there was no temporary fuel tank stored on site. Provide a schematic tank diagram for the site as a single page with fuel piping connections for inspection to correlate the V1-V5 separate pages.

Violation Date: 05-26-2020  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.

Violation Notes: Provide leak sensor testing records for Fuel and oil tanks (number them individually), this shall contain name of tester, date/time, and result of test. Note- testing is done weekly but Record is not available.

POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 04/16/2014  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. Intel Corporation used the Site to perform quality control of chemicals and electrical testing of semiconductors. The Site was listed on the National Priorities List in 1986 and the U.S. Environmental Protection Agency (EPA) issued a Record of Decision (ROD), which selected a remedy for the site with groundwater extraction and treatment as a primary component. The groundwater extraction and treatment system was operated nine years up through 1994. A trial monitored natural attenuation (MNA) program was initiated after groundwater extraction and treatment ceased. The Regional Water Quality Control Board provided oversight of the cleanup activities until EPA assumed oversight in 2006. EPA changed the remedy to MNA in a September 2010 ROD Amendment and continues to oversee the cleanup of the Site. DTSC recommended that the Site status be identified as Refer to EPA.

**CA BOND EXP. PLAN:**

Reponsible Party: NPL SITE CLEANUP WORKPLAN  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: Intel Corporation, the responsible party, is conducting remedial activities under the direction of the RWQCB. DHS has budgeted \$50,000 for development, review and approval of a RAP and will seek to recover all costs from the responsible party.

Site Description: Intel Corporation operates a microprocessor testing facility at this four acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in above-ground drums and an underground storage tank.

Hazardous Waste Desc: Soil and shallow ground water at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA) and dichloroethylene (DCE). The source of contamination has not been identified.

Threat To Public Health & Env: Approximately 300,000 people residing within a three-mile radius of this site depend on local ground water for drinking water. This ground water is derived from a deep aquifer. It is not known if this deep aquifer is hydraulically connected to the contaminated shallow zone at the site. While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and 23 of the 27 City of Santa Clara municipal wells are located within a 3-mile radius of the site. The 27 City of Santa Clara municipal wells supply about 8 percent of the City's water. The closest municipal well to the site is City of Santa Clara well No. 21, which is 4,000 feet from the nearest contaminated monitoring well at the site.

Site Activity Status: Use of the acid neutralization system for waste solvents has been discontinued. Ground water monitoring wells and extraction wells have been installed. Contaminated ground water is currently being pumped at a rate of 23,000 gallons per day and is subjected to carbon adsorption treatment prior to discharge into the San Tomas Aquino Creek and the South San Francisco Bay. The RWQCB has requested additional investigations to identify contamination sources.

Background Info: Approximately 300,000 people residing within a three-mile radius of this site depend on local groundwater for their drinking water. This groundwater is derived from a deep aquifer.  
While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and twenty-three of the twenty-seven City of Santa Clara municipal wells are located within a three-mile radius of the site. The twenty-seven City of Santa Clara municipal wells supply about eight percent of the City's water. The closest municipal well to the site is City of Santa Clara Well #21, which is 4,000 feet from the nearest contaminated monitoring

well at the site.

Intel Corporation operates a microprocessor testing facility at this four-acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in above-ground drums and an underground storage tank.

Soil and shallow groundwater at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA), and dichloroethylene (DCE).

Comments Date: 01101990

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address: 2895 NORTHWESTERN PARKWAY  
City,State,Zip: SANTA CLARA, CA 95051  
Region: STATE  
**Facility Status:** **Open - Verification Monitoring**  
Status Date: 08/30/2018  
Global Id: T10000009577  
Lead Agency: SANTA CLARA COUNTY LOP  
Lead Agency Case Number: 2016-39s  
Latitude: 37.37375  
Longitude: -121.97151  
Case Type: Cleanup Program Site  
Case Worker: AC  
Local Agency: SANTA CLARA COUNTY LOP  
RB Case Number: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affected: Soil  
Potential Contaminants of Concern: Arsenic, Lead  
Site History: The Site comprises approximately 1.68-acres of land located at 2895 Northwestern Parkway in Santa Clara. The Site was previously developed with a commercial office building, paved parking lot, and limited landscaping. Redevelopment of the Site included demolition of

the existing single-story structure and construction of a new two-story commercial building with landscaping and paved parking. Redevelopment also included construction of an external electrical equipment pad in the northeastern portion of the Site. Excluding foundations and utilities, proposed Site improvements were completed from the ground up with no subterranean basements or structures. Accordingly, the majority of grading and excavation involved handling of surface and near-surface soils (typically less than 3 feet below grade). Results of the 2016 TRC investigation indicated that total arsenic and lead were present in the Site soils at concentrations exceeding the background concentration or environmental screening levels (ESLs) for residential and/or construction worker land use, and soluble lead was present at concentrations exceeding the STLC value. As such, arsenic and lead are considered chemical of concern (COCs) for the Site. Approximately 7,500 square feet of the landscaped areas were excavated to 2 feet below grade, or until reaching concrete-encased utilities, and backfilled with clean cap soil and landscaping soil. The excavated soil was classified as Class I waste and transported to an appropriate landfill under the supervision of Teichert Construction. In total, approximately 6,436.5 tons of soil were hauled as Class I waste to Republic Services Environmental landfill in East Carbon Utah.

CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill( To Include On-Site Treatment And/Or Stabilization)
Tons:	129.49360
Year:	2019
Gepaid:	CAD047897855
TSD EPA ID:	CAD008302903
CA Waste Code:	791 - Liquids with pH <= 2
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.58600
Year:	2019
Gepaid:	CAD047897855
TSD EPA ID:	CAD008302903
CA Waste Code:	343 - Unspecified organic liquid mixture
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	25.20150
Year:	2019
Gepaid:	CAD047897855
TSD EPA ID:	CAD008302903
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)

Region: STATE  
**Facility Status: Completed - Case Closed**  
Status Date: 10/31/2011  
Global Id: SL18362782  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.380185  
Longitude: -121.973597  
Case Type: Cleanup Program Site  
Case Worker: UUU  
Local Agency: Not reported  
RB Case Number: 43S0556  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Not reported  
Site History: The site had solvent releases from two sources. A release of TCA from a truck loading area. A release of PCE from a sanitary sewer line. A groundwater extraction system was installed at the truck loading area and groundwater was extracted and concentrations of TCA significantly reduced. The extraction system was turned off when solvent concentrations reached asymptotic levels in the extracted groundwater. The sanitary sewer where PCE was released was excavated and replaced. The site was then put under monitored natural attenuation. It was closed in October 2011.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 04/17/2014  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. The U.S. Environmental Protection Agency (EPA) placed the Site on the National Priorities in May 1986. Groundwater

at the Site is contaminated with volatile organic compounds, which is believed to have resulted from surface spills and a leak from an underground storage tank. EPA selected a remedy for the Site with groundwater pump and treat as the primary component in a 1991 Record of Decision. A groundwater extraction treatment system was operated until 1996 and monitored natural attenuation (MNA) has been the de facto remedy at the Site since system operation ceased. The Regional Water Quality Control Board was lead agency overseeing cleanup at the Site until July 2006, when EPA took over as the lead agency. EPA has not yet formally documented the change in the remedy to MNA in an Explanation of Significant Differences or ROD amendment. DTSC concluded that the site status should be "Refer to EPA".

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 06/08/2016  
Comments: DTSC updated the site screening completed in 2014 based on new information included in a Facility Closure Report and provided by California Environmental Management Service Company, Inc., the consultant for Micro-Chem. Micro-Chem ceased operations in October 2015 and surface wipe samples and soil samples were collected in March and April 2016 as part of facility closure activities that were overseen by the City of Santa Clara Fire Department. One section of drywall was removed and disposed as hazardous waste due to copper (8,000 micrograms per wipe). The concentrations of lead, arsenic, and cyanide detected in soil samples were below the applicable DTSC screening levels or U.S. EPA Regional Screening Levels for residential (i.e. unrestricted) land use. The Santa Clara Fire Department signed off on both the final hazardous materials closure of the Micro-Chem facility and the final closure of the wastewater treatment unit that had been operated under permit-by-rule. The Site is located on a property that is part of the Intel Magnetics/Micro Storage Corporation (IM/MS) Superfund Site, but Micro-Chem has not been identified by the U.S. Environmental Protection Agency as a responsible party for the IM/MS Superfund Site. The updated site screening recommended a "No Further Action" status for the site/facility.

CA BOND EXP. PLAN:

**Actual:**  
**43 ft.**

Responsible Party: RWQCB REFERRAL SITE  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: The Synertek site is proposed for the National Priority List. The RWQCB will continue to have lead responsibility for monitoring the RP's remedial activities. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site.  
Site Description: Synertek Buildings #1 and #3 are located near the intersection of Stender Way and Coronado Drive in Santa Clara. The site occupies about two acres and is surrounded by residential, industrial and commercial development.  
Hazardous Waste Desc: The volatile organic compounds present in the ground water at the site include trichloroethylene (TCE), trichloroethane (TCA), dichloroethane (DCA), dichloroethene (DCE), trans-1,2-dichloroethylene (DCE), vinyl chloride, Freon 113, acetone, xylenes, ethylbenzene, chloroethane, toluene, methyl ethyl ketone and methyl isobutyl ketone.  
Threat To Public Health & Env: About 300,000 people living within 3 miles of the site depend on ground water as a source of drinking water. Contaminants which have migrated from the site into the ground water represent a potential threat to aquifers used for drinking water.  
Site Activity Status: Soil borings in the vicinity of underground storage tanks indicated leakage from the tanks. In 1985, Honeywell (the owner of Synertek) removed underground

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 03/31/1993  
Comments: The site is being overseen by the SFRWQCB pursuant to Order No. 91-119. The report which was the basis for this screening was produced pursuant to this order. The groundwater is contaminated with organic solvents. The following chemicals are listed followed by the highest result for the last round of analysis. (March or June '92): Dichlorethane(1.8 ppm), Dichloroethylene(13 ppm), Perchloroethylene(<2 ppm), Trichloroethane(17ppm), Trichloroethylene(140 ppm), and Freon 113(90ppm). VOC concentrations have decreased approximately 40 to 70 percent since groundwater extraction began in Jan. 1991. dn5

Reponsible Party:

NPL SITE CLEANUP WORKPLAN

Project Revenue Source Company:

Not reported

Project Revenue Source Addr:

Not reported

Project Revenue Source City,St,Zip:

Not reported

Project Revenue Source Desc:

Intel Corporation, the responsible party, has been conducting remedial activities under the direction of the RWQCB. DHS has budgeted \$50,000 for oversight and monitoring of the RP's cleanup activities. DHS will recover 100 percent of direct costs plus staff costs and overhead related to this project. Intel Corporation operates a microprocessor testing facility at this one acre site. The site is located adjacent to other industrial and commercial development. Chemical used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and in an underground storage tank.

Site Description:

Hazardous Waste Desc:

Soil and shallow ground water at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA) and dichloroethylene (DCE). The source of contamination has not been identified.

Threat To Public Health & Env:

Approximately 300,000 people residing within a 3-mile radius of this site depend on local ground water for drinking water. This ground water is derived from a deep aquifer. It is not known if this deep aquifer is hydraulically connected to the contaminated shallow zone at the site. While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and 20 of the 27 City of Santa Clara municipal wells are located within a 3-mile radius of the site. The closest municipal well to the site is City of Santa Clara well No. 21. This well is located approximately 2,800 feet from the nearest contaminated monitoring well.

Site Activity Status:

An underground storage tank which was used to store solvents at the facility has been removed and a system of ground water monitoring and extraction wells has been installed. Contaminated ground water is currently being pumped at a rate of 12,000 gallons per day and is treated by carbon adsorption prior to discharge into the Calabasas Creek and the South San Francisco Bay. Intel Corporation has completed their investigation to characterize the nature and extent of ground water contamination. The RWQCB has concluded that contamination is mainly from sources off the site. The RWQCB has issued an order to conduct additional RI/FS work.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments: Phase I checklist indicates no further action. This has not been verified by DTSC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 05/07/2014  
Comments: In 1974, Synertek leased the Site for semiconductor manufacturing. The Site is currently occupied by Crystal Solar. Groundwater contamination was discovered at the Site in 1982. The identified sources of the groundwater contamination were solvent and neutralization tanks. The U.S. Environmental Protection Agency (U.S. EPA) listed the Site on the National Priorities List in 1989; however, the Regional Water Quality Control Board (RWQCB) has been overseeing the cleanup of the Site. Honeywell, who acquired Synertek in 1979, operated a groundwater extraction and treatment from 1987 to 2001, when a trial period of monitoring natural attenuation was begun. U.S. EPA's 2012 Fourth Five-Year Review stated that 1,1-TCA and Freon-113 were below cleanup standards in all wells. The Report concluded that TCE is the main contaminant of concern. The Five-Year Review recommended that alternative remedies be evaluated for the Site. The 2013 CH2M Hill Focused Feasibility Study recommended enhanced in-situ bioremediation followed by monitored natural attenuation. The Site's history indicates that it is actively being managed by U.S. EPA and RWQCB. In the site screening, DTSC made a "Refer to RWQCB" status recommendation.

File Location: Not reported  
Potential Media Affected: Not reported  
Potential Contaminants of Concern: Not reported  
Site History: No Water Board oversight of cleanup at this site. This case is included in Geotracker because the site is covered by the Water Boards NPDES general permits for discharges from pump and treat systems to surface waters (one each for fuels- and VOC-impacted sites). This can happen for two reasons: (i) the site is overseen by another agency (e.g., USEPA or DTSC) and needs coverage under one of the NPDES general permits or (ii) construction dewatering in an area of groundwater contamination necessitates NPDES general permit coverage. Including this case in Geotracker helps staff to receive and review required NPDES reports. Discharger received a Notice of Termination on March 12, 2009.

organic compounds (VOCs), trichloroethene, dichloroethene, trichloroethene and several other VOCs. The VOC concentrations in groundwater have been significantly reduced through groundwater extraction and treatment. The site is currently under monitored natural attenuation status. A pilot test of enhanced in-situ bioremediation (EISB) has been carried out. The results of the pilot test show that EISB is effective in breaking down VOCs. A proposal for expanding the EISB treatment to further reduce VOC concentrations in groundwater has been submitted.

Background Info: Synertek #1 was added to the National Priorities List (NPL) in September 1989 and is currently under the oversight of the San Francisco Regional Water Quality Control Board.  
Not reported  
Synertek Inc, a subsidiary of Honeywell Inc, manufactured semiconductor products in the Synertek #1 facility from 1978 to 1988. Between 1974 and 1982, one 100-gallon solvent tank and three neutralization tanks were installed at the Site. These tanks were found to be the source of the soil and groundwater contamination. The tanks and contaminated soil was removed in 1985. Groundwater is being remediated.

**Facility Status:** **Open - Inactive**  
Status Date: 01/09/2020  
Global Id: SL0608535818  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.3775578532633  
Longitude: -121.982381343842  
Case Type: Cleanup Program Site  
Case Worker: MD  
Local Agency: Not reported  
RB Case Number: 43S0224  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE)  
Site History: A groundwater pollutant plume containing TCE and DCE originates at the southern edge of Central Expressway near Oakmead Village Drive, Santa Clara. The plume extends across Central Expressway as far as Scott Boulevard. The plume is currently under monitored natural attenuation status.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 04/10/2014  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. The Regional Water Quality Control Board (RWQCB) issued cleanup requirements in 1987 and rescinded the cleanup order in 2001. The 2001 order noted that vinyl chloride was present in groundwater at concentrations up to 3 parts per billion (ppb), exceeding the cleanup level of 0.5 ppb; however, shallow groundwater at the site was not extracted for drinking water or any other use. A drive-by inspection of the site by DTSC in October 2013 revealed that the one building on the site was currently occupied and paved around the perimeter. There were no observations indicating that there had been a release of hazardous waste. DTSC concluded that the site status should be "Refer to RWQCB".

Reponsible Party: NPL SITE CLEANUP WORKPLAN  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: Applied Materials, the responsible party, has been conducting remedial activities under the direction of the RWQCB. DHS has budgeted \$50,000 for oversight and monitoring of the RP's cleanup activities. DHS will seek cost recovery for 100 percent of direct costs plus staff costs and overhead related to the project. The responsible party will pay all costs associated with site investigation and remediation.  
Site Description: Applied Materials operates a semiconductor equipment manufacturing facility at this site. The site encompasses 9 acres and is surrounded by industrial and commercial development.  
Hazardous Waste Desc: Soil and ground water contamination were reported in 1984. The source of

contamination were two acid neutralization tanks and one waste solvent tank. The following contaminants have been detected in soil and ground water: trichloroethane (TCA), trichloroethylene (TCE), dichloroethylene (DCE), dichloroethane (DCA).

Threat To Public Health & Env: About 300,000 people living within 3 miles of the site depend on ground water as a source of drinking water. Contaminated ground water at the site represents a potential threat to the water supply system. City of Sunnyvale's municipal well, No. 21, is located 0.7 miles upgradient of the site.

Site Activity Status: In 1985, the underground tanks were removed and approximately 60 cubic yards of contaminated soil surrounding the tanks were removed. A ground water extraction system has been installed. The extracted water is treated and discharged to a storm sewer leading to a tributary to San Thomas Aquino Creek.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 02/05/2016  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. Applied Materials, Inc. began operations in the building on the Site (Building 1) in 1970 as a semi-conductor wafer manufacturing facility. Applied Materials discovered volatile organic compounds downgradient from three underground storage tanks in November 1983 and implemented a full-scale groundwater monitoring, extraction, and treatment program in 1985. The United States Environmental Protection Agency (EPA) included the Site on the National Priorities List in 1987. EPA signed Records of Decision in 1990 and 1993. Groundwater extraction and treatment and institutional controls were selected as the remedy for groundwater. Groundwater extraction and treatment was implemented from 1985 through 2002. The Regional Water Quality Control Board was the lead regulatory agency overseeing investigation and cleanup until transferring the Site back to EPA in 2006. Limited groundwater extraction and treatment was

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F005

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F006

Waste Description:

WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code:

F007

Waste Description:

SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code:

F008

Waste Description:

PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code:

F009

Waste Description:

SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Evaluation Action Summary:

Evaluations:

No Evaluations Found

WDS:

Name: SYNERGY SEMICONDUCTOR  
Address: 3250 Scott Blvd  
City: SANTA CLARA  
Facility ID: San Francisco Bay 43I014928  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 2  
Facility Telephone: 4089809191  
Facility Contact: THOMAS WENGER  
Agency Name: SYNERGY SEMICONDUCTOR  
Agency Address: 3250 Scott Blvd  
Agency City,St,Zip: Santa Clara 950543011  
Agency Contact: THOMAS WENGER  
Agency Telephone: 4089809191  
Agency Type: Private  
SIC Code: 0  
SIC Code 2: Not reported  
Primary Waste Type: Not reported  
Primary Waste: Not reported  
Waste Type2: Not reported  
Waste2: Not reported  
Primary Waste Type: Not reported  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 10/27/1992  
Comments: The present level of contamination at the site poses a significant threat to public and environmental health. Therefore, PEA of high priority is recommended. The site consists of two manufacturing facilities operated by Kawasaki Wafer Technology (KAWATEC). Both onsite soil and groundwater were contaminated. Soil was contaminated by heavy soils and perchloroethylene (PCE) beneath the drum storage area at the site. The solvents found were primarily perchloroethylene (PCE) (440 ppb) and trichloroethylene TCE-(430 ppb), and some of their breakdown products. One of the solvents, PCE (100 ppb), has migrated to the upper most aquifer in both identified source areas. The current levels of contaminants at both soil and groundwater exceeded the state action levels and pose a significant threat to

public and environmental health. Based on available information, there is an observed release at the site. Therefore, PEA investigation and risk assessment are required to determine the current status of the site and evaluate the existing risk.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 06/08/2000  
Comments: Site cleaned up under RWQCB oversight.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Characterization Report  
Completed Date: 07/08/1991  
Comments: PCE was detected in soil and groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 08/14/1991  
Comments: Soil excavation and soil vapor extraction recommended for the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 10/03/1991  
Comments: 1,158 cubic yards of contaminated soil was removed from the site and transferred to a Class 1 landfill.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 09/01/1992  
Comments: A soil vapor extraction system was operated for 6 months and shut down for 2 months. Groundwater sampling showed that PCE was below detection limit.

hazardous substances or wastes have occurred at the site that require corrective actions. The building on the site was constructed in 1963 and used by Hunter Technology, Corp. which was an electronics engineering and manufacturing business. The DTSC Hazardous Waste Tracking System database (HWTS) lists manifests for hazardous waste that was transported from the site for disposal from 1993 to 2014. HWTS lists the facility on the site as being inactive as of June 2014. The building was vacant as of January 2015. The soil samples taken from the site in 2014 had high levels of toxaphene and chlordane. Soil vapor samples had concentrations of PCE exceeding the Regional Water Quality Control Board Environmental Screening Level for residential land use. Investigation and cleanup of the site is currently being overseen by the Santa Clara County Department of Environmental Health, Site Mitigation Program.

Name:	HUNTER TECH
Address:	3305 Kifer Rd
City:	SANTA CLARA
Facility ID:	San Francisco Bay 43I009282
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History: The 30.2 -acre Site is currently vacant land with no structures. Paved parking areas on the southern and southeastern portion comprise approx. 6.75 acres. The remaining 23.45 acres are grass-covered, with well-maintained landscaped grass areas along the south side. Developed for agricultural use including orchards since as far back as 1937 until about 1977-78 when the Site was developed with a large commercial/industrial structure and occupied by Sperry Corp. (Sperry) from 1978-1983. Magnetic Peripherals, Inc. (MPI) took over operations from Sperry in 1983. The Site was used for the assembly of computer disk drives until 1986 and has been vacant of tenants since that time. The Site changed ownership several times due to business acquisitions, until approximately 1994 when Applied Materials, Inc. (Applied) purchased the Site. At that time it was occupied by a large manufacturing/commercial building occupying 410,000 square feet of land and surrounded by parking lots and landscaping. In 1983, VOCs including trichloroethene (TCE) and Freon-113 were detected in groundwater in the vicinity of the former chemical storage; 1,1,1-trichloroethane (TCA), TCE, Freon-113, chloroform and methyl-ethyl ketone (MEK) were also detected in groundwater in the vicinity of the former Mendocino Tank Farm. Integrity testing of the underground piping indicated fluid loss in the pipe draining the former chemical storage building. In 1985 and 1986, the USTs and piping were removed. No sources of contamination were identified during removal of the USTs. Historically, three VOC groundwater plumes were associated with the Site. A narrow TCE plume (up to 40 g/L) extending from the vicinity of the chemical storage area to the northwest corner of the main building. A wider cis-1,2-dichloroethene (DCE) plume (100 to 300 g/L) on the north side of the main building extending up-gradient beneath the former building and downgradient to the northern property boundary. A Freon-113 plume (less than 1,200 g/L) extending from the former chemical storage building to the northern property boundary and beyond. Approximately 34 groundwater monitoring wells were installed between 1983 and 2003; a groundwater extraction and treatment system operated from August 1986 to May 1994, removing approximately 86 million gallons of groundwater and approximately 157 pounds of VOCs. The groundwater extraction system was discontinued with regulatory approval in 1994 because the remediation system was no longer cost effective. In 1993, the RWQCB issued Order No. 93-163 (1993 Order) for the Site. The soil and groundwater samples showed no detectable concentrations of VOCs except methylene chloride in two soil samples at concentrations up to 0.0064 milligrams per kilogram (mg/kg); methylene chloride is a typical laboratory contaminant. In addition, Freon was detected in groundwater at concentrations up to 75 %g/L,

which is below State of California action levels. In 1995, Applied demolished the improvements at the Site, and eleven additional wells were sealed and destroyed with concurrence of the RWQCB. As required by Task 5 of the 1993 Order, Applied investigated potential sources of soil and groundwater contamination beneath and adjacent to the former on-site building. Prior investigations have indicated no evidence of residual VOCs above regulatory screening levels in the soils underlying the Site. Thirty-two soil samples were collected from a total of 38 test pit excavations near the former Mendocino Tank Farm and chemical storage spill containment tank both beneath and adjacent to the former building (Table 1, Figure 2). In addition, a total of 23 grabgroundwater samples were collected to further delineate the extent of the cis-1,2-DCE groundwater plume. Unisys concluded that residual concentrations of VOCs (i.e. TCE and 1,2-DCE) do not exist in soils underlying the Site in concentrations greater than the laboratory method detection limit of 0.005 mg/kg and do not suggest that sources of VOCs remain in soil. Details are presented in Unisys Post-Demolition Investigation Report, dated July 20, 1995. In 2005, the RWQCB issued Order No. R2-2005-0027, Rescission of Site Cleanup Requirements Order No. 93-163 (2005 Order). The 2005 Order stated that the groundwater extraction system reduced groundwater pollution to asymptotic levels. Subsequent monitoring showed no evidence of a rebound in VOC concentrations in groundwater. Risk management measures are noted as sufficient to protect human health and the environment in the future. A deed restriction had been recorded with the County of Santa Clara on May 9, 1994. This risk-management measure is noted as needing to be in place %for an indefinite period of time to assure protection of human health and the environment%. The document indicates that natural processes will reduce concentrations of chemicals in groundwater to drinking water standards before groundwater may be needed for water supply purposes.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: \* Discovery  
Completed Date: 12/04/1989  
Comments: Facility identified via EPA Federal Investigation Team (FIT) Screening Site Inspection (SSI) Report.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 07/01/1991  
Comments: Site Screening Done: LSI planned by EPA based on completed EPA SSI. Since 1965, Zep has manufactured hand soaps, degreasers, floor cleaners, detergents, and disinfectants at this three- acre facility comprised of two buildings. A 2000-gallon below-grade concrete sump that was used to collect waste- water until 1984 apparently leaked and contaminated sub- surface soil and the uppermost aquifer underlying the site with hazardous organic compounds including phenol, mineral spirits, methylene chloride, trichloroethane, tetrachloro- ethylene, chlorobenzene, dichloroethylene, and dichloro- ethane. Soil borings and subsequent groundwater investigations have identified the abandoned sump as the origin of contamination. Presence of TCA in a downgradient municipal drinking water well has confirmed the inter- connection between the uppermost and the lower aquifers and spread of the contaminant plume. Currently, evaluation of clean alternatives is in progress with oversight by the RWQCB. Documented release of hazardous chemicals in drinking water has been observed. The target population for groundwater use is significant,

Lead Agency Case Number: Not reported  
Latitude: 37.375462  
Longitude: -121.988657  
Case Type: Cleanup Program Site  
Case Worker: MD  
Local Agency: Not reported  
RB Case Number: 43S0198  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
Site History: The site has had a release of the solvent trichloroethene (TCE) to soil and groundwater. A plume of contaminated groundwater containing TCE and its breakdown products has migrated offsite. A groundwater extraction and treatment system was operated at the site and the groundwater pollutant concentrations were significantly reduced.

Completed Document Type: Land Use Restriction  
Completed Date: 02/19/2019  
Comments: DTSC and Augustine Bowers II LLC executed a Land Use Covenant that was recorded with Santa Clara County. The Land Use Covenant restricts land use and activities within approximately 2 acres of the Site that is comprised of three soil consolidation cells within the asphalt parking area and the root zones of one protected redwood tree.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported

Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Plan  
Completed Date: 01/05/2018  
Comments: The Long-Term Operation and Maintenance Plan describes the soil management procedures if impacted soil is disturbed in the three consolidation cells and the tree protection zone, which consists of a limited area surrounding a protected redwood tree. The Plan also discusses the annual inspection and reporting that is to be performed to verify compliance with the restrictions and requirements of the land use covenant and to ensure the integrity of the caps over the consolidation cells and tree protection zone.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 09/15/2016  
Comments: The selected response action identified in the Response Plan is relocation and consolidation of impacted shallow soil on-site beneath a cap (paved parking lots, buildings, or 2 feet of clean soil in landscaped areas) and recordation of a land use covenant. When the Response Plan was implemented, the consolidation was limited to paved parking lots, and excess soil that could not be placed below the parking lots was disposed at off-site permitted landfills. Impacted soil, inaccessible in a limited area surrounding a protected redwood tree, was left in-place.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Responsible Agency Review  
Completed Date: 07/25/2014  
Comments: NOD filed on 7/28/2014.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction  
Completed Date: 02/19/2019  
Comments: DTSC and Augustine Bowers II LLC executed a Land Use Covenant that was recorded with Santa Clara County. The Land Use Covenant restricts land use and activities within approximately 2 acres of the Site that is comprised of three soil consolidation cells within the asphalt parking area and the root zones of one protected redwood tree.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: California Land Reuse and Revitalization Agreement  
Completed Date: 06/20/2014  
Comments: DTSC and The Irvine Company LLC executed a California Land Reuse and Revitalization Act Agreement.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Plan  
Completed Date: 01/05/2018  
Comments: The Long-Term Operation and Maintenance Plan describes the soil management procedures if impacted soil is disturbed in the three consolidation cells and the tree protection zone, which consists of a limited area surrounding a protected redwood tree. The Plan also discusses the annual inspection and reporting that is to be performed to verify compliance with the restrictions and requirements of the land use covenant and to ensure the integrity of the caps over the consolidation cells and tree protection zone.

Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 12/11/2014  
Comments: The Report includes the results of a soil characterization and pre-excavation confirmation sampling program that was conducted at the Site to document the nature and extent of soil exceeding the Response Plan remedial goals. A soil excavation plan to determine the volume of soil to be removed was developed based on the results of the soil characterization and pre-excavation confirmation sampling program.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 09/15/2016  
Comments: The selected response action identified in the Response Plan is relocation and consolidation of impacted shallow soil on-site beneath a cap (paved parking lots, buildings, or 2 feet of clean soil in landscaped areas) and recordation of a land use covenant. When the Response Plan was implemented, the consolidation was limited to paved parking lots, and excess soil that could not be placed below the parking lots was disposed at off-site permitted landfills. Impacted soil, inaccessible in a limited area surrounding a protected redwood tree, was left in-place.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction  
Completed Date: 02/12/2016  
Comments: Land Use Covenant recorded on 2/2/2016 at Santa Clara County Recorder.  
Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 10/04/2013  
Comments: The original Request for Agency Oversight included 8 parcels and proponent decided to split the project into two separate sites. This Site now consists of 3 parcels and Augustine Bowers LLC is the proponent.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 08/30/2013  
Comments: DTSC will be the lead agency for the site

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 11/20/2013  
Comments: Notification of DTSC's intent to enter into CLRRRA agreement to City of Santa Clara and Santa Clara County.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: California Land Reuse and Revitalization Agreement  
Completed Date: 01/16/2014  
Comments: CLRRRA Agreement between DTSC and Augustine Bowers LLC was executed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Responsible Agency Review  
Completed Date: 01/16/2014  
Comments: DTSC filed a Notice of Determination with the State Clearinghouse on 1/17/2014 in compliance with the California Environmental Quality Act.  
Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 02/17/2016  
Comments: DTSC has determined that all appropriate response actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing verification of compliance with the restrictions and requirements of the Land Use Covenant.

Completed Area Name: PROJECT WIDE

Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 12/17/2014  
Comments: The selected response action identified in the Response Plan included relocation and consolidation of impacted shallow soil on-site, beneath the parking structure, buildings, parking lot, and landscaped areas and recordation of a land use covenant. The consolidation was limited to the parking structure footprint, and excess soil that could not be placed below the parking structure was disposed at off-site permitted landfill facilities. Impacted soil, inaccessible in limited areas surrounding protected redwood trees, was left in-place.

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 12/22/1987  
Comments: The Department of Health Services, Toxic Substances Control Division provided comments on the letter from Varian Solid State Microwave Division, dated November 9, 1987, in which Varian responded to a Report of Violations issued to the Varian facility located at 3251 Olcott Street. Copies of the Report of Violations and Varian's November 9, 1987 response letter are not available in DTSC's file.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 09/06/1991  
Comments: Not reported

Completed Area Name: PROJECT WIDE

Completed Date: 03/30/1981  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 09/07/1993  
Comments: Varian submitted to DTSC on September 7, 1993 a letter with documentation intended to demonstrate that they used less than 1,000 pounds of acids on a monthly basis during their occupancy of the site. Varian submitted this documentation to support their argument that they should not have to pay fees for the facility based on the quantity of acids used and the quantity of discharge from their acid neutralization system. Included with the letter are four attachments with the amounts of acids stored, their waste water reports, off-site shipments of corrosive wastes, and their rinse water pH calculations.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 03/18/1991  
Comments: Varian submitted to the U.S. Environmental Protection Agency a request to transfer their EPA ID No. CAT000625392 for the facility located at 3251 Olcott St to Litton, Solid State Division following the sale of the facility on February 25, 1991. Varian requested that their name be removed from the registration for the facility, and stated that they no longer assumed any responsibility for operations at the site. Varian indicated that Litton would submit a request for transfer as well. A copy of the request from Litton is not available in DTSC's file. There is not a copy of a response from U.S. EPA in

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 05/11/1984  
Comments: The Department of Health Services, Toxic Substances Control Division (DHS) sent a letter responding to the request from a variance from Varian Associates, Inc. Solid State Microwave Division (Varian) for a variance from the Hazardous Waste Permit requirements and to revoke their Interim Status Document (ISD). Varian made the request because they no longer stored wastes for more than 90 days at the facility. DHS denied the variance request, stating that there was concern over possible leakage of the contents of the sumps used for wastewater neutralization. DHS did indicate that they would modify Varian's ISD to reflect that they were not storing hazardous waste for more than 90 days. A copy of the Varian's request for a variance and to revoke the the ISD, reportedly made on May 6, 1983, could not be found in DTSC's file.

Click Here:

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1 Addendum  
Completed Date: 11/27/2013  
Comments: DTSC performed a site screening to determine whether any releases have occurred at the site that require corrective actions. Based on information gathered during the site screening, it was found that Varian Associates performed investigation and cleanup with oversight by the Regional Water Quality Control Board (RWQCB), including remediating groundwater contaminated with 1,1,1-trichloroethane. Therefore DTSC recommended no further action is required and that the site status be identified as refer to RWQCB.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Semiconductor, and STC Computer Research. An underground storage tank was used to store various waste solvents between 1981 and 1985. The UST was removed in July 1985. In September 1986, three groundwater monitoring wells were installed and sampled semi-annually between 1986 and 1990. Various volatile organic compounds (VOCs) were detected in groundwater. Another groundwater monitoring well was installed in 1990. The wells were resampled in 2009 and the VOCs were at or below the ESLs. The Regional Water Quality Control Board, San Francisco Bay Region, issued a no further action letter with a Case Closure Summary to the Sobrato Organization in October 2009.

Status Date: 10/05/2009  
Global Id: T0608591689  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.3772338761159  
Longitude: -121.992015838623  
Case Type: Cleanup Program Site  
Case Worker: UUU  
Local Agency: Not reported  
RB Case Number: 43S0786  
File Location: Regional Board  
Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Acetone, Trichloroethylene (TCE)  
Site History: Three firms previously operated on the site, all in the semiconductor industry: Zoran Corporation (manufactured integrated circuits), Synergy Semiconductor (acquired by Micrel, Inc. in 1988), and STC Computer Research (no longer exists). Solvent UST located on south side of building and operated 1981-1985, stored various solvents including TCE, removed in 1985. Single soil boring next to UST in 1983 didn't detect VOCs in soil or groundwater. Four monitoring wells installed (MW-1 west of building, MW-2 on southern property boundary, MW-3 near UST, and MW-4 on northern property boundary). Initial groundwater gradient was to NW, 3Q09 gradient is to NE. 3Q09 depth to groundwater is 7-9 feet bgs. Four wells detected low VOC levels in groundwater (max 44 ppb - 1,1-DCA in MW-3). 3Q09 well sampling found all VOCs at or below drinking water standards. All four wells properly destroyed in Sep'09.

Completed Info:

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Site Screening

Completed Date: 07/01/1991

Comments: EPA completed Preliminary Assessment and recommend NFA; DTSC needs to determine site status. Site Screening. In 1980, Granger Associates, a tele- communications equipment manufacturer, became the first tenant of this fully fenced facility comprised of 3 buildings, with a total area of 78,870 sq. ft. Between 1980 and 1985, Varian relocated. Granger continued its operation until 1990 when Digital Switch Communication Corp. (DSC) bought them out. While information about Granger's process and waste management is not available, Varian used hydrochloric & nitric acid, caustic soda, & trichloroethane (TCE), and Granger used freon-113, butyl hethyl alcohol in their respective processes. Both have historically stored their waste at site for periodic transportation and disposal by specialty contractors. However, several accidental spillages have been recorded. Such spillages and probable leakage from a subsurface containment sump account for the detection of TCA, TCE, & PCE, along with various metals in soils groundwater at site. The site is underlain by two aquifers of which the lower is used for drinking water.

**Environmental Interest/Information System:**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

**TSCA SUBMITTER**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Operations and Maintenance Plan Amendment  
Completed Date: 01/04/2013  
Comments: Intel submitted an Addendum to the Operation and Maintenance Plan that presented the following: 1) an evaluation of current receptors and exposures on the three parcels making up the Intel Freedom Circle Site (Site); 2) results of additional soil sampling conducted on Parcel 3; and 3) revised Figures 2 and 3 and protocol for inspection of Parcel 3 based on the recent and previous sampling results. DTSC has concurred with the conclusion in the Addendum that immediate asphalt maintenance in Parcel 3 is required only when any breaches, holes, and gaps that may result in exposure to soils one foot or more below the existing surface are identified during the annual inspections.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \* Land Use Restriction Monitoring Report  
Completed Date: 03/05/2012  
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the Land Use Covenant. Numerous cracks were observed in Parcel 3. However, Intel is collecting soil samples for arsenic analysis on Parcel 3 for the purpose of better defining the area requiring asphalt maintenance. DTSC will make a determination on Parcel 3 after the sampling results are evaluated. No activities prohibited by the Land Use Covenant were observed.

Completed Date: 02/21/2014  
Comments: Intel performed an annual inspection as required by the June 14, 2004 Operation and Maintenance Agreement. No breaches, holes in the clean soil/gravel and asphalt cap greater than one foot below the ground surface were observed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 02/22/2016  
Comments: The environmental consultant for Intel, the site owner, performed an annual site inspection in December 2015. The consultant observed during the inspection that all requirements of the Operation and Maintenance Agreement were met for Parcels 1 and 2. However, in Parcel 3 a hole was observed during the inspection that was excavated to repair an irrigation line and was filled in after the repair. DTSC approved the inspection report, but requested further information on the irrigation line repair because DTSC received no notification of the repair.

Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 02/23/2018  
Comments: On behalf of Intel Corporation, Weiss Associates, conducted a cap inspection of Parcels 1, 2 and 3 on 12/20/2017 and submitted a report summarizing the observations from site inspections and maintenance actions completed during 2017 as required by the site Operation and Maintenance Agreement. The report concluded that the observed Site conditions indicated that all requirements of the Operation and Maintenance Agreement were met during the reporting period .

Completed Document Type: Operations and Maintenance Plan Amendment  
Completed Date: 01/04/2013  
Comments: Intel submitted an Addendum to the Operation and Maintenance Plan that presented the following: 1) an evaluation of current receptors and exposures on the three parcels making up the Intel Freedom Circle Site (Site); 2) results of additional soil sampling conducted on Parcel 3; and 3) revised Figures 2 and 3 and protocol for inspection of Parcel 3 based on the recent and previous sampling results. DTSC has concurred with the conclusion in the Addendum that immediate

**Environmental Interest/Information System:**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 02/29/2016  
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Siliconix has been operating a semiconductor manufacturing facility on the site since around 1969. Siliconix has operated four hazardous waste treatment units under the Permit By Rule, Conditionally Authorized, and Conditionally Exempt Specified Wastestream permitting tiers, including an acid waste neutralization unit, hydrofluoric waste treatment unit, drum washer, and plating line. The site was identified as a source of downgradient groundwater contamination and the Regional Water Quality Control Board (RWQCB) began overseeing investigations at the site in 1987. Groundwater remediation began at the site in 1990. RWQCB continues to oversee cleanup at the site.

Status Date: 07/30/2002  
Global Id: SL20230848  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.3840427535581  
Longitude: -121.965721334702  
Case Type: Cleanup Program Site  
Case Worker: MJD  
Local Agency: Not reported  
RB Case Number: 43S0236  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE)  
Site History: This site has had a release of the solvent trichloroethene to soil and groundwater. There is a plume of TCE impacted groundwater that extends offsite. Cleanup is ongoing. Groundwater is being cleaned up via a groundwater extraction and treatment system.

Local Agency: Not reported  
RB Case Number: 43-1935  
File Location: Not reported  
Potential Media Affected: Soil  
Potential Contaminants of Concern: Gasoline  
Site History: On April 5, 2019, Celina Hernandez (Water Board staff) reviewed the data and concurred with the September 18, 1996, rescission of site cleanup requirements (Order 96-124) for 1871-1881 Martin Avenue in San Jose. Since issuance of the 1996 rescission, the property was redeveloped with a new commercial building with multiple office spaces. Ms. Hernandez received confirmation from the Santa Clara Valley Water District that the four groundwater monitoring were destroyed in 1996 and 1997. The case status was changed from open-site assessment to case closed." All records are under case file SL20220838.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 12/02/2020
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020  
Date Data Arrived at EDR: 11/05/2020  
Date Made Active in Reports: 11/25/2020

Next Scheduled EDR Contact: 04/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020

Next Scheduled EDR Contact: 01/25/2021  
Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/06/2020	Source: Department of the Navy
Date Data Arrived at EDR: 08/21/2020	Telephone: 843-820-7326
Date Made Active in Reports: 11/11/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 02/22/2021
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/27/2020

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/14/2020

Data Release Frequency: Quarterly

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/31/2020	Source: DTSC and SWRCB
Date Data Arrived at EDR: 08/31/2020	Telephone: 916-323-3400

Last EDR Contact: 01/03/2013

Next Scheduled EDR Contact: N/A

Data Release Frequency: No Update Planned

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Next Scheduled EDR Contact: 03/15/2021  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Next Scheduled EDR Contact: 02/01/2021  
Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2018	Source: Department of Energy
Date Data Arrived at EDR: 12/04/2019	Telephone: 202-586-8719
Date Made Active in Reports: 01/15/2020	Last EDR Contact: 12/01/2020
Number of Days to Update: 42	Next Scheduled EDR Contact: 03/15/2021
	Data Release Frequency: Varies

### COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 11/30/2020
Number of Days to Update: 251	Next Scheduled EDR Contact: 03/15/2021
	Data Release Frequency: Varies

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 11/06/2021
Number of Days to Update: 96	Next Scheduled EDR Contact: 02/15/2021
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 01/08/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/19/2006

Next Scheduled EDR Contact: 02/15/2021  
Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016  
Date Data Arrived at EDR: 10/26/2016  
Date Made Active in Reports: 02/03/2017

Data Release Frequency: Varies

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Date of Government Version: 09/16/2020

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### MINES: Mines Site Location Listing

A listing of mine site locations from the Office of Mine Reclamation.

Date of Government Version: 09/08/2020	Source: Department of Conservation
Date Data Arrived at EDR: 09/08/2020	Telephone: 916-322-1080
Date Made Active in Reports: 11/30/2020	Last EDR Contact: 12/08/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 03/22/2021
	Data Release Frequency: Quarterly

### MWMP: Medical Waste Management Program Listing

The Medical Waste Management Program (MWMP) ensures the proper handling and disposal of medical waste by permitting and inspecting medical waste Offsite Treatment Facilities (PDF) and Transfer Stations (PDF) throughout the state. MWMP also oversees all Medical Waste Transporters.

Date of Government Version: 08/31/2020	Source: Department of Public Health
Date Data Arrived at EDR: 08/31/2020	Telephone: 916-558-1784
Date Made Active in Reports: 11/20/2020	Last EDR Contact: 12/01/2020
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/15/2021
	Data Release Frequency: Varies

### NPDES: NPDES Permits Listing

A listing of NPDES permits, including stormwater.

Date of Government Version: 08/10/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/10/2020	Telephone: 916-445-9379
Date Made Active in Reports: 10/29/2020	Last EDR Contact: 11/09/2020
Number of Days to Update: 80	Next Scheduled EDR Contact: 02/22/2021
	Data Release Frequency: Quarterly

### PEST LIC: Pesticide Regulation Licenses Listing

A listing of licenses and certificates issued by the Department of Pesticide Regulation. The DPR issues licenses and/or certificates to: Persons and businesses that apply or sell pesticides; Pest control dealers and brokers; Persons who advise on agricultural pesticide applications.

Date of Government Version: 08/31/2020	Source: Department of Pesticide Regulation
Date Data Arrived at EDR: 08/31/2020	Telephone: 916-445-4038
Date Made Active in Reports: 11/20/2020	Last EDR Contact: 12/01/2020
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/15/2021
	Data Release Frequency: Quarterly

### PROC: Certified Processors Database

A listing of certified processors.

Date of Government Version: 09/08/2020	Source: Department of Conservation
Date Data Arrived at EDR: 09/08/2020	Telephone: 916-323-3836
Date Made Active in Reports: 12/01/2020	Last EDR Contact: 12/08/2020
Number of Days to Update: 84	Next Scheduled EDR Contact: 03/22/2021
	Data Release Frequency: Quarterly

### NOTIFY 65: Proposition 65 Records

Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

Date of Government Version: 12/07/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/09/2020	Telephone: 916-445-3846
Date Made Active in Reports: 12/10/2020	Last EDR Contact: 12/07/2020
Number of Days to Update: 1	Next Scheduled EDR Contact: 03/29/2021
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### UIC: UIC Listing

A listing of wells identified as underground injection wells, in the California Oil and Gas Wells database.

Date of Government Version: 09/08/2020	Source: Department of Conservation
Date Data Arrived at EDR: 09/08/2020	Telephone: 916-445-2408
Date Made Active in Reports: 12/01/2020	Last EDR Contact: 12/08/2020

	Data Release Frequency: Varies

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 11/19/2019	Source: RWQCB, Central Valley Region
Date Data Arrived at EDR: 01/07/2020	Telephone: 559-445-5577

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Data Release Frequency: Varies

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

##### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

##### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

##### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020

Date Data Arrived at EDR: 10/20/2020

Date Made Active in Reports: 11/02/2020

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.
