## **80+ Is not ok and neither are blackouts**

There is no way for us as a state to phase out literally burning s#!t like Neanderthal without adopting some form of on-demand power, and as our state withers and dries weâ€™ll even lose access to the little bit of clean and available power we do have. Nuclear power provides on-demand power with clean emissions. We can deal with the waste and danger through careful implementation and modern know-how, but power plants take a decade or longer to come online. We need to start funding new projects TODAY! Not next year, not next month but tomorrow. Letâ€™s move heaven and earth to save the earth and heavens.
