## **Request for CEC IRP to Consider Offshore Wind and Small Modular Reactors**

Sep 7 Hello CEC Manager:

Thank you for a copy of the above IRP-01 docket.

Based on a 1st cut reading, please find following question for your inputs;

Q1) ADD NEW BASELOAD GENERATION?

Can CEC recommend new nuclear power plants for California such as small modular reactors (SMRs) coupled with offshore wind (OSW)\* to meet the EV mandate which can be met with 20 new SMR/OSW systems (see attached concept)

Note: \* Am working on OSW concept to help CEC find solutions to the current blackouts, drought and wildfires and citizens leaving CA.

I had the privilege to consult for CEC to survey CA for wind energy and locate windy areas including San Geronio Pass, Tehachapi and Altamont Pass and build the pioneer land-based wind farms in CA and USA and pacific Rim totaling 3GW

Look forward to your reply.

Please call me or email me if you have questions.

Kind Regards,

Andrew D Zalay PE M24024
