Dear California Energy Commission,

I write to urge you to extend operations at the Diablo Canyon Power Plant.

From historic droughts and wildfires to record heat waves and erosion, the climate crisis poses an existential risk to California and our planet. The Diablo Canyon Power Plant is California's SINGLE LARGEST source of carbon free electricity. With the plant scheduled to close in 2025, California is unprepared to fill the energy void without turning to fossil fuels. The closure must be delayed.

Recently proposed legislation would do just that. I urge you to support this legislation to protect California's largest source of clean energy.

I sincerely appreciate your consideration and attention to this matter.

Sincerely,
Zachary Van Horn
