Docket: 18-IRP-01

Re: SMUD Integrated Resource Plan Filing

To whom it may concern:

SMUD hereby submits our updated 2022 Integrated Resource Plan prepared in accordance with Public Utilities Code section 9621 and the California Energy Commission's IRP Guidelines (Revised Second Ed., Oct. 2018).

SMUD's 2022 IRP filing is organized as follows:

- 2030 Zero Carbon Plan: Formally adopted as our 2022 IRP update, this is our roadmap for eliminating greenhouse gas (GHG) emissions from our electricity portfolio while maintaining affordable rates, reliable service, and equitable offerings for our customers.
- Enclosures:
 - Addendum 1: Resource Planning Report: This document provides supporting information and background on our 2022 IRP update. It also acts as a reference guide to aid CEC staff in their review of SMUD's 2022 IRP Filing. As such, it is placed before our IRP in the filing.
 - Enclosure A: SMUD Resolution No. 22-06-03. This is the Board resolution adopting our 2030 Zero Carbon Plan as our 2022 IRP
 - Enclosure B: Renewable energy procurement plan
 - Enclosure C: Load Forecast Methodologies report
 - Enclosure D: Standardized reporting tables
 - Enclosure E: SMUD Board Strategic Direction on Resource Planning (SD-9)

SMUD's vision is to eliminate greenhouse gas emissions from our electric generation supply by 2030; our 2030 Zero Carbon Plan presents a flexible road map to achieve our goal while ensuring all customers and communities we serve benefit from our plan. This 2022 IRP Filing provides supporting information describing background and methodologies as well as additional detail on the scenarios we considered in our assessment.

For questions regarding this filing, please contact Sara Elsevier at sara.elsevier@smud.org or Garry Mariscal at garry.mariscal@smud.org.

Sincerely,

Bryan Swann
Director, Resource Strategy
