Don't let the perfect be the enemy of the good

My comment is in reference to: 22-ALT-01.

It is my understanding that many of the rules and regulations for EVSC involve a robust wifi connection, ADA measures, payment processing, and networking. These requirements, while helpful in many cases, can be hurtful in others. Rural areas can be especially problematic. I am affiliated with a non profit that installs free-to-the-user charging at parks, colleges, museums, and other non-profit entities. In many cases, regulations can balloon the costs to a prohibitive level. Care should be taken to allow for some installations to be excluded from these onerous requirements.
