DOCKET NO. 21-ESR-01

NOTICE OF WORKSHOP ACCESSIBLE IN-
PERSON AND VIA ZOOM

RE: Clean Energy for Reliability

**Notice of Lead Commissioner Workshop on Clean Energy
Alternatives for Reliability**

October 28, 2022

Session 1

10:00 a.m. – 12:00 p.m.

and

Session 2

1:30 p.m. – 4:00 p.m.

In-person at:

Warren-Alquist State Energy Building
Rosenfeld Hearing Room, First Floor
1516 Ninth Street, Sacramento, California 95814
(Wheelchair Accessible)

Remote via Zoom™: See Attendance Instructions.

The California Energy Commission (CEC) will host a workshop to discuss clean energy resources that may support grid reliability. This information will be used to shape an assessment of portfolios of alternative resources to replace the Diablo Canyon Nuclear Power Plant. This is a hybrid meeting with both a publicly accessible physical location and public access online or by phone through Zoom™.

The public can participate in the workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is an estimate based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

In session one, staff will present an initial analysis of alternatives that will inform the cost comparison to extending the Diablo Canyon Nuclear Power Plant. Staff and consultants will describe the preliminary list of technologies and approaches for the analysis, share the preliminary characterization of the technologies, and seek input on the list and preliminary characterization of the alternatives.

In session two, staff will provide an overview of the Distributed Electricity Backup Assets program and solicit input for use in developing guidelines for the program and provide a preliminary overview of reliability analysis that will be used to assess the need for the Diablo Canyon Nuclear Power Plant.

There will be a period for public comment at the end of each session.

A detailed meeting schedule will be posted prior to the workshop at [Docket No. 21-ESR-01](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-ESR-01) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-ESR-01>.

Background

Senate Bill 846 requires the CEC to conduct a cost comparison of extended operations at the Diablo Canyon Nuclear Power Plant compared to a portfolio of other feasible resources available for calendar years 2024 to 2035 that is consistent with the state's 2030 greenhouse gases emissions reduction goals. Additionally, Assembly Bill 205 established the Distributed Energy Backup Assets Program as part of the Strategic Reliability Reserve. The Distributed Energy Backup Assets Program is intended to incentivize the construction of cleaner and more efficient distributed energy assets that would serve as on-call emergency supply or load reduction for the state's electrical grid during extreme events.

Attendance Instructions

In-person participants may join the meeting at the Warren-Alquist State Energy Building, Rosenfeld Hearing Room, First Floor, 1516 Ninth Street, Sacramento, California 95814. Please sign in at the security desk. Masks and social distancing are encouraged, but not required.

If participants bring a device to join the meeting via Zoom at the physical location, the system audio must be muted, or the audio should not be joined. This is to avoid disruptive feedback during the meeting. Audio will be provided through an onsite sound system.

Remote participants may join via Zoom by internet or phone.
