Lithium Industry

Dear Blue Ribbon Commissioners,

I want to express my support for developing the lithium industry in Imperial County that promise to be some of the cleanest in the world.

Imperial County is in a unique position when it comes to the development of the lithium industry. We are rich in the necessary resources to fuel geothermal brine lithium extraction systems, while still having an important need for mitigation efforts to protect the environment.

While I agree we should reduce any environmental issues with air and water quality as best we can, I urge the Commission to review the geothermal brine lithium extraction systems, which promise to be the most environmentally friendly system as it relates to emissions, water usage and physical footprints.

Additionally, the process laid forth by California's regulations include the most comprehensive environmental requirements that provide me with full confidence that any approved projects will meet our environmental needs, while at the same time helping to fuel California's clean energy future.

Let's work together to improve these projects, finding the best path forward towards continued environmental stewardship and meeting our clean energy needs, while still allowing the industry and Imperial Valley to thrive for generations to come.

October 26, 2022 @ 07:51pm
Lithium Industry

To the Blue Ribbon Commission:

I wanted to share my support for continuing to develop the lithium industry in Imperial County. As you are aware, we have one of the state's highest percentages of individuals living in poverty, with almost a fifth of the population falling into this category.

For this reason alone, I appreciate the Commission's concern for our community, which has been underserved for decades.

By supporting the development of these projects, we can secure much-needed economic benefits - like hundreds of jobs, millions in tax revenue and tens of millions in economic activity funneling into the Imperial Valley. At the same time, it can help to fuel California's clean energy future and make the state's new climate goals a reality.

Additionally, the dedicated revenue stream passed by the California legislature will ensure local communities receive a significant share of the production taxes on lithium (including funding for the Salton Sea restoration) aiding us in this journey towards change.

Let's work together to support this industry and find the best path forward to meet our community and economic goals, allowing the industry, economy and Imperial Valley to thrive for generations to come.

At the same time, it can help to fuel California's clean energy future and make the state's new climate goals a reality.

Additionally, the dedicated revenue stream passed by the California legislature will ensure local communities receive a significant share of the production taxes on lithium (including funding for the Salton Sea restoration) aiding us in this journey towards change.

Let's work together to support this industry and find the best path forward to meet our community and economic goals, allowing the industry, economy and Imperial Valley to thrive for generations to come.

Lithium Industry

To the Blue Ribbon Commission:

I wanted to share my support for continuing to develop the lithium industry in Imperial County. As you are aware, we have one of the state's highest percentages of individuals living in poverty, with almost a fifth of the population falling into this category.

For this reason alone, I appreciate the Commission's concern for our community, which has been underserved for decades.

By supporting the development of these projects, we can secure much-needed economic benefits - like hundreds of jobs, millions in tax revenue and tens of millions in economic activity funneling into the Imperial Valley. At the same time, it can help to fuel California's clean energy future and make the state's new climate goals a reality.

Additionally, the dedicated revenue stream passed by the California legislature will ensure local communities receive a significant share of the production taxes on lithium (including funding for the Salton Sea restoration) aiding us in this journey towards change.
