ATTCP enforcement?

I just learned about this certification today, only because a contractor needs the commercial "T24 forms" per the building inspector. I was going to print the NRCA-LTG forms for him to complete but they have a watermark stating they are not valid and to contact the ATTCP. Is anyone enforcing this? I'm in Sacramento county and they barely enforce the T24 for mechanical let alone commercial. I'm working with installers and builders from the bay to Truckee and none have ever mentioned this certified testing. As a HERS rating company, I might be interested in getting certified ONLY if it's being enforced.

Thank you,

Vicki
