Docket Number: 22-IEPR-02

Request for Additional Comment Period

Our office represents the Campo Band of Mission Indians, a federal recognized Indian Tribe with wind energy resources on its reservation in Southern California. I was just made aware of the above referenced document which was released by the Commission for public comment on October 5, 2022. Upon inquiry, I found that the public comment period for this document was stated as less than 4 weeks. The method of publication of the Report and NOA is unclear, but it does not appear that the notice was provided to Tribal Governments throughout the state. The Tribe is concerned that this abbreviated outreach will not lead to appropriately complete comments on issues that impact Tribes throughout the State. The Tribe respectfully requests additional time to present its comments to the report to notify the Commission and Staff of the significant omissions that affect the equitable use of the information provided in the document. Please confirm through reply email that you will continue receiving comments on this important document.
