Docket Number: 22-HERS-02*

Don't pull a fast one!

The Commission has released hundreds of pages of reports to review for the proposed rulemaking. The content covers over a decade's worth of regulatory history. With deadlines of early December to comment on these reports, there is not sufficient time to provide meaningful feedback.

The Commission has released this information during the busiest time for HERS Program stakeholders. The rollout of the 2022 Code is supposed to be released on January 1, 2023; industry stakeholders need this time to train for the new code cycle.

The workshop is scheduled for the same day as the California IHACI convention.

A rulemaking is needed to help improve the HERS Program. CalCERTS has raised many of these issues in support of our Raters, and over the years has requested equal enforcement of the rules on all HERS Providers. This is an important opportunity to secure the future of our industry; however, stakeholders need appropriate time to digest the information and provide thoughtful feedback.
