Re: *Southern California Edison Company's Request for Extension of Time for Filing
Transmission Related Data Collection*

Dear Executive Director Bohan:

In accordance with California Code of Regulations, Title 20 Sections 1303 and 1342, Southern California Edison respectfully requests an extension of time to submit the Transmission Related Data Collection for the California Energy Commission's (CEC's) Integrated Energy Policy Report Update (IEPR) to November 21, 2022.

SCE requests additional time because SCE mistakenly overlooked the requirement to provide the data. Although submitting this information is not a new requirement, the CEC has not asked entities to submit it for several years. As a result, the SCE personnel who routinely complete the annual IEPR submissions were unfamiliar with the requirement and inadvertently overlooked it in the IEPR instructions.

SCE is committed to providing the CEC with complete and comprehensive submissions as part of the IEPR. SCE's inattention to this submission was not intentional and SCE is diligently working to complete the data as expeditiously as possible. SCE requires an extension until November 21, 2022 because it has not previously collected the data sought and thus must independently generate this data for the CEC and the personnel with the requisite degree of experience are resource constrained. Thus, to allow those individuals the time needed for them to confidently prepare a complete and accurate submission, SCE contends that an extension to November 21 is reasonable.
