EXECUTIVE SUMMARY

TRC Solutions, Inc. (TRC) was retained by Vantage Data Centers (also known as "Client" or "User") to perform a Phase I Environmental Site Assessment (ESA) of the 651 Martin Avenue Property located at 651 and 631 Martin Avenue in Santa Clara, CA 95050 (herein referred to as the "Site"). TRC's conducted the ESA in connection with the Client's planned business transaction involving the potential purchase of the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society for Testing and Materials Practice E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Sections 1.3 and 7.6 of this report.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of 651 Matin Avenue, the Site. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.5 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) controlled recognized environmental conditions (CRECs), and/or historic environmental conditions in connection with the Site, except for the following:

HRECs

2600 De La Cruz Boulevard is located just east (approximately 150 feet east) and cross- to upgradient of the Site and was a former paperboard manufacturing facility that used several chemicals on site in bulk quantities predominantly for the treatment of process water, and the operation and maintenance of a cogeneration plant as well as maintenance-related materials, such as fuels, oils, lubricants, greases, non-chlorinated degreasers, welding gases, and refrigerant chemicals. Twelve underground storage tanks (USTs) were also formerly located onsite that included gasoline, diesel fuel tank, and solvent tanks. Investigations, remediation, and monitoring were conducted at the property from the 1980s until 2000, when regulatory closure for the releases was granted. It was reported in 2018, that groundwater at the 2600 De La Cruz property was impacted with volatile organic compound (VOCs) from off-site sources.

Limited subsurface investigation performed in 2018 identified petroleum hydrocarbons and fuel-related VOCs in groundwater, and fuel-related VOCs, chlorinated solvents (tetrachloroethene [PCE] and TCE), and several other VOCs, in soil gas samples. It was reported that VOCs detected in soil gas samples were below the most stringent screening criteria published at that time for evaluation of vapor intrusion risks. The soil gas investigation report and associated laboratory data was not available as part of this Phase I ESA. We also note that Environmental Screening Levels (ESLs) have changed significantly since the 2018 investigation was completed, therefore it is unknown whether those soil gas results are below current regulatory screening criteria. Additionally, the extent of the VOC impacts to groundwater and soil gas investigated at 2600 De LA Cruz are unknown to TRC at this time.

Review of online Water Board Geotracker records indicated the former presence of two USTs on the Site; a 500-gallon gasoline tank and a 880-gallon Debur waste tank related to formed aluminum manufacturing operations in the southern parcel. Available information reported elevated concentrations of benzene, toluene, ethylbenzene, and xylenes (BTEX), total petroleum hydrocarbons (TPH), and metals in soil from well borings presumably near the former 500-gallon gasoline UST, included benzene in excess of 11,000 milligrams per kilogram (mg/kg) in soil. It was also noted that the documentation was incomplete, therefore it was unclear whether removal

of impacted soil was completed as part of UST removal. BTEX were detected at concentrations of 14,884, 24,894, 3,337, and 15,610 parts per billion (ppb) respectively in a groundwater sample collected from MW-4 in May 1989. The written record was unclear regarding mitigation or monitoring between 1989 and the UST closure in 2001. The Geotracker documentation also indicated the presence of an open trench, buried piping, and sump near the former debur machine. It appears that the deburr machine was removed, and documentation provided by the City of Santa Clara Fire Department (SCFD) included a report prepared for FMC Corporation by Pilko & Associates, Inc. in November 1989. The report documented one standard interface soil sample collected form the tank excavation at a depth of 12.5 feet below grade, and four interface soil samples collected from the invert of the clay pipe trench. The tank sample reported a TPH concentration of 75 parts per million (ppm) and the SCFD indicated that TPH concentrations less than 100 ppm at the site were not a major concern and would not require remediation. No metal concentrations exceeded ten times the soluble threshold concentration (STLC) or total threshold limit concentration (TTLC) and iron concentrations ranging from 9,600 to 23,000 ppm were considered to occur naturally in the area. Additionally, purgeable hydrocarbons were non-detect. In addition, it is also noted based on review of regulatory files for nearby properties, that the Site is in an area with known VOC impacts to groundwater resulting from former UST and plating operations, which is also considered a HREC.

The following additional findings have been identified during the course of this Phase I ESA that have not been determined to be RECs but may be of importance to the User:

Finding No. 1: The Site was utilized for agricultural purposes between the years 1939 and 1956 and it was also noted that former orchards were present approximately 2,200 feet south of the Site. These historical Site uses may have resulted in heavy metals and/or pesticide impacts to shallow soil.

Finding No. 2: Based on the pre-1970 construction date of the onsite buildings, there is a likelihood that asbestos containing materials are present in building materials and lead-based paint are present in painted surface coatings.

This Executive Summary is part of this complete report; any findings, opinions, or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for supporting information related to findings, opinions, and conclusions.

Legal Notice

TRC has prepared this Phase I ESA for Vantage Data Centers (hereinafter “Client” or “User”). This document was prepared by TRC solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Solutions, Inc. (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for Vantage Data Centers (hereinafter "Client" or "User").

This report was prepared for and may be relied upon by Client and User for the purposes set forth herein; it may not be relied on by any party other than the Client and User. TRC will consider authorization for third-party reliance on this report if requested by the Client. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the property located at 651 Martin Avenue in Santa Clara, CA 95050 (hereinafter the "Site"). A Vicinity Map is included as **Figure 1**. This Phase I ESA has been prepared by TRC in accordance with the American Society for Testing and Materials E 1527-13 Standard Practice for Environmental Site Assessments: Phase I ESA Process (ASTM E 1527-13) and is intended for the sole use of Vantage Data Centers per TRC's May 18, 2021 ASTM Phase I Environmental Site Assessment Proposal, 651 Martin Avenue, Santa Clara, California 95050, authorized on July 8, 2021.

The purpose of this assessment is to identify Recognized Environmental Conditions (RECs) at the Site, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner*, contiguous property owner, or bona fide prospective purchaser liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

TRC understands that this assessment is not funded with a federal grant awarded under the United States Environmental Protection Agency (U.S. EPA) Brownfields Assessment and Characterization program or for lending under the guidance of the Small Business Administration.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historic Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions, and conclusions.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include but are not limited to the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Emerging contaminants
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to *releases* of *hazardous substances* or *petroleum products* into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

Due to Site access constraints, TRC's Site reconnaissance was limited to publicly accessible areas and TRC was not allowed to complete visual reconnaissance of the interior of the exiting building. This represents a significant deviation to the ASTM standard.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The approximately 7.12-acre Site is located at 651 Martin Avenue in Santa Clara, CA 95050, in an industrial use area. The San Jose airport is also noted to be located approximately 1,000 feet east of the Site. The Site is described by the Santa Clara County tax assessor as parcel number 224-04-071, is zoned as Industrial (general), and is currently owned by the Gahrahmat Family Limited Partnership II L.P. A Vicinity Map is included as **Figure 1**.

2.2 Site Improvements

Current on-Site improvements are listed in the following table. A Site Plan is included as **Figure 2**.

Table 2.1 - Site Improvements

Site Feature	Description
Buildings	Four industrial buildings are present. They appear to be single-story buildings.
Construction date	Unknown; between 1950 and 1956 based on aerial photo review
Exterior areas	Asphalt and concrete pavement
On-Site roads/rail lines	Surface parking areas throughout, a former rail spur (currently bare dirt) bounds the northeastern corner of the Site
Other large equipment	Unknown
Potable water supply	City of Santa Clara Water and Sewer Utilities
Sewage disposal system(s)	City of Santa Clara Water and Sewer Utilities
Heating/cooling system fuel source(s)	Unknown
Back-up fuel source	Unknown
Electricity supplier	Pacific Gas & Electric Company
Stormwater system	City of Santa Clara Storm Drains

2.3 Current and Historic Site Use

2.3.1 Current Site Use(s)

The approximately 7.12-acre Site is currently operated by the Gahrahmat Family Limited Partnership II L.P that is leased and operated as a collision repair shop and an airport parking facility.

2.3.2 Previous Operator Information

Based on information provided by the User (Section 3.0), the historical record review (Section 4.0), and/or interviews conducted during this Phase I ESA (Section 6.0), historic Site operator information is provided in the table below.

Table 2.2 - Previous Operator Information

Site Operator	From	To
651 Martin Avenue		
Larson Louis C Ladder Co	1955	1970
Larson Mfg Inc Ladder mfg, General Box Distributors	1970	1974
Larson Division of American Forest Products, Bendix Ladder mfg	1974	1994
E Lee Industrial Catering, BA Catering Truck Repair	1994	1996
E Lee Industrial Catering, BA Catering Truck Repair, Auto Parts Club	1996	1999
Lee Industrial Catering, Nguyen Tam Thamh, Precision Auto Service	1999	2001
GAHRAHMAT Mahmoud, Lee Industrial Catering, Precision Auto Service	2001	2004
Chubby Catering, CVM Commercial Vehicle Mant, De Jarochas, Hoang Nguyen, Lee Brothers Foodservices Inc, Nguyen Nhung, Paulina's Catering, Pily's Truck, Sang Tran Catering Food Service, Tina Sabrosa	2004	2009
Angel Mobile Catering Truck Repair, Lee Industrial Catering, Mariscos La Costina	2009	2014
Lees Food Service Inc	2014	Present
631 Martin Avenue		
Auto Parts Club	1994	2004
SCD Body Shop, Stripping by SCD Body Shop, AA Williams Auto Glass	2004	2009
Stripping by S C D Body Shop, Car West Auto Body Inc	2009	2014
Enterprise Rent a Car, Car West Auto Body	2014	2017
Service King Collision Repair Santa, AAA Locksmith, Enterprise, Car West Auto Body	2017	Present

2.4 Physical Setting

According to the United States Geological Survey, 2012, 7.5-Minute Topographic Map for San Jose West and Milpitas (refer to **Figure 1**), the Site is located approximately 1-mile to the southwest from Guadalupe River, the Site topographic elevation is approximately 47 feet above mean sea level, and local topography slopes to the general north northeast. The topographic downward slope observed at the Site during the Site reconnaissance is generally toward the north northeast. Based on local topography and historical environmental reports provided to TRC, as applicable the assumed direction of shallow groundwater flow is to the northeast, toward the Guadalupe River; however, a subsurface investigation would be required to determine actual groundwater flow direction.

The database radius report, supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status:	Soil does not meet the requirements for a hydric soil.
Soil Surface Texture:	Clay loam
Soil Component Name:	Botella
Deeper Soil Types:	Silty clay loam and sandy clay loam

Please refer to the Geocheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity. According to EDR, the Site is not located in a Federal Emergency Management Agency flood zone.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the *environmental professional* to obtain recorded land title records for environmental liens or activity and use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. A list of requested information was included in TRC's signed proposal (see Section 1.1). Information provided by the User pursuant to that request is listed in Section 3.0. A copy of the User questionnaire is included in **Appendix B**.

3.1 Title and Judicial Records for Environmental Liens or AULs

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), and the Regional Water Quality Control Board's (RWQCB) Geotracker and Department of Toxic Substance's (DTSC) Envirostor on-line databases (Section 4.4), TRC obtained supplemental information regarding AUL-listed properties within Santa Clara from the Santa Clara County Recorder's Office, California Environmental Protection Agency, and the United States Environmental Protection Agency. No environmental liens were listed for the Site, and no evidence of AULs associated with the Site were identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 Property Value Reduction Issues

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information was provided to TRC by the User.

3.5 Reason for Conducting Phase I ESA

TRC understands the User requires a Phase I for their planned business transaction involving the potential purchase of the Site.

4.0 RECORDS REVIEW

4.1 Historic Use Information

Information regarding Site and vicinity historic uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500') dated 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2006, 2009, 2012, and 2016;
- Historical Sanborn® Fire Insurance Maps (Sanborn Maps) dated 1961, and 1966;
- Topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980 and 2012;
- City directories dated 1955, 1957, 1960, 1963, 1970, 1974, 1975, 1994, 1996, 1999, 2001, 2004, 2009, 2014, and 2017;
- Local municipal records;
- An environmental database report; and
- Site reconnaissance performed from publicly accessible areas.

Historical research documentation is included in **Appendix C**.

4.1.1 Site History

Table 4.1 - Site History

Year	Site History
1939 to 1956	The Site appears used for agricultural purposes from at least 1939 until 1956. The 1948 and 1950 aerial photographs show one small structure and dirt roads on the eastern portion of the property.
1956 to 2006	The Site contains to large industrial buildings, several outbuildings, and numerous materials staged outdoors. A rail spur is present along the northeastern border of the property. Sanborn maps describe the southern portion of the property as Larsen Ladder Co. wood ladder manufacturing with an associated spray-painting booth, machine shop, and the northern portion of the property as mill work and lumber piles with an associated refuse burner.
2006 to Present	The lumber piles have been removed, and vehicles are parked on the site around the two original industrial buildings.

It does not appear that topographic contours in the Site area have significantly changed during the time period reviewed. If significant changes had been noted, it could indicate significant filling or excavation activity.

4.1.2 Adjoining Property History

Table 4.2 - Adjoining Property History

Year	Adjoining Property History
North	North adjoining property is agricultural from at least 1939 until at least 1956. From at least 1963 until at least 1982, the property contains a large industrial building. In 1993 and until present the industrial building is reconstructed, and a surface parking area is constructed on the southern portion of the property.
East	East adjoining property is agricultural from at least 1939 until at least 1956. The railroad tracks are present since at least 1889. By 1963 the property contains a large industrial building and several outbuildings, numerous materials staged onsite, and an outdoor aboveground storage tank. An additional industrial building is constructed by 1974. By 1993, site development expands to the north, and a second aboveground storage tank is installed.
South	South adjoining property is agricultural from at least 1939 until at least 1950. By 1956, Martin Drive is constructed, and the property contains an industrial building, several outbuildings, and materials staged onsite. By 1993, the smaller outbuildings are demolished, and a second industrial building is constructed by 1998. Numerous materials and vehicles are staged onsite.
West	West adjoining property is agricultural and contains a residential property from at least 1939 until at least 1950. By 1956, the residential property is demolished, and an industrial/agricultural building is constructed in the northeastern corner of the property. By 1968, the building is expanded, and a dirt road connects west adjoining property to the Subject Site. By 1974 a staging area is present along the eastern border of the site south of the industrial building; the rest of the property remains unimproved. By 1993 the original building is demolished, and two large industrial buildings and associated parking areas are constructed.

4.1.3 Surrounding Property History

Table 4.3 - Surrounding Property History

Year	Surrounding Property History
North	North surrounding property is agricultural from at least 1939 until at least 1950, when construction of some industrial buildings begins. By 1956 and until present, the area is industrial.
East	East surrounding property is agricultural from at least 1939 until and is industrial from at least 1956 until present.
South	South surrounding property is agricultural including orchards located approximately 2,200 feet south of the Site and residential from at least 1939 and is industrial from at least 1956 until present.
West	West surrounding property is agricultural and residential from at least 1939 and is industrial from at least 1956 until present.

4.2 Database Report and Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**.

The environmental database report identified 12 records/listings for the Site and 390 other records/listings within the search radii of the Site. These properties included those that could be mapped and those that could not (i.e., orphan properties).

4.2.1 Subject Site

Site information included in the database search report is summarized in the following table:

Site Facility Name(s) and/or Listed Address(es)	**FMC Corp Woodlands Equipment Division,** 651 Martin Avenue
EDR Map No(s).	A1, A12, A13, A14, A19
Database(s)	CA LUST, CA HIST LUST, CA Cortese, CA HIST CORTESE, CA CERS, RCRA-SQG, FINDS, ECHO, CA RGA LUST, FINDS, CA HAZNET, CA HWTS
Description/ID No(s).	CA LUST, CA Cortese, CA CERS: T0608500660 CA HIST LUST: 06S1W35E03 CA HIST CORTESE: 43-0626 RCRA-SQG, CA HAZNET, CA HWTS: CAT000623991 FINDS, ECHO: 110002944360 CA RGA LUST: N/A FINDS: 110065483701

Database Review Summary	CA LUST: Gasoline leaking underground storage tank (LUST) case affecting other groundwater. A No Further Action (NFA) case closure letter was received September 13, 2001. Residual contamination exists at the site; however, the concentration levels were reported to be below a regulatory concern at that time. Per a November 2001 Well Destruction Report, three of the four monitoring wells at the site were destroyed; the fourth monitoring well could not be located. Review of online Water Board Geotracker records indicated the presence of two former underground storage tanks (USTs); a 500-gallon gasoline tank and 880-gallon debur waste tank related to formed aluminum manufacturing operations in the southern parcel. Reported elevated concentrations of benzene, toluene, ethylbenzene, and xylenes (BTEX), total petroleum hydrocarbons (TPH), and metals in soil from well borings presumably near the former 500-gallon gasoline UST, included benzene in excess of 11,000 micrograms per kilogram (mg/kg) in soil. It was also noted that the documentation was incomplete, so it was unclear whether removal for impacted soil was completed as part of UST removal. BTEX were detected at concentrations of 14,884 parts per billion, 24,894, 3,337, and 15,610 parts per billion (ppb) respectively in a groundwater sample collected from MW-4 in May 1989. The written record was unclear regarding mitigation or monitoring between 1989 and UST closure in 2001. The Geotracker documentation also indicated the presence of an open trench, buried piping, and sump near the former deburr machine and it appears that the deburr machine was removed. Documentation provided by the SCFD included a *Report of Removal of Deburr Waste Underground Storage Tank at 651 Martin Avenue, Santa Clara, California*, prepared for FMC Corporation by Pilko & Associates, Inc. in November 1989. The report documented one standard interface soil sample collected form the tank excavation at a depth of 12.5 feet below grade, and four interface soil samples collected from the invert of the clay pipe trench. The tank sample reported a TPH concentration of 75 parts ppm and the SCFD indicated that TPH concentrations less than 100 ppm at the site were not a major concern and would not require remediation. No metal concentrations exceeded ten times the STLC or TTLC and iron concentrations ranging from 9,600 to 23,000 ppm were considered to occur naturally in the area. Additionally, purgeable hydrocarbons were non-detect. CA HIST LUST: Listed 11/20/1990, closed 9/13/2001. No additional information provided. CA Cortese: Listed as a LUST Cleanup Site with status of completed; case closed. CA HIST CORTESE: No additional information provided. CA CERS: Listed as a LUST Cleanup Site. No additional information provided. RCRA-SQG: Listed as a current and historic small quantity generator under the NAICS code for Military Armored Vehicle, Tank, and Tank Component Manufacturing. Violations found, relating to generators – general. FINDS: Listed under the RCRA Info program. ECHO: Listed under the RCRA statute with no violations identified. CA RGA LUST: Thirteen LUST listings, with no additional information provided. FINDS: Listed under the CA-Enviroview program. CA HAZNET: Listed for landfill disposal, surface impoundment disposal, transfer station disposal and/or recycling of unspecified oil-containing

	waste, contaminated soil from site cleanup, empty containers less than 30 gallons, other empty containers 30 gallons or more, waste oil and mixed oil, tank bottom waste, metal dust (alkaline solution with metals) and machining waste, other inorganic solid waste, metal sludge (alkaline solution with metals), paint sludge and unspecified sludge waste. CA HWTS: Listed with an inactive date of 7/23/1982. No additional information provided. These listings identify a gasoline LUST case which affected groundwater and show that contaminated soil was removed from the site. As case closure has been granted and accessible monitoring wells have been destroyed, these listings are considered a HREC.

Site Facility Name(s) and/or Listed Address(es)	**A & V Catering Truck Repair,** 651 Martin Avenue, Apartment G

Database Review Summary	RCRA-SQG: Listed as a current and historic private small quantity generator of ignitable waste, corrosive waste, and spent nonhalogenated solvents under the NAICS code for Automotive Body, Paint, and Interior Repair and Maintenance. No violations or evaluations found. CA HAZNET: Listed for disposal via storage, bulking, and/or transfer off site-no treatment/recover, energy recovery at this site – use as fuel (includes on-site fuel blending), solvents recovery, and/or other recovery of reclamation for reuse including acid regeneration of empty containers less than 30 gallons, other inorganic solid waste, other organic solids, latex waste, unspecified organic liquid mixture, other inorganic solid waste, off-specification, aged or surplus organics, and unspecified solvent mixture. ECHO: Listed under the CAA and RCRA statutes with no violations identified. CA CERS HAZ WASTE: Listed as a hazardous waste generator. No additional information provided. CA CERS: Listed as a chemical storage facility. CA EMI: Listed as emitting total organic hydrocarbon gases and reactive organic gases in 2013, 2014, 2015, and 2018. FINDS: Listed under the RCRAInfo and EIS programs. ECHO: Listed under the RCRA statute with no violations identified. RCRA NonGen / NLR: Listed as a current and historic handler under the NAICS code for Automotive Body, Paint, and Interior Repair and Maintenance with no violations or evaluations found. These listings are administrative in nature, and are not considered a REC.

Site Facility Name(s) and/or Listed Address(es)	**Stevens Creek Dodge's Body Shop,** 631 Martin Avenue
EDR Map No(s).	B25
Database(s)	CA CERS
Description/ID No(s).	110002934674
Database Review Summary	Listed under the US EPA Air Emission Inventory System, with no additional information provided. These listings are administrative in nature, and are not considered a REC.

Site Facility Name(s) and/or Listed Address(es)	**Carwest Auto Body,** 631 Martin Avenue
EDR Map No(s).	B27
Database(s)	RCRA-SQG, FINDS, ECHO, CA EMI
Description/ID No(s).	RCRA-SQG: CAR000069500 FINDS, ECHO: 110002934674 CA EMI: 12541

Database Review Summary	RCRA-SQG: Listed as a current and historic private small quantity generator or ignitable waste, corrosive waste, cadmium, lead, benzene, methyl ethyl ketone, and spent halogenated solvents used in degreasing under the NAICS code for New Car Dealers. No violations or evaluations found. FINDS: Listed under the CA-Enviroview and CA-CERS programs. ECHO: Listed under the CAA and RCRA statutes with no violations identified. CA EMI: Listed with emissions of organic hydrocarbon gases and reactive organic gases in 2001, 2002, and 2003. These listings are administrative in nature, and are not considered a REC.

4.2.2 Adjoining and Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

(1) Whether the property is upgradient or downgradient of the Site related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and northeasterly shallow groundwater flow direction;

(2) Whether the property is upgradient or downgradient of the Site related to potential vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);

(3) Property case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action letter or other similar closure document);

(4) Type of database and whether the presence of contamination is known; and

(5) The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below because the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low with the exception of known VOC impacts at 2600 De LA Cruz Avenue, located approximately 150 feet east and up to cross-gradient to the Site.

As discussed in Section 2.1, the San Jose Airport (Airport) is located approximately 1,000 feet east of the Site. In 2019 the State Water Resources Control Board (SWRCB) issued Order 13267 for the determination of the presence of per and polyfluoroalkyl substances (PFAS) for all airports. Investigation for PFAS was performed at the Airport in October 2019 and based on information provided in Geotracker, it is known that the Airport was one of the many airports that PFAS were detected in groundwater samples collected as part of the preliminary investigations required by the SWRCB. Review of the Geotracker data associated with the Airport investigation only

provided results of the sampling and did not provide conclusions regarding the extent of the PFAS to groundwater. To date, no additional investigations have been required by the SWRCB to determine the extent of the release of PFAS to groundwater at the Airport. Based on the distance from Site and because PFAS are not considered a vapor intrusion risk, the presence of PFAS in groundwater at the Airport is not considered a REC to the Site.

4.2.2.1 Adjoining Properties

Information regarding adjoining properties (those which share a common property boundary with the Site) included in the database search report is summarized in the following table:

Facility Name(s) and/or Listed Address(es)	**Lindsey Property,** 851 Martin Avenue
EDR Map No(s).	E44
Database(s)	CA LUST, CA HIST LUST, CA Cortese, CA CERS
Description/ID No(s)	CA LUST, CA Cortese, CA CERS: T0608591844 CA HIST LUST: 06S1W35E05
Database Review Summary	CA LUST: Gasoline LUST case affecting other groundwater, with no further action granted March 26, 2001. Residual soil and groundwater contamination exists; however, residual levels do not require additional cleanup or investigation. An abandoned well is located on the property, and no documentation regarding its property destruction was located. CA HIST LUST: Listed 2/20/2001, closed 3/26/2001. No additional information provided. CA Cortese: Listed as a LUST cleanup site with status completed – case closed. No additional information provided. CA CERS: Listed as a LUST Cleanup Site. No additional information provided. Based on the regulatory status and cross gradient direction this property is not considered a REC.

Facility Name(s) and/or Listed Address(es)	**Berryman Electro Plating,** 650 Walsh
EDR Map No(s).	G59
Database(s)	CA ENVIROSTOR
Description/ID No(s)	43340037
Database Review Summary	Listed as a lead-impacted soils, with removal of 1,600 tons contaminated soil completed 1/1/1998. Site screening was signed off by the EPA 8/10/2005. Based on the regulatory status and soil only impact this property is not considered a REC.

Facility Name(s) and/or Listed Address(es)	**Container Corp,** 2600 De La Cruz Boulevard
EDR Map No(s).	U201, U203, U204, U205
Database(s)	CA LUST, CA Cortese, CA EMI, SEMS-ARCHIVE, RCRA-SQG, ICIS, US AIRS, FINDS, CA HIST LUST, CA SWEEPS UST, CA CHMIRS,
Description/ID No(s)	CA LUST: 06S1W35F01f CA Cortese: T0608500459 CA EMI: 732 SEMS-ARCHIVE, RCRA-SQG: CAD077192102 ICIS: 110043812595 US AIRS: 1000395874 FINDS: 110070595918 CA HIST LUST: 06S1W35F01 CA SWEEPS UST: 18300 CA CHMIRS: 905644

Database Review Summary	CA LUST: Listed as a LUST site; primary site assessment began 3/1/1982 and pollution characterization began 6/1/1982. Facility status listed as case closed. No additional information provided. CA Cortese: Listed as a LUST cleanup site with status of completed – case closed. No additional information provided. CA EMI: Listed as emitting organic hydrocarbon gases, reactive organic gases, CO, NOX, SOX, PM, and PM10 from 2006 – 2017. SEMS-ARCHIVE: Listed as an archive site which does not qualify for the NPL. The site was archived 11/1/1987. RCRA-SQG: Listed as a current private small quantity generator and a historic large quantity generator under the NAICS code for Folding Paperboard Box Manufacturing. One violation was noted 6/27/1994 and returned to compliance 7/27/1994, but no details on the violation were provided. ICIS: Numerous administrative informal, administrative formal, and administrative orders relating to NOVs under the AIR program are listed. No additional details are provided. US AIRS: Listed under the State Implementation Plan for National Primary and Secondary Ambient Air Quality Standards and Title V Permits programs with numerous inspection/evaluation, administrative informal, and administrative formal actions listed. FINDS: Listed under the AIR, CA-CERS, and EPS programs. The Air NOVs are listed. CA HIST LUST: Listed 1/1/1986, closed 9/27/2000. No additional information provided. CA SWEEPS UST: Listed with two 25,000-gallon Oil USTs. CA CHMIRS: Report filed 4/7/1989, end date listed as 5/8/1990. No additional information listed. Per the 2018_ESA report completed by Environment & Health group of Ramboll US Corporation (Ramboll)_, limited subsurface investigation performed in 2018 identified petroleum hydrocarbons and fuel-related VOCs in groundwater, and fuel-related VOCs, chlorinated solvents (tetrachloroethene [PCE] and TCE), and several other VOCs, in soil gas samples. It was reported that VOCs detected in soil gas samples were below the most stringent screening criteria published at that time for evaluation of vapor intrusion risks. The soil gas investigation report and associated laboratory data was not available. Environmental Screening Levels (ESLs) have changed significantly since the 2018 investigation was completed, therefore it is unknown whether those soil gas results are below current regulatory screening criteria. Additionally, the extent of the VOC impacts to groundwater and soil gas investigated at 2600 De La Cruz are unknown to TRC at this time. Based on the partial ESA report provided by the client (See Section 4.4), this property is considered a HREC for the Site.

Based on the available information regarding the releases at the adjoining properties, no subsequent file review of these properties was conducted.

4.2.2.2 Surrounding Properties

Information regarding surrounding properties (those within the general vicinity of the Site) included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	**The Home Depot #0630,** 2435 Lafayette Street
Approximate Location Relative to Site	0.114 mile southwest
EDR Map No(s).	I76, I77, I78, I79

Presumed Hydrogeologic Setting	Upgradient
Database Review Summary	CA CUPA Listings: Listed as a hazardous waste generator, generating less than 100 kg/year. No additional details provided. RCRA-SQG: Listed as a current private small quantity generator and a historic large quantity generator of ignitable waste, corrosive waste, mercury, 2,4-D, benzene, methyl ethyl ketone, and spent nonhalogenated solvents, under the NAICS code for Home Centers. No violations or evaluations found. FINDS: Listed under the RCRAInfo, EIS, CA-CERS, and CA-Enviroview programs. CA CPS-SLIC: Listed on Geotracker, although the site was granted a no further action letter May 12, 1995 as the direction of groundwater flow, concentration of pollutants, decreasing concentrations across the site, and no records of VOCs spills or leaks at the site show that the source of the pollutants is off-site and upgradient, and the site is unlikely to be a groundwater pollution source. CA HAZNET: Listed for disposal via storage, bulking, and/or transfer off site-no treatment/recovery, evaporation, fuel blending prior to energy recovery at another site, and/or neutralization only of unspecified organic liquid mixture, hydrocarbon solvents (benzene, hexane, Stoddard etc.), alkaline solution without metals, off-specification, aged, or surplus organics, other organic solids, unspecified aqueous solution, liquids with pH<=2, other inorganic solid waste, unspecified solvent mixture, waste oil and mixed oil, latex waste, pesticides and other waste associated with pesticide production, unspecified organic liquid mixture, unspecified aqueous solution, and aqueous solution with aqueous residues less than 10%. CA CERS: Listed as a cleanup program site. No additional details provided. CA HWTS: Listed under the NAICS code for Hardware Stores, with the last action date 8/24/2020. CA CERS HAZ WASTE: Listed as a hazardous waste generator. CA CERS: Listed as a chemical storage facility, with numerous compliance evaluations listed and no violations found. These listings are historical and administrative in nature, and are not considered a REC.

Facility Name(s) and/or Address(es)	**Lombardo Diamond Core Drill,** 585 Robert
Approximate Location Relative to Site	0.129 mile south southeast
EDR Map No(s).	K85, K86
Database(s)	CA ENVIROSTOR, CA CHMIRS, CA Cortese, CA ENF, CA HIST CORTESE, CA CPS-SLIC, CA DEED, CA CERS

4.3 Vapor Encroachment Evaluation

In addition to the EDR-provided database and Site reconnaissance observations, TRC used a vapor encroachment screening EDR application as part of this Phase I ESA to evaluate the urban/commercial setting of the Site. The area surrounding the Site has several former leaking storage tank sites as well as a former plating site that have affected groundwater in the area. Based on regulatory status, distance, and direction of the releases relative to the Site, vapor encroachment from these properties is considered a HREC for the Site. In addition, as discussed above in Section 4.2.1, a leak from a former onsite gasoline LUST affected groundwater at the Subject site, and vapor encroachment from this release is also considered a HREC.

4.4 Previous Reports

The following environmental report regarding the adjacent property to the northeast was provided for TRC's review by Vantage:

- February 1, 2018, Phase I Environmental Site Assessment, Graphic Packaging International LLC, 2600 De La Cruz Boulevard, Santa Clara, California , prepared by Ramboll

Information provided in this report is summarized below.

Ramboll performed a site reconnaissance for the property in December 2017. At the time of the Site reconnaissance, the property was being decommissioned but had formerly operated as manufacturing facility with operations that included mechanical paper pulping, blending, and filtering; layout and pressing of paper product, drying of paper in a series of steam feed dryers; mixing and application of a mineral-based pigment coating; and preparation and storage of finished rolls of product. When in operation several chemicals were utilized on site in bulk quantities, predominantly for the treatment of process water and the operation and maintenance

of the cogeneration plant. In addition, the company used maintenance-related materials, such as fuels, oils, lubricants, greases, non-chlorinated degreasers, welding gases, and refrigerant chemicals.

The following RECs were identified as a result of that ESA:

- On-site groundwater contamination with VOCs related to Off-Site Sources - According to the ESA, the property is located within a region where groundwater is known to be impacted with chlorinated VOCs, and as part of on-site subsurface investigations for UST leaks from the early 1980s to 2000 (which received regulatory closure, low concentrations of chlorinated VOCs (reported to be associated with regional detections) were detected in groundwater. Based on Ramboll's review of the information available for the adjoining or nearby properties as well as soil vapor and groundwater investigations performed by Ramboll at the site concurrently with the ESA, the presence of the VOCs in groundwater were considered to be a HREC.
- Residual Soil and Groundwater Contamination from UST Releases - Twelve USTs were formerly located on site and were removed in the 1980s and 1990s under regulatory oversight, with the exception of a gasoline UST that was abandoned in place under regulatory closure oversight. The tanks included 2,000-gallon gasoline tank, a 2,000-gallon diesel fuel tank, a solvent tank farm with eight tanks ranging in size from 1,000 to 3,000 gallons and two 25,000-gallon fuel tanks. Investigations, remediation, and monitoring were conducted at the site from the 1980s until 2000, when the SCVWD (with concurrence from the SFRWQCB) issued case regulatory closure for the releases. It was noted by Ramboll that the site was granted UST case closure with residual concentrations above residential screening criteria and was noted as a CREC by Ramboll

  To evaluate current property conditions, Ramboll also conducted a limited subsurface investigation in conjunction with the ESA in December 2017 that included groundwater sampling at nine locations and soil vapor sampling at five locations. The results of the investigation identified petroleum hydrocarbons and fuel-related VOCs in groundwater, generally localized to the former UST areas and mill areas at concentrations that were predominantly below those measured at the time of the UST closure in 2000. Soil vapor detections included fuel-related VOCs, chlorinated solvents (tetrachloroethene [PCE] and TCE), and several other VOCs, however all of the detections were reported to be below the most stringent (i.e., residential land use) screening criteria published by USEPA and California Environmental Protection Agency (Cal/EPA) for evaluation of vapor intrusion risks.

  It was noted by TRC, that the investigation report along with the laboratory data associated with the Ramboll investigation was not available to TRC as part of the ESA; therefore, the extent and distribution of impacts to groundwater and soil vapor are unknown and furthermore, it is unknown whether the analytical results are below current regulatory screening criteria, including Environmental Screening Levels (ESLs) that have changed significantly since 2018.

4.5 Other Environmental Record Sources

Per the ASTM standard, local or additional State records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of waste disposal facilities and hazardous waste/contaminated facilities. Information from these sources is discussed in this report, as applicable.

Table 4.4 - Other Environmental Record Sources

Regulatory Agency/ Department	Available Information
The Regional Water Quality Control Board	Several reports regarding the former tanks and hazardous materials inventory were present in Geotracker files.
The Department of Toxic Substances Control	No findings for the subject site.
City of Santa Clara Fire Department	Multiple reports related to the former USTs and hazardous materials use and storage associated with past and current tenants.
City of Santa Building Department	Various building permits for site improvements and occupancy permits.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mr. Gary Lieberman of TRC conducted a reconnaissance of accessible areas surrounding the Site on July 21, 2021 for the purpose of identifying potential RECs and was unaccompanied. Photographs taken during the reconnaissance are provided in **Appendix E**. A Site Plan is included as **Figure 2**.

Limiting conditions encountered during the Site visit consisted of the following:

- Due to access limitations, TRC was unable to enter the Site or onsite buildings, therefore our reconnaissance was limited to publicly accessible areas adjacent to the Site.

5.2 Interior and Exterior Site Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Table 5.1 - Interior and Exterior Site Observations

Item	Present (Current/ Historic/ Not Observed)	Description
Hazardous material storage or handling areas	Not Observed	
Solid and liquid wastes including municipal wastes	Not Observed	
USTs and associated piping	Not Observed	
ASTs and associated piping	Not Observed	
Drums and containers	Not Observed	
Odors	Not Observed	
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Not Observed	
PCBs/transformers	Not Observed	
Stains or corrosion	Not Observed	
Drains and sumps	Observed	Several surface storm drains were noted on the property
Pits, ponds, and lagoons	Not Observed	
Stressed vegetation	Not Observed	
Historic fill or other fill material	Not Observed	
Wastewater (including stormwater or discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	Not Observed	

Table 5.1 - Interior and Exterior Site Observations

Item	Present (Current/ Historic/ Not Observed)	Description
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	Not Observed	
Septic systems or cesspools	Not Observed	

5.2.1 Hazardous Substances

A portion of the site was utilized as a collision repair center and there appeared to be visible hazardous materials in use within the open garage. However, because TRC was unable to the enter the Site, the materials could not be identified but likely include various hydrocarbons and solvents commonly used for auto repair operations.

5.2.2 Solid and Liquid Wastes

Solid and liquid wastes were not visible from the exterior of the Site.

5.2.3 USTs

USTs were not visible from the exterior of the Site and no evidence of the former UST areas were evident.

5.2.4 ASTs

ASTs were not visible from the exterior of the Site.

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, TRC viewed the adjoining properties from the publicly accessible areas (e.g., public roadways, etc.).

Table 5.2 - Adjoining Properties Reconnaissance

Direction from Site	Current Land Use Description
North	The Site is bordered by unimproved land (former railroad spur right-of-way) followed by a large commercial building and associated storage yard.
South	The Site is bordered by Martin Avenue followed by commercial businesses that include Peninsula Building Materials and unnamed businesses.
East	The Site is bordered by railroad tracks and dirt parking followed by 531 Martin (Cyrus One – Enterprise Data Center) and the Graphic Packaging International LLC property at 1600 De La Cruz Boulevard.

Table 5.2 - Adjoining Properties Reconnaissance

Direction from Site	Current Land Use Description
West	The site is bordered by large multi-tenant commercial building with tenants that include Planet Granite (a Gym), ARC Document Solutions, and Joseph J Albanese

5.3.2 Surrounding Properties

Surrounding properties generally include mixed commercial and industrial entities.

6.0 INTERVIEWS

The following persons were interviewed to obtain historically and/or environmentally pertinent information regarding RECs associated with the Site.

- Max Gahrahmat, Owner– *Key Site Manager* (as defined by the ASTM standard) a);
- Mark Egan, Director, Site Selection and Development, Vantage as part of the Questionnaire.

The information provided by each is discussed and referenced in the text or provided below. Other references and sources of information are included in **Appendix E**.

7.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Potential findings can include RECs, including CREC), HRECs, and *de minimis* conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as RECs resulting from past *releases* of *hazardous substances* or *petroleum products* that have been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

HRECs are defined as past *releases* of any *hazardous substances* or *petroleum products* that have occurred in connection with the *property* and have been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

De minimis conditions are defined as conditions that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at the property located at 651 Martin Avenue in Santa Clara, CA 95050 (Site) Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.6 of this report. The following conditions were noted during the preparation of this report. TRC has provided the Environmental Professional's rationale for concluding that a condition is or is not currently a REC

7.1 RECs

This assessment has revealed no evidence of RECs in connection with the Site.

7.2 HRECs

This assessment has revealed evidence of the following HRECs in connection with the Site.

- 2600 De La Cruz Boulevard is located just east (approximately 150 feet east) and cross-to upgradient of the Site and was a former paperboard manufacturing facility that used several chemicals on site in bulk quantities predominantly for the treatment of process water, and the operation and maintenance of a cogeneration plant as well as maintenance-related materials, such as fuels, oils, lubricants, greases, non-chlorinated degreasers, welding gases, and refrigerant chemicals. Twelve USTs were also formerly located onsite that included gasoline, diesel fuel tank, and solvent tanks. Investigations, remediation, and monitoring were conducted at the property from the 1980s until 2000,

when regulatory closure for the releases was granted. It was reported in 2018, that groundwater at the 2600 De La Cruz property was impacted with VOCs from off-site sources.

Limited subsurface investigation performed in 2018 identified petroleum hydrocarbons and fuel-related VOCs in groundwater, and fuel-related VOCs, chlorinated solvents (tetrachloroethene [PCE] and TCE), and several other VOCs, in soil gas samples. It was reported that VOCs detected in soil gas samples were below the most stringent screening criteria published at that time for evaluation of vapor intrusion risks. The soil gas investigation report and associated laboratory data was not available as part of this Phase I ESA. We also note that ESLs have changed significantly since the 2018 investigation was completed, therefore it is unknown whether those soil gas results are below current regulatory screening criteria. Additionally, the extent of the VOC impacts to groundwater and soil gas investigated at 2600 De LA Cruz are unknown to TRC at this time. \

- Review of online Water Board Geotracker records indicated the former presence of two USTs on the Site; a 500-gallon gasoline tank and a 880-gallon Debur waste tank related to formed aluminum manufacturing operations in the southern parcel. Available information reported elevated concentrations of BTEX, TPH, and metals in soil from well borings presumably near the former 500-gallon gasoline UST, included benzene in excess of 11,000 milligrams per kilogram (mg/kg) in soil. It was also noted that the documentation was incomplete, therefore it was unclear whether removal of impacted soil was completed as part of UST removal. BTEX were detected at concentrations of 14,884, 24,894, 3,337, and 15,610 parts per billion (ppb) respectively in a groundwater sample collected from MW-4 in May 1989. The written record was unclear regarding mitigation or monitoring between 1989 and the UST closure in 2001. The Geotracker documentation also indicated the presence of an open trench, buried piping, and sump near the former debur machine. Based on information reviewed, the deburr machine was removed and documentation provided by the SCFD included a report prepared for FMC Corporation by Pilko & Associates, Inc. in November 1989. The report documented one standard interface soil sample collected form the tank excavation at a depth of 12.5 feet below grade and four interface soil samples collected from the invert of the clay pipe trench. The tank sample reported a TPH concentration of 75 parts ppm and the SCFD indicated that TPH concentrations less than 100 ppm at the site were not a major concern and would not require remediation. No metal concentrations exceeded ten times the STLC or TTLC and iron concentrations ranging from 9,600 to 23,000 ppm were considered to occur naturally in the area. Additionally, purgeable hydrocarbons were non-detect. In addition, it is also noted based on review of regulatory files for nearby properties, that the Site is in an area with known VOC impacts to groundwater resulting from former UST and plating operations, which is also considered a HREC.

- Finding No. 2: Based on the pre-1970 construction date of the onsite buildings, there is a likelihood that asbestos containing materials are present in building materials and lead-based paint are present in painted surface coatings.

7.3 *BERs*

This assessment has revealed evidence of the following BER in connection with the Site.

- The Site was utilized for agricultural purposes between the years 1939 and 1956 and it was also noted that former orchards were present approximately 2,200 feet south of the Site. These historic activities may have results in heavy metal or pesticide impacts to shallow soil in the general area.
- Based on the pre-1970 construction date of the onsite buildings, there is a likelihood for the asbestos-containing materials in building materials and lead-based paint in surface coatings.

7.4 *De Minimis* Conditions

This assessment has revealed no evidence of *de minimis* conditions in connection with the Site.

7.5 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historic ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). Data gaps identified during this assessment include the following:

- Access to the site buildings was not provided. However, based on available historical information and regulatory data reviewed during this ESA, the findings in this Phase I ESA are not likely to substantially change.
- A past owner was not available during this Phase I ESA for specialized knowledge of the Site and adjacent and nearby properties that may be indicative of a REC. However, TRC has not identified significant data gaps indicative of a REC based on the historical information reviewed and Freedom of Information Act information provided. Therefore, should interviews with the past owner be completed, findings in this Phase I ESA are not likely to substantially change.

7.6 Limiting Conditions and Deviations

7.6.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.4.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than 5 years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific

use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's Site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been in compliance with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.6.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-Site location(s) (with possible impact to the Site) not published in publicly available records.

7.6.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.6.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UNISYS Site ID: 0903480 EPA Id: CAD982400392	***1040 DIGIULIO AVE***	***SSW 1/4 - 1/2 (0.434 mi.)***	***AQ342***	***1904***

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of

assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 11 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are

EXECUTIVE SUMMARY

26 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 2 CA RESPONSE sites within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 45 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there are 3 CA SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 82 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 21 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 4 CA UST sites within

approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 74 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2021 has revealed that there are 3 FINDS sites within approximately 0.001 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 35 CA CUPA Listings sites within approximately 0.25 miles of the target property.

CA EMI: Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies

A review of the CA EMI list, as provided by EDR, and dated 12/31/2018 has revealed that there are 3 CA EMI sites within approximately 0.001 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 2 CA HAZNET sites within approximately 0.001 miles of the target property.

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 63 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 04/19/2021 has revealed that there are 2 CA CERS sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TSD EPA ID:	CAD980887418
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.756
Year:	2013
Gepaid:	CAR000069500
TSD EPA ID:	CAD980887418
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.12

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: 651 WALSH PARTNERS LLC
Address: 651 WALSH AVE
City,State,Zip: SANTA CLARA, CA 95050
Region: STATE
Facility Status: **Open - Remediation**
Status Date: 12/17/2019
Global Id: T10000012412
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 2018-33s
Latitude: 37.3709
Longitude: -121.94692
Case Type: Cleanup Program Site
Case Worker: TLF
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), DDD / DDE / DDT, Lead, Mercury (elemental), Zinc, Benzene, Ethylbenzene
Site History: An approximately 7.87-acre site in currently improved with a large building originally constructed in 1946 and expanded with several connecting structures of various sizes from 1950 to 1982. Prior to the 1940s the site was agriculturally used as a hay or grain field. By 1946 and apparently through 1984, the site was used as an industrial wire manufacturing facility by Keystone Steel & Wire

KEYSTONE CONSOLIDATED INDUSTRIES (Continued) **1015732676**

Company. Keystone's history is known to have included galvanizing and annealing areas, rod cleaning lines, wastewater generation, sumps and wastewater treatment systems, a plating shop, a boiler room a machine shop, and a railroad spur along the northern and eastern site boundaries. Since approximately 1984, the site has been used as a multi-tenant warehousing and light industrial shops located within 12 tenant suites. The site is planned for redevelopment into a large data center following demolition of the existing infrastructure. Contamination has been reported in soil, groundwater, and soil vapor beneath the site. Contamination in soil vapor and groundwater has been adequately assessed and no additional mitigation is required at this time. Elevated levels of heavy metals exist within select areas of the site which will be investigated further. A Site Management Plan will be implemented during development to address worker safety and soil management.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Sub-Part P Indicator:	No

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D016
Waste Description:	2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)
Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type:	Site Screening
Completed Date:	04/08/1993
Comments:	The Lombardo site is approximately 2 acres in size and used for parking and storage of vehicles, heavy equipment and supplies by the company in its concrete cutting business. Lombardo has owned this property since April 1985. Historical information indicates that from the 1960's to the 1970's, metal coating company, a galvanizing facility operated onsite. Available information likewise indicates that metal coating may have discharged waste pickling and washing solution on-site, resulting to soil and ground- water contamination prior to Lombarbo's purchase of the property in 1985. Sampling results in 1991 showed zinc in soil as high as 34,000 ppm; and 364 ppm in groundwater. The San Francisco Regional Water Quality Control Board (SF RWQCB) is currently providing direct oversight in remedial activities at the site. Site cleanup requirements (order 92-052) was issued on May 20, 1992 to Lombardo and outlines specific tasks needed to be complied with.

Case Type:	Cleanup Program Site
Case Worker:	DT
Local Agency:	Not reported
RB Case Number:	43S0158
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Other Metal
Site History:	From 1960 to 1981, the site was owned by Gillmore Supply Company who leased the property to Metal Coating Company/Galvanizers, Inc., who operated a galvanizing facility. Operations included the use of zinc-rich plating solutions and other acidic process solutions. Releases likely occurred through accidental spills of process solutions, leaks from process tanks and piping, onsite disposal of spent solutions, and onsite discharges of wastewater. Lombardo Diamond Core Drilling Company, Inc. (Lombardo) purchased the property in 1985. Lombardo currently uses the property for parking and storage of vehicles, heavy equipment and supplies used in its concrete cutting business. Starting in 1983, several investigations have been performed which have completely defined the extent of soil and groundwater contamination. Contamination has not migrated off site. Elevated levels of metals, primarily zinc, were found in the shallow soils near the former galvanizing building. Zinc had the highest concentrations. Volatile organic compounds were not identified. Elevated lead concentrations were found only in the top five feet of soil, while zinc concentrations were found deeper. Zinc concentrations were highest where the soils were more acidic (low pH values). Most of the zinc impact was 10-25 feet bgs, and was confined to the vicinity near the former galvanizing building. Shallow groundwater was also contaminated with zinc. The maximum concentrations of zinc in 1990 were 34,000 milligrams per kilogram (mg/kg) in the soil and 10,000 milligrams per liter (mg/l) in groundwater. The most recent maximum groundwater concentration in November 2005 was 2,600 mg/l. For comparison, the maximum contaminant

LOMBARDO DIAMOND CORE DRILLING (Continued) **S101482291**

level considered safe for drinking water is 5 mg/l.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name:	SOUTH BAY SHOWERS
Address:	510 & 540 MARTIN AVENUE
City,State,Zip:	SANTA CLARA, CA 95050
Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	05/22/2015
Global Id:	T10000006529
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.3660653444412
Longitude:	-121.942780404292
Case Type:	Cleanup Program Site
Case Worker:	REG
Local Agency:	Not reported
RB Case Number:	43S1178
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Under Investigation
Potential Contaminants of Concern:	Trichloroethylene (TCE)
Site History:	The Regional Water Boards determination that the subject site is not a case is based on the following reasons: 1. very low concentrations of TCE were detected in the soil samples 2. the lack of a known onsite source for TCE detected in the soil and groundwater samples 3. Concentrations of TCE in groundwater are below the vapor intrusion ESL As stated in the May 22, 2015 letter, this determination may be revised if the land use changes or if additional soil, soil vapor, or groundwater quality data becomes available.

FORD METER BOX CO INC THE (Continued) **1000183535**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

A1 PLATING (Continued) **1000106864**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
HAZARDOUS WASTE BIENNIAL REPORTER
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number: 08-093
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 06S1W35L04f
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The site resides in a commercial area of Santa Clara and consists of the westernmost unit of a 20,000 square foot (SF), multi-tenant commercial & industrial building with individual addresses ranging from 440 through 448 Robert Avenue. According to a report by Shaw Environmental dated 2005, a 2,000 gallon Underground Storage Tank (UST) was installed outside the southwest corner of the site building after the building was constructed in 1960. The UST was used from approximately 1971 to 1973. The tank was not used from 1973 until its removal in 1990. Records indicate that approximately 125 cubic yards (CY) of soil were excavated concurrent with the tank removal. Following the UST removal, groundwater monitoring wells were installed on the site and its vicinity in 1992, 1995, and 2000. In addition, a site investigation occurred in 2005 consisting of Hydropunch, Geoprobe, Cone Penetration Testing Procedure (CPT), and Pore Pressure Dissipation Tests. The site is located in the Santa Clara Valley, at the southern end of the San Francisco Bay. The San Francisco Bay resides in a broad depression between the San Andreas and Hayward fault systems. This area lies within the Coast Range Physiographic Province, characterized by northwest-southeast trending valleys and ridges, between the Pacific Ocean to the west and the Great Valley to the east. The oldest known bedrock in the Coast Range Province is marine sedimentary and volcanic rocks from the Franciscan Assemblage. Geologic formations in the San Francisco Bay Region range in age from Jurassic to recent Holocene. The site lithology is relatively homogeneous in the upper 30 feet, primarily consisting of cohesive, silty clay soils with minor interbedded silty sands. From approximately 30 feet below grade (fbg) to the maximum depth explored of 44 fbg, coarser grained materials are present. No logs of wells MW-1 through MW-6 or VEW-1 were available to describe subsurface sediments. Boring B-5 was the only available log, and describes sandy clay in the upper 7.5 feet. The site is located in the Santa Clara Sub-basin of the Santa Clara Groundwater Basin, designated with Basin ID 2-9.02 (DWR 2003). The Santa Clara Groundwater Basin is a northwest trending alluvial basin, bounded on the northeast by the Diablo Range and on the southwest by the Santa Cruz Mountains. The Santa Clara Sub-basin aquifer system consists of unconsolidated sediments of Quaternary age. The Santa Clara Valley Water District Groundwater Management Plan, July 2001, cites that basin lithology beneath the subject site consists of a series of low permeability clay and silt layers, resulting in confined conditions at depth beneath the site. Shallow groundwater occurs within these low permeability clays and silts. In the area average annual rainfall is approximately 24 inches and is received primarily between November and March. Throughout most of the Santa Clara Valley Sub-basin, regional water level contours show that the direction of groundwater flow is generally northwesterly, towards San Francisco Bay, with some localized variation. Groundwater flow direction typically correlates to topography. Recent groundwater level measurements from December 2008 indicate a northeasterly flow direction beneath the site. The first water-bearing zone beneath the site was encountered between 5 and 7 fbg during the investigation conducted in 2005. 1960 through

JENIC (Continued) **S101309463**

1973 UST Installation and Usage: A 2,000-gallon UST was installed outside the southwest corner of the site building sometime after the building was constructed in 1960. Previous reports indicate that the UST was used from approximately 1971 until 1973 to dispense motor fuels to delivery vans. The previous reports also stated that the tank remained unused from 1973 until its removal in 1990. 1990 - UST Removal and Excavation of Impacted Soil: The 2,000-gallon UST was removed in 1990. Approximately 125 CY of gasoline impacted soil was excavated during the removal. No information regarding conditions encountered during the tank removal, confirmed excavation limits, or compliance sampling results have been located. 1991, 1995 and 2000 - Monitoring Well Installation: Groundwater monitoring wells were installed at the site on four different occasions. It was reported that wells were installed during two field operations in 1991, and also in 1995 and 2000. Groundwater monitoring and analytical data indicate that wells MW-1 and MW-2 were installed in 1991, although report texts have stated this occurred in 1992. Wells MW-3-J and MW-4 were installed in 1995 and wells MW-5, MW-6 and VEW-1 were installed in 2000. Periodic groundwater monitoring and sampling began in August 1991with wells MW-1 and MW-2, then occurred again after the installation of wells MW-3-J and MW-4. Since October 1998, sampling frequency has fluctuated between quarterly and semi-annually. 2005 In-situ Chemical Oxidation Remediation: In-situ chemical oxidation (ISCO) remediation was conducted for several years through mid-2005, via the monthly introduction of hydrogen peroxide solutions into several site monitoring wells. The remedial approach was discontinued with agency concurrence because it appeared to be only partially effective. 2005 - Environmental Document Review and Site Investigation: Shaw Environmental, Inc. (Shaw) reviewed historical environmental documents for the site and inferred that the Site Conceptual Model (SCM) may have been flawed (Shaw, 2005). To date, no records of an SCM report have been located. Shaw conducted a Cone Penetrometer Testing (CPT) investigation in November 2005 to further characterize conditions beneath the site. Data suggest that the water table may have been much lower during the 1970s, when a fuel release appears to have occurred, and that a significant mass of immobile hydrocarbons might be present at depths down to 25 fbg. This is evidenced by soil sample analysis from boring B-5 showing up to 2,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPHg) at 25 fbg. Although well completion records are not available, groundwater monitoring data sheets indicate that deepest site well is MW-1 with a total depth of 20.8 fbg. Therefore, it is surmised that this residual mass lies beneath the depth of many, if not all, site wells and, therefore, below any effective depth of treatment using those wells.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
