Too Many Risks

I am strongly against this Energy Storage project for the following reasons:

Huge water usage

Polluting our shallow water table

Hurting Tourism - creating huge eye sore right next to HWY 1

Destroying a huge wildlife corridor for mountain lions, deer, wildcats, raccoons, possums, skunks, weasels, etc.

Right next to CA State Park

Would destroy wild native endangered Steel Trout habitat - it would border Chorro Creek

Huge light pollution - we have almost no light at night, the lights at night would be stupid bright, no more stars

Noise pollution

Destroying habitat for Chorro Creek animals: salamanders, trout, turtles, endangered snails, frogs, toads, and too many birds to list
