## **Gaslighting**

Oil industry's are gaslighting Californians over efforts to green . The U.S. House of Representatives recently passed the Consumer Fuel Price Gouging Prevention Act, which would make it illegal to increase gas and energy prices in excessive and exploitative ways. It would also allow the Federal Trade Commission to investigate possible price gouging by oil and gas companies. What a disappointment to see Republicans vote against this bill. Price gouging is real and elected officials should use the tools at their disposal to protect American consumers.
