Q&A Followup - 19Dec2022's Preliminary Assessment of Economic Benefits from Offshore Wind

Hello CEC. In accordance with Mr. Bartridge verbal request to me during Q&A, below are my questions to CEC in writing. 1. As a possible way to increase capacity, could California and the US and the world benefit from building and using a non-fixed Large Floating Dock (LFD) for installing offshore floating wind farms? 2. AB 525 required the completion of a preliminary assessment of economic benefits related to seaports and workforce development needs and standards. Can the final assessment be amended to include additional economic benefits related to deployment of LFD near shore, especially in places like Morro Bay that do not have any massive industrialized waterfront? See attached example of a possible LFD concept coined ASAT (At Sea Assembly Terminal). I look forward to hearing back from CEC on this. Thank you.
