extension request for Equitable Building Decarbonization Program RFI comments

Emerald Cities Collaborative (ECC) is grateful that the CEC is seeking detailed input into how to design the Equitable Building Decarbonization Program. However, given that CEC is requesting input on 30+ questions and that we and many of our collaborators were out of office over the holidays, we have not had sufficient time to develop meaningful responses in all areas. Would the CEC consider extending the comment deadline by one week (to January 20, 2023)? This extension will allow ECC to ensure that our responses are sufficiently detailed to be actionable by staff in completing program development. Thank you for your consideration.
