IN THE MATTER OF: Energy System Reliability [21-ESR-01]

DOCKET NO. 21-ESR-01 NOTICE OF WORKSHOP VIA ZOOM RE: SB 846 Reliability Assessment and Clean Energy Reliability Investment Plan

Notice of Lead Commissioner Workshop on SB 846 Reliability Assessment and Clean Energy Reliability Investment Plan

January 20, 2023

9:30 a.m. – 12:00 p.m.

Remote via Zoom™: See Attendance Instructions.

The California Energy Commission (CEC) will host a workshop to provide an overview of the preliminary reliability analysis for Senate Bill 846, Dodd, 2022 (SB 846) related to the prudency of extending the Diablo Canyon power plant to at least 2030 and to provide an overview of the proposed priorities for the Clean Energy Reliability Investment Plan (CERIP). A quorum of commissioners may participate, but no votes will be taken.

The public can participate in the workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is an estimate based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

CEC staff will provide a summary of the reliability analysis that was conducted jointly with input from California Public Utilities Commission (CPUC) and California Independent System Operator (CAISO) staff.

In the second half of the workshop, CEC staff will provide an overview of the proposed funding priorities for CERIP. The workshop will include a public comment period.

A detailed schedule will be posted prior to the workshop to the Docket No. <u>21-ESR-01</u>, at https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-ESR-01.

Background

SB 846 put in place actions necessary to enable the extension of the Diablo Canyon power plant beyond 2025 if it is needed to support grid reliability. One of the requirements is for the CEC to assess whether the electricity forecasts for the calendar years 2024 to 2030 show potential for reliability deficiencies if the Diablo Canyon power plant operation is not extended, and whether extending operations of the Diablo Canyon power plant to at least 2030 is prudent to ensure reliability (see PRC 25233.2(c)). This workshop will discuss the assessment.

SB 846 also requires the CEC to develop a Clean Energy Reliability Investment Plan (CERIP) in consultation with CPUC and California Air Resources Board (CARB) by March 1, 2023. The plan is to provide recommendations on initiatives that support the state's clean energy future and reliability. Funding would be separately appropriated over the next three years by the Legislature to implement the CERIP. This workshop will provide an overview of the proposed CERIP funding priorities.
