(Instructions below)

The Energy Commission will consider adoption of the proposed substantive changes to the *Guidelines* for the California Clean Energy Jobs Act (Proposition 39). The proposed substantive changes to the *Guidelines* are posted on the Energy Commission website at:

www.energy.ca.gov/efficiency/proposition39/index.html

At the business meeting, Energy Commission staff will present an overview of the content of the proposed substantive changes to the *Guidelines*. The public can provide input on the proposed changes prior to June 14 by submitting comments to the Energy

Commission at docket@energy.ca.gov. The subject line shall include “Docket 13-CCEJA-01: Comments on Prop 39”. At the business meeting, the Energy Commission will summarize all proposed changes and provide an opportunity for public comment on the *Guidelines* prior to adoption.

Background

Passed by voters in November 2012, Proposition 39 makes changes to corporate income taxes and provides up to \$550 million to improve the energy efficiency of California’s aging schools and grow the state’s significant clean energy economy. California public schools (K-12), county offices of education, community college districts, charter schools, and state special schools may receive funding for fiscal years starting with the 2013-14 fiscal year.

Under Senate Bill 73 (Committee on Budget and Fiscal Review, Stats. 2013, ch. 29.), the Legislature directed the Energy Commission to adopt the *Guidelines* at a publicly noticed meeting and to provide an opportunity for public comment. The adoption of the *Guidelines* is exempt from the administrative rulemaking process found in Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The initial *Proposition 39: California Clean Energy Jobs Act – 2013 Program Implementation Guidelines* were formally adopted by the Energy Commission in December 2013; nonsubstantive revisions were made in April 2014, and substantive changes were made in June 2014, and most recently in December 2014.

The proposed changes clarify language for better understanding; update funding appropriations for fiscal year 2015/16; change the date the Energy Commission will report to the Citizens Oversight Board; revise the description of when an energy audit is required; remove the ASHRAE level 2 energy audit requirement; allow for an alternative electric rate for local educational agencies receiving a Federal government First Preference Federal power rate; add a legal reference regarding the repeal of Section 20133 of the Public Contract Code; clarify when and how local educational agencies report work progress; final project completion and energy savings after project completion, and make changes to Appendix E that include added eligible energy measures; changes in the effective useful life in years for some eligible energy measures; and warranty clarifications to selected eligible energy measures. The proposed changes were posted on the California Energy Commission’s Proposition 39 webpage on April 27, 2016.
